How To Effectively Interpret Information Found On A Driving Record

September 2015
The Master Driving Record

The Master Driving Record (MDR) file established by Michigan law contains information for individuals licensed in Michigan, unlicensed drivers, and out-of-state licensed drivers convicted of traffic violations in Michigan. The MDR is compiled of information submitted by the Secretary of State branch offices, internal units, courts, police agencies, other states, and the Department of Community Health.

The MDR has two components: the driver license header and the driving history.

The driver license header appears first on the MDR and contains an individual’s driver license number, full name, date of birth, address, eye color, height, weight, sex, and most recent application information. It may also contain special restrictions, aliases, previous names, endorsements, and a mailing address.

The driving history appears below the header and includes convictions for traffic violations, Failure to Appear in Court (FAC) and Failure to Comply with Judgment (FCJ) suspensions, accidents, and licensing actions such as mandatory suspensions, revocations, denials, and restrictions of driving privileges.

The type of information displayed in the driver license header and driving history depends on the type of inquiry used to obtain a driver’s information.

There are 3 types of driving records available for purchase:

- **Certified Complete Record** – This is the most complete record a customer can purchase, often purchased by the customer at the request of an attorney for a court appearance or for an administrative hearing.

- **Certified Edited Record** – This is usually purchased by customers who need to provide a record for an employer.

- **Certified CDL Edited Record** – This is purchased by customers who need to provide an employer with proof they’ve complied with federal Commercial Driver License requirements. See Appendix D for additional information.

SAMPLE DRIVING RECORD

The key on the next page explains information shown in the sample driving record below. Driving records are generated through mainframe inquiries, but not all inquiries will display the information in this sample.

Key to Sample Driving Record

1. This line shows the source (“SOS” for Secretary of State), date, time, and IP address for the computer that generated the driving record.

2. BOS/BAM message – Some mainframe records are “owned” by BOS/Legacy. Transactions for these records can only be processed using the BOS program.

3. The customer’s driver license number is shown. The full name and residence address are below. The mailing address, if present, is shown below the residence address.

4. This line shows the customer’s date of birth, sex, height, weight, and eye color on the first line. IMAGE indicates the record is associated with a digital photo or signature.

5. This line displays the license application code, license type code (including endorsements and CDL group), most recent license issue date, and license expiration date respectively. Refer to the following acronyms that may appear here:

<table>

6. VOTER indicates the customer is registered to vote (this will be blank if the customer is not registered). The asterisks mean the customer either has a verified Social Security number on file or the customer presented proof of ineligibility when the most recent driver license was applied for. CORRECTIVE LENS is a restriction that means the customer must wear glasses or contacts when driving.

7. US indicates the customer is a US citizen. LT shows for customers who have limited term legal presence (such as foreign students) and NC for customers who are non-citizen immigrants. Legal presence information is only displayed if present on the record. Also, previous names are shown below the legal presence status.

8. This area lists the number of drug and alcohol violations the customer has on record (purchased edited records do not display this information).

9. This area is the driving history. The sample record shows one traffic citation (DISOBEYED TRAFFIC CONTROL DEVICE) with a conviction date of 03/23/2014 (shown on the left). The citation was issued 1/24/2014 (shown on the right). The sample record shows one traffic accident which occurred on 9/13/2014. 060-7000 indicates the accident report number and MSP (Michigan State Police) is the law enforcement agency that supplied the report. 2 vehicles were involved in the accident with no injuries or fatalities listed. V00 is an accident code indicating the driver was not given a citation for the accident. X4 means the driver had not been drinking. PA means a passenger vehicle was involved in the accident. A list of Accident Codes is shown in Appendix B. A list of vehicle types is shown in Appendix C.

10. The license status is shown on some inquiries after the driving history. This sample shows the customer has a valid license and is eligible to drive. The legal notice at the bottom of the page cites the law under which the driving record was produced. It is printed at the end of all certified driving records.
DRIVING HISTORY ENTRIES

The following is a list of actions such as traffic convictions, suspensions, revocations, and other mandatory actions shown on driving records.

</tr>
</tbody>
</table>

**Comment:** V07 is an accident code that means the driver was, in the officer’s opinion, improperly passing and that behavior may have caused the accident. X3 means alcohol was involved in the accident. PA indicates a passenger vehicle was being driven. A list of accident codes can be found in Appendix B.

**Comment:** If a customer is eligible for and passes a BDIC, the ticket information will no longer be displayed on certain driving records. A master driving record will still display the ticket but no points will be listed. In the above example the driver was cited on 9/19/2014, the conviction date was 11/16/2014, a BDIC eligibility letter was mailed to the customer on 11/18/2014, and the customer completed a BDIC course on 01/20/2015.

Comments: Activity that occurred on 4/26/2008 — such as a traffic citation — extended the driver’s probationary period. Michigan drivers are on probation for a minimum of 3 years beginning when they first obtain a license. Drivers must complete the last ten months of probation with no unsafe driving events, such as traffic convictions, at-fault crashes, or suspensions. If an unsafe driving event occurs in the last ten months of probation, the probationary period is extended until the driver completes ten consecutive months without an incident.

*These codes are now obsolete but may be seen on older driving records.
APPENDIX D: CDL EDITED RECORD

The Certified CDL Edited Record can be purchased by customers who have a Commercial Driver License (CDL) and need to provide an employer with proof they’ve complied with federal requirements regarding CDLs. The record displays the following:

1. **Driving Type**: Customers with a CDL must certify to 1 of 4 driving types – the sample record shows the customer certified to non-excepted interstate driving.

2. **Medical Certification Status**: This is only displayed if the driving type is shown as non-excepted interstate. CERTIFIED means the customer’s medical certificate is valid (unexpired). NOT CERTIFIED would mean the medical card information on the record is expired.

3. **Medical Certificate Information**: The area displays information from the medical certificate submitted by the customer, including the certificate issue date, expiration date, and medical examiner’s information. Note that medical certificates can be issued for a maximum of two years. LICENSE NUMBER is the medical care provider’s state medical license number. REGISTRY NUMBER is assigned to the medical care provider by the Federal Motor Carrier Safety Administration.
