Subject: Gelman - Periodic DEQ Update, Monitoring Well Installation Update

Yesterday contractors for Pall Life Sciences (PLS) completed installation of two monitoring wells (MW-120s & MW-120d), near the intersection of Sequoia Parkway and Kuehnle. MW-120s was screened from 100-105 feet and MW-120d was screened from 220-225 feet.

During the initial boring, seven vertical profile samples were collected from water bearing units (60-80 feet, 100-110 feet and 200-220 feet) and all were non-detect for 1,4-dioxane. PLS will submit a detailed boring log in the near future.

Today the drillers are moving to the next location, near the intersection of Dexter and Kuehnle.

For more information on the Gelman site, click on the following link:

http://www.michigan.gov/deq/0,1607,7-135-3311_4109_9846_9847-71595--,00.html

or enter <http://www.michigan.gov/deqrrd>, then scroll to "Contaminated Sites List" and click on "Gelman Sciences, Inc. Site of Contamination".

Please contact me if you have any questions or would like to be removed from or added to this distribution list.
