MEMORANDUM TO THE NATURAL RESOURCES COMMISSION

Subject: Tracking Legally Shot Game Animals  
Wildlife Conservation Order Amendment No. 2 of 2010  
FOR INFORMATION ONLY

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director and the Commission to issue orders to manage wild animals in this state.

Discussion and Background

This amendment proposes changes to the tracking of legally shot deer, elk, and bear by dogs that will enhance a hunter's ability to locate and dispatch mortally wounded animals.

The Department has always recognized the retrieval of harvested animals as an important duty for all hunters. Retrieval of legally shot animals has been a traditional requirement since the inception of recreational hunting. Presently, the Wildlife Conservation Order requires that wounded game, reduced to possession, shall be immediately killed and included in the daily limit. A person shall not kill or wound any game animal without making a reasonable attempt to retrieve the animal and include it in their daily limit. Hunters harvesting species protected under federal regulations are legally required to make a reasonable attempt to retrieve the animal and include it in their daily bag limit.

Michigan deer hunters have been allowed to use dogs to help locate down and mortally wounded deer for several years. However, the individual with the dog has not been allowed to carry a weapon and the dog must be kept on a leash. If the tracking is done at night, artificial lights ordinarily carried in the hand may be used and barking dogs shall not be used on public lands.

This amendment will allow an individual using a dog to track legally shot deer, elk, and bear, and to carry a firearm to dispatch a mortally wounded animal, with the following conditions:

1. A tracker must successfully pass a dog tracking test administered by a Department approved organization as agreed to by the local district Law Enforcement Division (LED) supervisor. Documentation of passing this test must be kept on the person of the tracker when engaged in this activity.

2. A tracker must possess a valid concealed pistol permit when using a pistol.
3. A shotgun with a single projectile may be used to dispatch a mortally wounded animal.
4. Contact must be made with the DNR LED before tracking occurs, and again after the dispatch of the mortally wounded animal.
5. A tracker must also receive annual written pre-approval from LED to participate in this activity.

Additionally, section 6.3 of the Wildlife Conservation Order currently requires anyone chasing or locating game with dogs to possess a current valid license for that game; this amendment stipulates an exception to that requirement for trackers and also provides consistency with 2009 PA 70.

This order is being submitted for information and consideration. This item appeared on the Department's November 2009 calendar and may be eligible for approval on January 7, 2010.

For the purpose of this order, a mechanical device shall not be construed to mean a firearm, slingshot, or bow and arrow. When used in this order, "raised platform" means a horizontal surface constructed or manufactured by a person that increases the field of vision of a person using the horizontal surface beyond the field of vision that would normally be attained by that person standing on the ground.

(3) During the five days immediately preceding November 15, transport or possess in an area frequented by deer a rifle or shotgun with buckshot, slug load, ball load, or cut shell.
