

Shingle Recycling Locations

(10/22/13)

The owners or operators of the listed shingle recycling operations have notified the Department of Environmental Quality (DEQ) of their intention to operate in accordance with the shingle recycling exemption (Exemption) located at http://www.michigan.gov/documents/deq/deq-whmd-swp-Exemption-AsphaltShingle_247530_7.pdf and have submitted a site management plan that was approved by the local district office of the Office of Waste Management and Radiological Protection of the DEQ. The Exemption was developed under R 299.4119 of Part 115, Solid Waste Management, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended. The inclusion or exclusion of a shingle recycling operation from this list does not reflect a determination by the DEQ on the compliance status of the shingle recycling operation under Part 115 or any other state or federal law, rule, or regulation. The DEQ does not recommend or endorse any shingle recycling operation and is providing this list to assist generators with identifying potential options for managing shingles they may generate. It is the responsibility of the generator to ensure shingles are delivered to a qualified shingle recycling facility. The DEQ maintains a Waste Data System (WDS) that contains information related to compliance activity at various types of facilities. Click on the WDS numbers below to get information related to the shingle recycling locations.
