MEMORANDUM TO THE DIRECTOR

Information: Natural Resources Commission

Subject: Order to Regulate Use, Removal of Four State Forest Campgrounds from Land Use Order 4.3.  
Land Use Order of the Director Amendment No. 19 of 2013

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, authorizes the Director to issue orders to implement land use rules.

Discussion and Background:

Currently 129 campgrounds in state forests are operated by the Parks and Recreation Division (PRD). In addition, a partnership has been formed with a local vendor to reopen Thunder Bay River State Forest Campground in Alpena County. The reopening of this campground and boat launch is under a concession agreement with Adventureland, LLC.

PRD staff has identified three (3) additional campgrounds that can be managed by current staff and financial resources. These campgrounds serve a significant recreational niche, and each of these facilities includes a boat launch. It is anticipated the reopened facilities will be revenue neutral or create a small profit. The campgrounds are located in small communities that can derive economic benefit from the tourism that is returned to the area.

In addition to the reopening of the Thunder Bay River State Forest Campground in Alpena County, it is recommended the following campgrounds be reopened:

Muskrat Lake ORV State Forest Campground, Oscoda County

Off-road vehicle (ORV) users have requested this campground be reopened. Oscoda County has few camping opportunities. It is anticipated that this reopening will assist in meeting the goals of the statewide trail plan. This campground has all the amenities required to open, including a DEQ Campground Permit. No additional funds are required and revenue, on a three-year average (before closure), for the thirteen campsites located in this campground is approximately \$4,000 per year.

November 12, 2013

Twin Lakes State Forest Campground, Cheboygan County

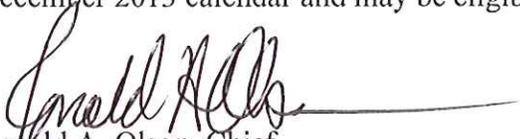

This campground has a group of campers that would like to see it reopened. This 12-site campground has all the amenities required to open and has received a DEQ Campground Permit. This campground is on the route to other campgrounds managed by Cheboygan State Park. No additional funds are required and revenue, on a three-year average (before closure), for this campground averaged approximately \$4,000 per year.

Lake Marjory State Forest Campground, Otsego County

This campground is less than five minutes south of Otsego Lake State Park, a state park campground that often fills up in the summer. The idea presented by park staff is to utilize this as an overflow for Otsego Lake State Park. This 10-site campground has all the amenities necessary to open, including a DEQ Campground Permit. No additional funds are requested to operate this campground and revenue, on a three-year average (before closure), averaged approximately \$3,000 per year.

Recommendation:

This order was submitted for information and consideration at the November 7, 2013 Natural Resources Commission meeting. This item appeared on the Department's October and December 2013 calendar and may be eligible for approval on December 12, 2013.
