MEMORANDUM TO THE DIRECTOR

Information: Natural Resources Commission

Subject: Statewide Trout, Salmon, Whitefish and Lake Herring Regulations (FO-200)

FOR INFORMATION ONLY

## Authority

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director to provide for better protection and preservation of fish, game and birds.

## Discussion and Background

The total allowable catch of lake trout for State-licensed recreational anglers fishing in lake trout management unit MH-1, which is located in northern Lake Huron, is set via stipulation under the 2000 Consent Decree. The Decree was agreed to in August 2000 by the State of Michigan, the United States, and the five Tribes recognized under the 1836 Treaty of Washington in 2000.

In 2009 and again in 2010, State-licensed recreational anglers exceeded the State's total allowable catch of lake trout from MH-1, even with additional efforts by the Department to establish new regulations in 2009 aimed at avoiding this situation. When overharvest occurs, the party succeeding their harvest limit by more than 15 percent is penalized in the following year. In such a case the offending party loses the amount overharvested from their next year's total allowable catch, and that amount is added to the other party's total allowable catch.

The total allowable catch of lake trout for State-licensed recreational anglers in MH-1 was set at 19,696 pounds in 2010, while the actual recreational harvest during 2010 totaled 24,803 pounds. The overharvest of 5,107 pounds will be applied to the State's total allowable harvest of 25,000 pounds for 2011, resulting in an actual total allowable harvest of 19,893 pounds for State-licensed recreational anglers in MH-1 during 2011. Given this reality, a further adjustment to regulations is necessary to reduce harvest of lake trout from MH-1 by State-licensed recreational anglers during the 2011 fishing season. Therefore, we are recommending the following change for regulations governing fishing for lake trout in MH-1 be enacted to prevent an additional year of overharvest:

1) lower the maximum size limit from the 27 inches to 24 inches.

Due to the emergency nature of this regulation change, we will be required to publish the new regulation for three consecutive weeks in newspapers throughout all counties affected by the change prior to the regulation taking effect. If the attached version of Fisheries Order 200 as amended (Order) is signed on April 7, 2011, then we can accomplish the necessary notice in time for the size limit to take effect by May 1, 2011. Meeting this timeline will ensure a successful reduction in the harvest of lake trout from MH-1 by State-licensed recreational anglers.

Unfortunately, the 2011 Fishing Guide has been printed and copies have been distributed to license retailers. The guide contains regulations that govern fishing for lake trout in MH-1, which are not consistent with the new regulation proposed in this amended Order. Thus, conflicting information will exist regarding lake trout regulations for MH-1 after this Order takes effect. Although this eventuality is regrettable, we will undertake additional strategies to inform the public of both the conflicting information and which regulation is in effect for 2011 to ensure high compliance with the new regulation.

Finally, two technical changes have been made to the Order from last fall. First, an unnecessary clause was left in the description of the daily possession limit for the Au Sable River, Mainstream (Crawford County) from Burton's Landing to South Wakeley Bridge Rd. (Wakeley Bridge). That clause should be removed.

Second, law enforcement personnel determined there was a discrepancy between language found in the Fishing Guide for 2011 and language in Fisheries Order 200.11 that was previously approved on December 9, 2010. Specifically, the entry for the South Branch of the Galien River had been inadvertently removed during editing last fall. Therefore, the listing has been reinserted into the appropriate section of the Order. No changes to regulations are being proposed for this stream and the regulations are appropriately listed in the Michigan Fishing Guide for 2011.

**Recommendation**

It is our recommendation that the changes to fishing regulations proposed in Fisheries Order 200 and summarized above be approved to take effect on May 1, 2011. The recommended changes will help prevent overharvest of lake trout from Lake Huron by State-licensed recreational angler, pursuant to provisions in the 2000 Consent Decree between the State of Michigan, the United States, and the Tribes recognized under the 1836 Treaty of Washington. In addition, several technical corrections will be resolved that were inadvertently missed in the previous version of Fisheries Order 200.

This Order is being submitted for information at the March 10, 2011 meeting of the Natural Resources Commission. This item appeared on the Department's February 2011 calendar, and is eligible for approval on April 7, 2011.
