

Wind Power Installed in Michigan

The Energy Systems Bureau has identified 130 MW of wind power installed in Michigan as of the end of 2008. The chart below indicates the cumulative MW that have been installed. In 1996 a 600 kW wind generator was installed in Traverse City and in 2001 two 900 kW wind generators were installed near Mackinaw City. In 2007, 32 wind generators (52.8 MW) were installed by John Deere (Harvest Wind Farm) in Huron County. In 2008, John Deere installed 69 MW in Huron County and Heritage Sustainable Energy installed 5 MW in Missaukee County.
