DIRECTOR

SUBMITTED: September 15, 2014
RESUBMITTED: October 13, 2014

MEMORANDUM TO THE DIRECTOR

Subject: FO-210.15
Designated Trout Streams for Michigan

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, authorizes the Director and/or the Commission to provide for better protection and preservation of fish, game and birds.

Discussion and Background:

Fisheries Order 210 regulates streams in Michigan where trout are the predominant fish species. The Department proposes to modify several designated trout streams including adding new streams to the designated list. Three waters are proposed for addition and one is proposed for removal. Waters removed from the Order would revert to the general statewide fishing regulations.

The following changes are proposed:

The Department proposes to add Beaver Tail Creek (Chippewa County) from M-134 upstream. A recent survey identified a healthy trout population which would benefit from more protective trout regulations.

The Department proposes to add Cable's Creek and Iron Ore Creek located on Beaver Island (Charlevoix County). A recent fish survey revealed healthy trout populations which warrant more protective trout regulations.

The Department proposes to remove Sheldon Creek and tributaries (Cass and Van Buren Counties) from the section given that recent survey work did not document any trout. Only warmwater species were collected in the survey. Therefore, more restrictive trout regulations are no longer appropriate.

Issue Pros and Cons
Designating additional trout waters is positive for trout management. The added protection provided to these new trout populations will protect trout populations and increase trout angling opportunities for anglers. Removal of waters from the list is prudent when trout are no longer present in a stream because trout regulations are generally more restrictive. Therefore, the Department recommends removing more restrictive trout regulations when they are no longer valid or appropriate.

Neighboring States
Other states with trout fisheries apply more restrictive trout regulations on those waters to protect trout from harvest. Trout are managed with more restrictive regulations because anglers place a high value on trout fisheries.

Biological
Each regulation change proposed above is biologically based upon survey work conducted in each stream proposed for addition and removal.

Social
Anglers are supportive of our trout regulations which protect and enhance trout fisheries. Removal of trout regulations on areas where trout are not present will benefit anglers understanding for where they can target trout because anglers expect to find trout in waters designated as trout streams. Conversely, if trout are not present there is no need to over regulate these streams for anglers that are not targeting trout.

Economic
The Department does not expect the proposed changes to have any significant budgetary or personnel implications.

Recommendation:

This order was submitted for information on October 9, 2014, at the Natural Resources Commission Meeting. This item appears on the Department's October calendar and may be eligible for approval on November 6, 2014.

James Dexter, Chief
Fisheries Division

Gary Hagler, Chief
Law Enforcement Division

FISHERIES ORDER

Designated Trout Streams for Michigan
Order 210.15

By authority conferred on the Natural Resources Commission and the Department of Natural Resources by Part 487 of 1994 PA 451, MCL 324.48701 to 324.48740, it is ordered that effective April 1, 2015, the following section(s) of the Fisheries Order shall read as follows:

The streams and portions of streams in the list which follows are hereby designated as trout streams:

Key to Designation List:

Unless otherwise described, the location description listed after the stream name indicates the downstream limit of the trout designation. All of the stream and its tributaries, unless excepted, from that point upstream are designated trout waters. Exceptions are italicized.
