MEMORANDUM TO THE NATURAL RESOURCES COMMISSION

Subject: Fall Turkey Regulations and License Quotas
Wildlife Conservation Order Amendment No. 5 of 2013
FOR INFORMATION ONLY

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director and the Commission to issue orders to manage wild animals in this state.

Discussion and Background:

The fall wild turkey season is designed to stabilize or reduce wild turkey numbers in designated fall wild turkey management units to meet population goals recommended by local Department of Natural Resources Wildlife Division personnel. These goals incorporate the social and biological carrying capacity within these turkey management units. License quotas are developed to harvest the desired number of turkeys to meet the management goal.

The Department recommends that a total of 51,850 licenses be made available and approximately 44,943 square miles of area be open to fall turkey hunting. The Department further recommends that a total of 5,150 general licenses be made available through a lottery in management units: G, GB, GC, J, L, M, T, WA, and W. Units J, T, and WA were not open during the previous fall cycle. Based on recent turkey harvest statistics, population estimates, and feedback on hunting quality, Department experts and turkey management partners agree that these units can sustain a fall harvest. The Department recommends a general license quota of 200 for Unit T, 100 for Unit WA, and 1,500 for Unit J.

The Department does not recommend any changes to the private land license quotas or application process. Unit HA will continue to have a private land quota of 1,700, with the private land licenses being available initially through an application. Licenses in fall hunt unit YY, encompassing only private lands in southern Michigan and Beaver Island, may be purchased over the counter when leftover fall turkey licenses are made available for purchase. YY licenses do not require an application and will be sold until the 45,000 private-land only license quota is achieved for the unit.

The Department does not recommend any changes to the application process for limited-quota hunt units or leftover license sales. The division further recommends maintaining the one-license-per-day purchase limit for leftover licenses when available.

Based on the satisfaction of Michigan turkey hunters and the desire to maintain stability, these regulations are proposed to remain constant for a minimum of three years.

Technical wording changes are also proposed in several sections to maintain consistency throughout the Wildlife Conservation Order.

Turkey Management Unit H was omitted from the Wildlife Conservation Order due to a technical error. Unit H has been reinserted to preserve the definition and history of the unit. This is a technical change only, and no license quota has been assigned.

Recommendation:

This order is being submitted for information and consideration. This item appeared on the Department's March 2013 calendar and may be eligible for approval on May 9, 2013.
