U.S. Census Bureau, Estimates of Subcounty Population for 2000-2007, released July 10, 2008. These estimates were prepared through the Federal-State Cooperative for Population Estimates. Table prepared by the Library of Michigan.

The "Estimate Base" differs from the census count due to (1) boundary changes between January 1, 2000 and January 1, 2007, as reported in the Boundary and Annexation Survey; (2) census corrections made through the Count Question Resolution program; and (3) other geographic corrections made by the Census Bureau.

The Census Bureau's population estimates are sometimes referred to as "mid-year" or "July" estimates. However, they do not reflect seasonal population movements. The estimate for 2000 reflects one-quarter year of population change relative to the April 2000 estimate base, and each subsequent estimate reflects one year of population change relative to the prior estimate.

"n.a." indicates that a cell is not applicable because a geographic unit did not exist in the 2000 Census or because it disincorporated after the 2000 Census.

Douglas village in Allegan County became The City of Douglas Village on 12/13/04. Although the Census Bureau refers to it appropriately as "Douglas city," it is omitted from summary level 061 and its population is included in Saugatuck township as if it were still a village.
