## **EXECUTIVE SUMMARY**

Section 715 of Public Act 128 of 2009 requires the Department of Technology, Management and Budget (DTMB) to submit a fleet plan to the legislature within 60 days of the end of the fiscal year.

This report summarizes information at the statewide level, including a fleet inventory as of September 30, 2010 and actions taken to reduce fleet expenditures as well as measures to green the fleet. The Department of Technology, Management and Budget will continue to work with the legislature to meet the mutual goal of reducing statewide fleet expenditures.

Additional information regarding fleet operations is available from the Department. Please contact Joyce Van Coevering, Director, Fleet Operations with specific information requests.

## OVERVIEW

Section 715 of Public Act 128 of 2009 requires the Department of Technology, Management and Budget (DTMB) to:

*“Maintain a plan regarding the operation of the motor vehicle fleet. The plan shall include the number of vehicles assigned to, or authorized for use by, state departments and agencies; efforts to reduce vehicle expenditures, the number of cars in the motor vehicle fleet, the number of miles driven by fleet vehicles, and the number of gallons of fuel consumed by fleet vehicles. The plan shall include a calculation of the amount of state motor vehicle fuel taxes that would have been incurred by fleet vehicles if fleet vehicles were required by law to pay motor fuel taxes. The plan shall include a description of fleet garage operations, the goods sold and services provided by the fleet garage, the cost to operate the fleet garage, the number of fleet garage locations, and the number of employees assigned to each fleet garage. The plan may be adjusted during the fiscal year based on needs and cost savings to achieve the maximum value and efficiency from the state motor fleet. Within 60 days after the close of the fiscal year, the department shall provide a report to the senate and house of representatives standing committee on appropriations and the senate and house fiscal agencies detailing the current plan and changes made to the plan during the fiscal year.”*

Under sections 213 and 215 of the Management and Budget Act (P.A. 431 of 1984 as amended), DTMB is authorized to issue directives relative to all motor vehicles except for those motor vehicles under the jurisdiction of the Michigan Department of Transportation (MDOT). DTMB provides these centralized services to State agencies through its organizational unit, Vehicle and Travel Services (VTS). MDOT leases some passenger vehicles and work trucks through VTS; however, it maintains its own agency-owned fleet and garage operations. This report includes inventory information on the MDOT agency-owned fleet as reported to DTMB VTS. Information on MDOT's garage operations is not included due to MDOT's separate legislative authorization for these services.

At the end of FY2010, fleet plan updates and changes that would sustain fleet reductions and fleet savings were requested from each department. Departments also reported how vehicles were assigned and justified and defined

future vehicle needs. This information is used by VTS to assign appropriate vehicles for the functional need, reassign vehicles as needed, maintain fleet limits, and ensure appropriate statewide fleet controls are in place. These fleet plan submissions, in addition to VTS analysis and input, have been used to compile information for the FY2011 statewide fleet plan.

This report summarizes information at the statewide level. The Department of Technology, Management and Budget will continue to work with the legislature to meet the mutual goals of efficiently managing the statewide fleet, controlling expenditures, and greening the fleet.

## **FLEET INVENTORY**

### **FLEET DEFINITIONS**

Various factors impact the definition of the State's fleet including differing fleet definitions and interpretations, risk management requirements, fleet management responsibilities, and requirements for data use.

P.A. 431 of 1984 defines the fleet in Section 213(1)(b); "motor vehicle" means a passenger vehicle, van, minibus, truck, tractor, or other motorized vehicle.

For purposes of the State's self-insured risk management program, DTMB VTS also includes other motorized equipment under the "motorized vehicle" definition if that equipment requires insurance under the state's risk management program. For these purposes, additional motorized vehicles, while not licensed for operation on a public roadway, are included in the vehicle inventory. These vehicles include but are not limited to trailers, fork lifts, golf carts, front end loaders, riding lawn mowers, bulldozers, and any other piece of equipment which may operate, under motorized power, on a public roadway. (Public roadway is defined as the entire road surface and the adjoining publicly owned right of way.)

For this report, all on-road and off-road vehicles and motorized equipment covered under the State's risk management program are included in inventory. VTS maintains a comprehensive list of vehicles and equipment which allows VTS to respond to State Emergency Operations Center requests, Homeland Security requests and the Strategic National Stockpile initiative led by the Department of Community Health.

Appendix A provides a summary of total inventory reported for insurance purposes as of September 30, 2010. Vehicles may be leased through the State's

leasing vendor or purchased with State funds. DTMB VTS categorizes and tracks this inventory as follows:

- Leased inventory managed by VTS
- Agency-owned vehicles managed by MDOT (under legislative authority), other agency owned vehicles approved by DTMB VTS, and other miscellaneous owned motorized equipment

Vehicles are also leased to colleges and universities at their request. Two hundred fifty-nine (259) college and university vehicles are included in the total fleet inventory.

Seasonal vehicles (temporary vehicles for seasonal needs less than one year) and VTS stock vehicles (vehicles awaiting assignment or sale) are not included. Vehicles shown in inventory for some departments may include duplicates due to timing of vehicle upfitting or exchange.

Data has been organized by national fleet classifications defined by the National Association of Fleet Administrators (NAFA). These classifications include on-road and off-road vehicles, non-self propelled equipment, and heavy equipment.

Using the broadest definition of “motorized vehicles”, the total State fleet includes 12,049 vehicles and units of motorized equipment as follows:

7,409 leased vehicles (managed by VTS)  
4,640 agency-owned vehicles and heavy equipment.

These vehicles are classified as follows:

On road vehicles	8,969
Off road vehicles	2,435
Non self-propelled equipment	639
Equipment (attachments)	<u>6</u>
Total	12,049

Between September 30, 2009 and September 30, 2010, the fleet size increased by 89 vehicles. This rise was due to an increase in Department of Human Services staff required by the Children’s Right consent decree, purchase of agency-owned off-road equipment, and changes in business requirements.

The leased fleet size remained below the target size of 7,550 vehicles which was established in accordance with Executive Directive 2003-7. Future changes in state services may result in a change in the targeted fleet size.

Please see Appendix A for detail by department and description.

## **EXPENDITURE REDUCTION EFFORTS**

### **CONTROLS ON FLEET SIZE**

DTMB VTS has implemented controls on fleet size for the State's leased fleet including requirements for submission of a fleet plan by departments, identification of seasonal needs, and strict approval requirements for any additions to the State's leased fleet. Increases in the size of agency owned and leased fleets require approval from the DTMB Director.

Appendix B defines the targeted leased fleet size, by department. Targets have been set at 8,570 vehicles statewide, including a target of 7,550 vehicles for the State's leased fleet and 1,020 vehicles for the MDOT agency-owned light duty passenger fleet (cars and light duty work trucks). Heavy equipment and other off-road motorized equipment are not subject to formal targets given specialized operational needs for this equipment. However, departments are expected to manage these units by replacing them on a one for one basis with few exceptions.

### **INFORMATION SHARING WITH DEPARTMENTS**

To assist departments, DTMB VTS meets quarterly with each department's fleet contact and provides a detailed report which includes high and low mileage vehicles, vehicle order status, motor pool usage, accidents, personal mileage reimbursement, and maintenance reports. Using this data, VTS and the departments are able to identify mileage patterns and vehicle usage days to help determine if vehicles are fully utilized. The review also focuses on excessive maintenance costs, personal mileage reimbursement that could be reduced by use of a fleet car, and safe driving habits.

### **MOTOR POOL OPERATIONS**

DTMB VTS maintains central pools to meet the needs of State employees requiring short-term vehicle rentals of 10 days or less. Departments are encouraged to establish motor pools to facilitate vehicle sharing within their own departments. DTMB VTS motor pool size and usage is monitored monthly to ensure efficient usage. In FY2011, DTMB VTS will complete the installation of a new motor pool reservation system which will ultimately allow the creation of additional outstate pools through increased vehicle utilization.

### **PERSONAL VEHICLE USAGE**

When in the best interest of the State, an employee may use a personal vehicle as an alternative to a State-owned vehicle. The employee reimbursement for premium mileage is the IRS standard mileage rate In effect during the fiscal year.

The average per mile cost of a midsize state vehicle is used to set the standard mileage reimbursement rate. The FY2011 standard mileage reimbursement rate is \$0.365. The FY2010 cost of personal mileage reimbursement for executive branch agencies was \$10,416,244, a \$2,045,353 decrease from FY2009. This represents 23,425,238 miles traveled.

The cost of personal mileage reimbursement is reviewed with departments to determine if vehicle fleet assignments should be changed or vehicles should be added to motor pools to ensure the most cost-effective means of travel.

### **ESTABLISHMENT OF VEHICLE TYPE TO MATCH JOB REQUIREMENT**

A key to reducing costs is the alignment of the type of vehicle needed with the actual job performed. Departments are asked not to identify specific desired makes and models but to define the functional need to be met by an assigned vehicle. An in-depth analysis of job specifications is completed which allows vehicle assignment based on these defined functional needs rather than vehicle models. DTMB VTS and the agency identify the most cost-effective solution.

### **ELIMINATION OF UNNECESSARY VEHICLE OPTIONS**

In conjunction with reducing the number of models offered, a review is conducted of the options required for the driver to perform job-related duties. Options, including window tinting, all wheel drive, bucket seats, and some security screen configurations, have been eliminated unless they are justified and approved by DTMB VTS.

### **REDUCTION IN THE NUMBER OF MODELS/TYPES OF VEHICLES OFFERED**

Based on the comparison of job specifications and vehicle types, the most appropriate makes and models are identified according to the job required. Vehicle selections are made based on life cycle costs, availability of appropriate models from manufacturers, and manufacturers' ordering cycles. In FY2010, 39 models were selected. This is significantly down from the 104 selections offered in FY2003 when fleet reductions were first initiated. Nineteen (19) of the FY2010 models represent low volume, special vehicle needs.

### **DEPARTMENT AND DRIVER AGREEMENTS**

To encourage accountability, DTMB VTS developed State Motor Vehicle Driver Agreements and department agreements. The Driver Agreements outline responsibilities of drivers who use state vehicles and equipment. The department agreements define expectations for the management of the State's fleet. Departments are expected to comply with fleet policies as defined in those agreements and ensure driver compliance with specific driver policies defined by both DTMB VTS and the individual department

## **ALTERNATIVES TO TRAVEL**

DTMB VTS continues to work with departments to identify and encourage alternatives to travel. DTMB conferencing and collaboration tools allow employees to work together in real time without face-to-face interactions, which reduces travel costs. Current statewide conferencing and collaboration tools include audio conferencing, web conferencing, and video conferencing and streaming media.

## **GREENING THE FLEET**

Executive Directive 2007-22 was issued in November 2007, directing DTMB to:

- Comply with the requirements of the federal Energy Policy Act (EPA) of 1992.
- Include hybrid vehicles in the state fleet when it is cost effective and the vehicle meets functional needs.
- Require users of vehicles to refuel with alternative fuels, to the extent feasible.
- Develop procedures to encourage or require the use of biodiesel fuels.
- Administer the Flexible Fuel Fleet Awareness program.
- Explore opportunities for joint use of public alternative fuel distribution facilities.

DTMB VTS is committed to greening the fleet as part of the Governor's priority to green Michigan. Since the passage of the Energy Policy Act in 1992, DTMB VTS has complied with its requirements. DTMB maintains a website listing retail fuel locations statewide that dispense E85 ethanol and includes a list of those locations in each flex fuel vehicle. DTMB VTS hosted an Electric Vehicle Demonstration Day to expose departments to these options.

In FY2011, VTS is collaborating with Chrysler LLC on its Plug-In Hybrid Electric Vehicle (PHEV) Project through the Department of Energy whereby VTS will run four pre-production PHEV Dodge Ram pick-up trucks for three years. VTS continues to explore grant opportunities for plug-in vehicles, clean diesel initiatives, and alternative fuels.

During FY2010, 299 flex fuel vehicles were added to the fleet, replacing vehicles which run only on unleaded fuel. The State also has 24 hybrid vehicles in the fleet.

## **FUEL**

### **ALTERNATIVE FUEL**

Executive Directive 2005-4 was issued in late April 2005, directing DTMB VTS to develop procedures regarding use of biodiesel fuel and to require users to purchase alternative fuel (e.g., ethanol) when it is available and cost-effective. As a result of Public Act 279 of 2006, DTMB VTS installed an E85 ethanol fuel tank at the State Secondary Complex. The tank has been in operation since November, 2006.

The State currently has 3,404 flex fuel vehicles, capable of operating on either unleaded gasoline or E85 ethanol. This is an increase of 299 vehicles from 2009. In FY2010, the State purchased 68,244 gallons of E85 ethanol for the leased fleet as compared to 70,168 gallons in FY2009. Total usage may be understated because of inaccurate reporting by retail fuel sites and limited product availability statewide. Marketing efforts to promote use of E85 ethanol are ongoing. There are 93 fueling sites in Michigan that sell E85 ethanol.

In FY2010, approximately 64,000 gallons of B20 biodiesel were purchased for use in the state fleet from the bulk fueling location at VTS's Secondary Complex location compared to 69,000 gallons in FY2009.

Federal Energy Policy Act legislation requires that 75% of the State's non-law enforcement, light duty vehicle fleet is comprised of flex fuel vehicles and that alternative fuels are utilized when they are reasonably available and reasonably priced. Credits for use of biodiesel may be combined with vehicle purchases to meet federal requirements. The State has complied with federal requirements in FY2010 and anticipates it will meet these targets again in FY2011.

The Director, Fleet Operations is a board member of the Greater Lansing Clean Cities Coalition. Participation in the coalition provides VTS with educational opportunities to keep current of cutting edge alternative fuel research and applications.

### **FUEL CONSUMPTION**

In FY2010, the State's leased fleet utilized 5,968,478 gallons of fuel, traveling 98,337,688 miles. Retail fuel prices averaged \$2.87 per gallon, compared to \$2.54 per gallon in FY2009.

In developing the FY2011 budget, VTS utilized federal Energy Information Agency (EIA) data as of August 2010 to estimate average retail fuel prices by quarter. For FY2011, the EIA estimated the annual average retail price per

gallon will range from \$2.74 to \$3.00 per gallon. The FY2011 budget assumes the leased fleet will travel 99 million miles with total fuel costs estimated at approximately \$14.2 million.

## **FUEL TAXES**

Utilizing a fleet credit card provider, the State is able to purchase most fuel exempt from state and federal excise taxes. In FY2009, the State saved \$1,011,745 in state motor fuel taxes and \$1,035,198 in federal excise taxes on its purchases.

## **FLEET GARAGE OPERATIONS**

DTMB VTS maintains one fleet garage at the State's Secondary Complex in Dimondale. The garage is staffed by 25 full time employees and is supplemented, when needed, by automotive mechanic students from Lansing Community College. This report does not include information related to the MDOT garages as that information is maintained by MDOT.

## **GARAGE SERVICES**

The VTS garage is authorized by the automotive manufacturers as a new car prep center. In addition, the garage provides full maintenance and repair services except for engine and transmission overhauls and body repairs. VTS mechanics are ASE-(Automotive Service Excellence) or state-certified. The garage maintains a parts department, including tires, push bars, lights and other specialized equipment needed by the Michigan State Police and the Department of Natural Resources law enforcement entity. Many of these parts are not readily available at retail service centers, and the state is able to purchase parts at a sizeable discount from retail. Core services provided by the VTS garage include new car and seasonal vehicle prep, maintenance of MSP precision driving unit vehicles, and management of vehicle resale and disposal functions.

In FY2010, the garage serviced 2,173 vehicles on 3,882 work orders. Multiple services may be included on one work order. The following services were provided:

Type of Service	Count of Jobs
Preventive Maintenance	1,620
Tires	1,355
Brakes	1,210
Body and Glass	1,114
Miscellaneous Repairs	4,645
Assignments/Terminations/Disposals	7,902

Type of Service	Count of Jobs
Parts Repair/Parts Distribution	27
Towing Service and Transport	564
TOTAL	18,437

### **GARAGE EXPENDITURES**

In FY2010, expenditures for the State's garage were \$2.8 million. This included \$1.8 million in salary expense, \$240,000 in building and equipment depreciation, and \$573,000 in shop supplies, tires and parts.

### **MOTOR POOLS**

VTS garage personnel in Lansing also manage the State's motor pools in five locations: Traverse City, Escanaba, Detroit, downtown Lansing and the State Secondary Complex. Four (4) of the 25 full-time employees are assigned to motor pool support.

One hundred forty three (143) vehicles are maintained in State motor pools. Data on motor pool use is provided below:

Motor Pool Location	Number of Rentals (FY2010)	Miles Driven (FY2010)
Traverse City	1,730	208,656
State Secondary Complex	1,760	560,681
Escanaba	879	149,885
Downtown Lansing	4,075	1,123,088
Detroit	2,789	534,914
