MEMORANDUM TO THE NATURAL RESOURCES COMMISSION

Subject: Deer Regulations  
Wildlife Conservation Order Amendment No. 07 of 2010  
FOR INFORMATION ONLY

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director and the Commission to issue orders to manage wild animals in this state.

Discussion and Background:

This amendment proposes to change the areas open to the early and late antlerless firearm seasons. The changes result in the same boundary for these special seasons, which simplify regulations, while at the same time opening additional areas for hunting. Additionally, it is proposed to increase the limit on the number of antlerless deer licenses that may be purchased in one day from two (2) to five (5), in all deer management units (DMU) with land in Zone 3, DMU 487, and DMU 452. This amendment also recommends removing the season limit of 5 private land antlerless licenses per person in DMU 486, as currently exists for DMU 487 and DMU 041. Finally, it is proposed to allow the use of combination and firearm licenses for taking antlerless deer during the firearm season within DMU 487.

The early and late antlerless firearm deer seasons provide additional hunting opportunities and increase management capacity to address local population issues or deer-human conflicts on private lands. This amendment proposes to add the following areas to the early firearm deer season: Antrim, that portion of Charlevoix County within DMU 015, and Oceana counties; those portions of Muskegon, Mecosta, Isabella, Midland, and Bay counties lying within Zone 2; and that portion of Arenac County within Zone 2 east of M-65. This amendment also proposes to add the following areas to the late antlerless firearm deer season: Antrim, that portion of Charlevoix County within DMU 015, St. Clair, Macomb, Wayne, and Monroe counties; and those portions of Arenac County within Zone 3 and within Zone 2 east of M-65.

Attaining deer management objectives within DMU 486 and DMU 487 will be facilitated by providing maximum flexibility for hunters within these areas. With the anticipation of establishing liberal quotas in DMUs 486 and 487, allowing individuals to purchase a greater number of antlerless licenses for these areas within a single day and for the entire hunting season, will facilitate the purchase and use of antlerless licenses among those with interest in taking multiple deer without affecting availability of licenses to other hunters. These changes

also enhance the management of deer on a regional basis through addressing regional issues and needs. Additional options for reducing deer numbers and increasing efforts at bovine tuberculosis eradication are also required within DMU 487. Allowing the use of combination and firearm licenses for taking antlerless deer during the firearm season in this area will allow many hunters that do not purchase antlerless licenses a legal option for harvesting an antlerless deer.

Substantial discussion has occurred regarding potential changes to the youth firearm deer season. There is a desire to modify this season in appropriate ways in order to enhance youth hunter recruitment and retention. Many options will be brought forward to the Natural Resources Commission for discussion. These will include changes to season length, changes to season dates, price of youth licenses, bag limits and other aspects of the youth season. After a review of options, a proposal may be brought forward upon resubmission of this Amendment for action in May, 2010.

This amendment also addresses two technical issues. The first assures that youth have the legal authority to take any deer with a firearm and combination license during the youth firearm hunting season statewide. The second issue clarifies that only one firearm and bow and arrow license may be purchased in a calendar year.

Sections 3.101 and 3.101e of the Wildlife Conservation Order also contain provisions that allow for the use of crossbow and, due to the sunset provision of March 2012 for the use of crossbow, these proposed deer regulations must be included in both the current (sunsetting) order section, and the section to which it may revert in the future.
