MICHIGAN'S STEWARDSHIP ETHIC		
Stewardship is an ethic recognizing the land and its natural inhabitants have an inherent worth and we have a responsibility to manage our actions as part of that. It guides us to manage our activities to the utmost of our abilities, to ensure the future health, productivity, and well-being of the land, its natural communities and species, and to allow our successor's opportunities at least equal to ours to use the land and its resources.		
This plan is compatible with my goals and objectives. I understand Landowner Stewardship Management Plans are voluntarily accepted. This acceptance represents a good faith, but non-binding commitment to implement strategies suggested in this plan. As a non-binding commitment, private property rights cannot be jeopardized as a result of receiving a plan.
