MEMORANDUM TO THE DIRECTOR

Information: Natural Resources Commission

Subject: Order to Regulate Use, Lime Island State Recreation Area, Chippewa County  
Land Use Order of the Director Amendment No. 05 of 2013  
FOR INFORMATION ONLY

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director to issue orders to implement land use rules.

Discussion and Background:

The purpose of this order is to:

- Regulate the use and occupancy of the Lime Island coal dock to protect the common tern's colony and nesting sites.

Once numbering over 6,000 breeding pairs in Michigan, common terns were found on every Great Lakes shore. Data from 1992 suggest that the population has decreased to an estimated 1,400 breeding pairs. Several factors have contributed to this decline, including loss of habitat, competition with gulls, predation, and effects of contaminants. As a result of these factors, the common tern was officially listed in Michigan as a threatened species in 1978 and has recently undergone a status assessment by the US Fish and Wildlife Service in the Great Lakes for possible listing as federally endangered.

During 1997, Lime Island supported the largest common tern colony in the Great Lakes (649 breeding pairs). Common terns were using the old coal dock and a rock pile in the harbor as their nesting sites. At that time, Lime Island was one of the most important colonies in Michigan. Researchers from Michigan State University were working with the MDNR to understand how the colony was thriving in this unusual location for common terns.
