

Superhero Cape

Create a child-sized superhero cape with no sewing. Use materials from around the house to make this project virtually free!

What you need:

- One large t-shirt (use one from around the house or buy new)
- Velcro and hot glue gun (optional)

What you do:

- Lay out one large t-shirt
- Cut off the sleeves
- Cut up the side seams and lay the shirt open
- Cut out the shape of a cape, being careful to keep the neck hole in tact. Also cut off some of the bottom if the shirt is too long for the child.
- If you would like the cape to be detachable so as to avoid any possibility of a choking hazard continue with the following steps:
- Cut the neck hole to the size you would like, and hot glue Velcro to the ends of the cut that was just made.

Congratulations! Your child now has a superhero cape to make them feel like a real superhero right at home.
