

Recycle Used Lead Acid Batteries Here

It is illegal to discard a lead acid battery except by return to a retailer, distributor, manufacturer, collection, recycling or smelting facility.

Michigan law (324.17101 et. Seq.) requires retailers to accept used lead acid batteries at the same time as, or within 30 calendar days of, the purchase of a new lead acid battery.

**RECYCLE YOUR USED LEAD
ACID BATTERIES RIGHT HERE**
