STATE OF MICHIGAN
DEPARTMENT OF NATURAL RESOURCES
LANSING

REBECCA A. HUMPHRIES
DIRECTOR

SUBMITTED: August 17, 2009

MEMORANDUM TO THE DIRECTOR

Information: Natural Resources Commission

Subject: Statewide Trout, Salmon, Whitefish and Lake Herring Regulations (FO-200)
FOR INFORMATION ONLY

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director to provide for better protection and preservation of fish, game and birds.

Discussion and Background:

Several minor changes are being proposed to this order including stream type boundary changes, lake type designation changes, and several waters are recommended for removal.

Lakes
Shavehead Lake (Cass County) – remove from Type B listing
Sand Lake #2 (Grand Traverse County) – remove from Type D listing
Courtney Lake (Ontonagon County) – change from Type A to Type B

Streams
Sable River (Mason County) – change Type 4 upstream boundary from Freesoil Road to Pole Bridge (T19N, R15W, S3)
South Branch Flint River (Lapeer County) – remove from Type 4 listing

The following information is provided with regard to additional substantive changes.

Lake Trout Season Extension in Lake Huron

Fishing effort through 2008 for salmon and trout on Lake Huron has declined 71 percent since 2004, due primarily to declines in chinook salmon. Lake trout harvest at ten index ports has shown a 36 percent decline, due more to the general decline in effort than to any shortage of lake

trout. In recent years, ice and pier anglers have been catching and releasing increasing numbers of lake trout, as the fish apparently migrate closer to shore and into Saginaw and Tawas Bays during winter months. Many anglers have requested a season change to allow lake trout caught during the winter to be harvested. After review of creel census data and mortality estimates for lake trout, Fisheries Division believes lengthening the lake trout season would allow anglers to harvest lake trout during the winter and early spring when these fish are close to shore, without negatively impacting the resource. Sublegal-sized lake trout released after being caught in shallow water should survive better than later in summer when they are caught in depths often exceeding 100 or 150 feet. The season would remain closed during the spawning period when the fish might be more concentrated and therefore more vulnerable. This change in season is proposed only in lake trout management units MH 3-6 (major ports Harrisville, Tawas, Grindstone, Harbor Beach, and Lexington).

Evaluation of the effects of this regulation change will be accomplished via ongoing research studies including the Great Lakes Creel Census which has tracked sport harvest of lake trout for more than two decades. This change in regulations will be re-evaluated after five years to ensure that harvest levels are still within an acceptable range.

Changes to Stream Types

Fisheries Division has been working toward achieving simplification of inland trout and salmon regulations for several years. Recently, Fisheries Division completed an internal review of the effectiveness of inland trout regulations and proposed several changes to those regulations. The proposal was presented to the Coldwater Regulations Steering Committee (Resource Stewards, Trout Unlimited, Anglers of the Au Sable, Michigan River Guides Association, Federation of Fly Fishers, Michigan United Conservation Clubs, etc.) in April and released to the public in early May. Since then Fisheries Division has been receiving public comment, and recently met again with the Coldwater Regulations Steering Committee. Based on comments received, there appears to be broad support for combining the Types 5, 6, and 7 categories into one new category which will be called "Gear Restricted Streams" and will not carry a number designation. This will leave four numbered stream categories (Types 1, 2, 3, and 4) that will remain unchanged from their current status. This regulation change has the support of all members of the Coldwater Regulations Steering Committee who indicated their support at the July 20, 2009, meeting. This regulation proposal will be open for comments online until September 1, 2009.

Recommendation:

This order is being submitted for information and consideration at the September 10, 2009 Natural Resources Commission meeting. This item appeared on the Department's August 2009 calendar and is eligible for approval on October 8, 2009.
