ABSTRACT

The newspaper resources available at the Library of Michigan are vast, one of the largest backfiles of Michigan newspapers in the country. This collection is largely unindexed. This guide identifies aids to accessing the content of some of the newspapers in the Library's microfilm collection. The newspaper film is organized by city of publication and title of paper.

Selected articles related to Michigan were clipped for the Vertical File until about 1989. These items are filed by subject on the 2nd floor of the Library of Michigan.

A few papers are available via the Library's CD network. Most notably the *Detroit Free Press* is searchable there from 1988-2001. The *Detroit News* is available on the network from 1993 to the present (with a one month delay). Both offer full text of the articles indexed. They do not contain photos, advertising or classified ads.

See our other Guides for information on additional electronic newspaper media.
