

The background features abstract, overlapping geometric shapes in various shades of green, ranging from light lime to dark forest green. These shapes are primarily located on the left and right sides of the frame, creating a modern, layered effect. The central area is white, providing a clean space for the text.

Should you file a Biennial Report this time?

WHO MUST FILE THE FEDERAL 2013 HAZARDOUS WASTE REPORT

You are required by Federal statute (mandatory reporting) to complete and file the 2013 Hazardous Waste Report (also known as the "Biennial Report") or your State's equivalent hazardous waste report if your site:

Met the definition (see box below) of a RCRA Large Quantity Generator (LQG) during 2013; or Treated, stored, or disposed of RCRA hazardous wastes on-site during 2013.

Some States require that you File the Report for other reasons (as a NON - Federally Required Report)

DEFINITION OF A RCRA LARGE QUANTITY GENERATOR WHO MUST REPORT FOR 2013

A site is a RCRA Large Quantity Generator (LQG) for 2013 if the site met any of the following criteria:

- a. The site generated, in any single calendar month, 1,000 kg (2,200 lbs.) or more of RCRA non-acute hazardous waste; or**
- b. The site generated, in any single calendar month, or accumulated at any time, more than 1 kg (2.2 lbs.) of RCRA acute hazardous waste; or
- c. The site generated, in any single calendar month, or accumulated at any time, more than 100 kg (220 lbs.) of spill cleanup material contaminated with RCRA acute hazardous waste.

Note: You will report your CURRENT Hazardous Waste Generator status as of the date of submitting your 2013 Hazardous Waste Report on the Site ID Form in Item 10.A.1 - Generator of Hazardous Waste.

Your current status may be different from the status during the report year

Sites That Should Not File the Hazardous Waste Report (as a Federally Required Report)

Do not file the 2011 Hazardous Waste Report (as a Federally Required Report) if, during 2013, your site was not a RCRA Large Quantity Generator (your site did not meet any of the LQG criteria) and your site did not treat, store, or dispose of RCRA hazardous wastes on-site in waste management units subject to a RCRA operating permit.
