

## Community Energy Program RFP Q & A

**1. Q: Are state parks eligible for this funding?**

A: No. Eligibility is limited to organizations listed in Part I-C. Any Michigan local government (i.e. cities, townships, villages, counties) or K-12 public school district, as well as any 501(c)(3) or small business (<500 employees) organization with demonstrated experience working with local governments and/or other public building owners on efficiency and/or renewable energy projects, physically located in Michigan, is eligible to apply.

**2. Q: In Area of Interest 3, are projects involving retrofitting to LED street lights eligible, or will this be a separate grant program as was the case in 2015?**

A: Street lights are not eligible under Area of Interest 3. We plan to issue a separate RFP specifically for LED street light conversion.

**3. Q: Is there a requirement that LED lights also limit light pollution?**

A: No.
