**Subject:** docket#15-AP-03

Dear Commissioners,

We have received the public comments for annexation request docket#15-AP-03. After examining the comments, we are writing a rebuttal to address the most frequent concern that were mentioned by the public.

The concern we would like to address is the increase of traffic on Baldwin road due to service entrance for the assisted living. We understand the residents' concerns in regards to increased traffic and property values and have plans to eliminate an entrance on Baldwin Road. Therefore there will be entrances only off of M-24, which is a four lane highway. The area on Baldwin road will be revitalized with new landscaping and tree planting. This will also reduce the light that comes into the residential area and address another concern that residents have of parking lot lighting.

We just want to reiterate that this development will bring professional jobs for Nurses, Physical Therapists, Occupational Therapists, and Social Workers. Also Home Health and Hospice Care will be provided in the assisted living which will bring economic growth to the area.

Sincerely,

Zahir Haque
