

To: Public Water and Wastewater Officials [TANS list]

Title: Threat Advisory Notification System [TANS] Notice #16

Purpose: To forward the Chemical Biological and Radiological Technology Alliance publication entitled "Water Monitoring Equipment for Toxic Contaminants Technology Assessment"

Water and Wastewater facilities already have adequate resources to learn more about water security. What sets this document apart is its exhaustive scope. This publication assesses almost all current and soon-to-be-released water security equipment, and details their specifications down to extreme detail.

This publication, along with the EPA Water Security Product Guide (<http://cfpub.epa.gov/safewater/watersecurity/guide/>), are excellent tools to assist water and wastewater facilities in purchasing new security equipment.

Here is the link to the CBRTA Assessment publication:
