

MIOSHA

Consultation, Education and Training Services

WHAT CAN MIOSHA DO FOR YOU?

MIOSHA's Consultation Education and Training (CET) Division offers free statewide safety and health assistance to employers and employees. A staff of experienced, professional occupational safety experts, construction safety consultants, and industrial hygienists can provide a wide range of customized services for management and staff.

CONSULTATIVE VISITS

A CET consultant can schedule a visit to your workplace to conduct a free MIOSHA inspection with **no citations** and **no penalties**. Our experienced professionals will help you identify hazards in your workplace. Together, we can tour your facility to suggest ways you can create a safer and healthier environment for your workers. A deferral from programmed enforcement inspections is provided during the time employers are working proactively with CET to survey and correct hazards.

“ This is a terrific program. Our survey was a valuable learning experience for everyone involved. CET is the best tool a company could use to improve their safety program. ”

Mandy Miller, Director of Environmental Health and Safety
J M Olson Corporation, St. Clair Shores

“ With the help of the MIOSHA CET folks, we continue to grow our safety culture. On a number of occasions, I have contacted CET to use as a sounding board for safety program changes. Their advice and reinforcement has been invaluable to our MVPP STAR status. MIOSHA are safety professionals who have worked in industry or come from the enforcement side and bring practical experience to their training. You will receive knowledge, not just a certificate for your wall. ”

Michael Helms, Safety Manager
Albemarle Corp., South Haven (MVPP)

Connecting MIOSHA to Industry

Consultation, Education and Training Services

“ We worked closely with our CET consultant who provided us with the framework for our programs as well as observations and recommendations to assure compliance with MIOSHA standards. Providing a safe work environment for our colleagues is a top priority and MIOSHA has provided the resources to assist us in achieving this. ”

Jean A. Chynoweth, Human Resource Manager
Karmann USA, Inc., Plymouth

ONSITE EDUCATION

MIOSHA educates employers and their employees on how to identify and correct safety and health hazards in the workplace. Other training services provide information about MIOSHA standards and recordkeeping, while “how to” programs cover topics such as developing a safety committee, safe lifting techniques, accident investigation, lockout procedures, machine guarding, noise, and confined spaces.

AWARDS AND RECOGNITION

MIOSHA not only provides opportunities to achieve greater workplace safety and health, it recognizes and awards those efforts. Companies that show significant improvement in their injury and illness records, develop first-rate safety and health systems, and empower their team of employees to work safely, may be eligible for an award. The highest-level awards are the **Michigan Voluntary Protection Program (MVPP)** and the **Michigan Safety and Health Achievement Recognition Program (MSHARP)**. Other achievements, such as ergonomic innovations may qualify for MIOSHA recognition, too. A CET consultant can provide assistance to help Michigan companies be recognized for their extraordinary efforts to advance worker protections.

The **Michigan Challenge Program (MCP)** is designed for companies with above average injury and illness rates. Employers who accept the challenge can work with CET consultants to develop a safety and health management system. The following comprehensive services are provided: injury analysis, accident cost analysis, hazard assessment, safety and health system review, and training. During the first six months of the challenge, employers will receive a deferral from programmed MIOSHA enforcement inspections.

“ The training and guidance provided by MIOSHA, along with an increased focus on safety by the Aleris workforce were major factors, which resulted in an accident free 2006 and secured our MSHARP designation. ”

Gary S. Merritt, Plant Manager
Aleris International, Inc., Saginaw (MSHARP)

MIOSHA TRAINING INSTITUTE

MIOSHA offers certificates for attending specified workshops and seminars through the **MIOSHA Training Institute (MTI)**. Certificate programs are available for *General Industry Safety and Health* as well as *Construction Safety and Health*.

The MTI was formed as a part of a MIOSHA alliance with the Workforce Development Institute at Macomb Community College to jointly reach out, educate, and assist the state's employers and employees to improve and advance workplace safety and health. These seminars and workshops are offered throughout the state in partnership with other safety and health organizations, community colleges, and associations. In addition to MTI courses, the CET Division offers seminars and workshops on relevant safety and health topics.

SUPPORT

MIOSHA supports safety and health efforts by offering a variety of resources. An extensive publications library provides a wide range of occupational safety and health materials designed to increase safety and health awareness. Some of these include posters, brochures, permits, and fact sheets. These materials are all located on the MIOSHA website and are just a mouse click away.

More than 200 different safety and health videos are available for free loan on a wide range of topics. The only charge is the cost of returning the borrowed videos. MIOSHA also offers video streaming, which can be found on the website with the video catalogue.

Occupational health sampling equipment can also be loaned to employers after training is received on its use, allowing them to conduct their own sampling at their workplace. Sampling analysis is performed by the MIOSHA Lab at no cost to employers.

“ We have invited MIOSHA into our facility on numerous occasions to assist with ergonomics, safety and health training, and consultations. Learning about MIOSHA regulations definitely helped us improve our bottom line. ”

Mike Marten, Plant Manager
Tenneco, Litchfield

“ Our efforts to reach MSHARP status and to reduce our workers' compensation costs by 50 percent have been helped directly by CET Division staff. The expertise provided in interpretation and implementation of regulations and best practices supported our company commitment to provide a safe workplace for all. This is a key cornerstone of our success as a company. ”

Phil Preston, Environmental, Health & Safety Manager
Gestamp US HardTech, Inc., Mason (MSHARP)

CONNECTING WITH INDUSTRY

MIOSHA connects with industry for the betterment of the workplace through **Partnerships** and **Alliances**. These formal agreements offer an opportunity to work closely with MIOSHA to create dialogue, conduct outreach to promote worker safety and health, and share best practices. Partnerships include the opportunity for non-traditional enforcement strategies. Alliances are developed to focus on education and outreach activities, and do not include enforcement inspection activities.

“Walbridge Aldinger is proud to be the first construction contractor in Michigan to have a partnership with MIOSHA and we are very pleased with the results. We are sending the workers from our local communities home safely to their families every night!”

Dennis G. Jones, Corporate Safety Manager
Walbridge Aldinger Company, Detroit

“As a team member of Herman Miller, I see MIOSHA as a valuable partner in establishing a safer work environment for all. There have been just a handful of initiatives at Herman Miller that have guided us to better performance with our safety incident rate. The most credible is the Michigan Voluntary Protection Program. We started our MVPP partnership in 2003/2004 with much success and valuable learning since the start. We currently have three facilities certified as Star sites and we strive to establish two other West Michigan manufacturing facilities as Star sites.”

Tommy Egeler, Corporate Specialist
Herman Miller, Inc. (MVPP)
