

Left Navigation Flyout

The Left Navigation Flyout is an optional feature. This JavaScript based feature allows for second and third level navigation categories to hover over the web page. It makes it easier for people to navigate multiple categories without added clicks and loading each level of navigation. It will give your site a more current approach to navigation

Again, this is an optional feature. It can be requested by a Site Admin for a CMA Expert to implement. There are multiple options available for styling. It will be implemented to complement your site's look & feel and color palette.

The image shows a screenshot of a website navigation menu. The menu is structured as follows:

Michigan.gov Home		DNRE Home	DNR	Links	Site Map
Hunting and Trapping	Hunting Hot Topics
