***Soil Erosion and Sedimentation Control Guidebook***  
***Order Form***

The DMB, SESC Control Guidebook is a resource designed by Facilities Administration, Design and Construction Division to assist architects, engineers and contractors in maintaining control of soil erosion and sediment on State of Michigan construction projects. The details and specifications contained within the SESC manual and the accompanying compact disc (CD) are designed to provide standard guidelines for the design of soil erosion and sedimentation controls into State of Michigan, Department of Management and Budget administered construction plans and specifications.

You may purchase the DMB SESC Guidebook with CD for \$54.00 by completing this order form and sending a check payable to the *State of Michigan* to:
