| | |
|------------------------------|--|
| ENGINE | 2.5L (151.4CID) 74 SAE Gross hp, Kohler KDI 2504 TCR engine, centrifugal dry type dual stage air cleaner. Fuel filter with water separator; 1000 CCA battery; variable speed hydraulically driven fan. |
| TRANSMISSION | EH (Electo-Hydraulic) Controls with hydrostatic transmission. Travel Speeds of 0 to 7.5 mph in both forward and reverse. Standard Creep speed provides operation from 0 - 1/2 of full speed for special applications. An optional two speed transmission is available providing a low range of 0 - 7.5 mph and a high range of 0 - 11.5 mph. |
| TIRES: FRONT AND REAR | 10 x 16.5 8 ply, Heavy Duty WIDE TRACK JCB Tires providing 63" width. |
| BRAKES | Machine braking provided through the hydrostatic transmission. Parking brake consists of multiple disc, oil immersed, spring applied hydraulic release that provides a fail safe with the engine off. Electrically activated through a switch on the instrument panel or by raising seat bar. |
| ELECTRICAL | Meets IP69 (external) IP67 (internal) water ingress standard. Worklights, 2 Front and 1 Rear, Reverse Alarm, Horn, and 12V Accessory Socket. |
| INSTRUMENTS | Audible and visual warning systems, right and left side mounted instrument panels. Standard electronic throttle control with optional foot throttle. |
| CAB OR CANOPY | SAE certified ROPS/FOPS, left side entry. Vinyl seat with seatbelt and operator restraint interlock for drive and loader functions. Cab units are pressurized and available with heat or heat and A/C, sliding left window and full side door. Right Hand glass as standard on canopy and cabs. |
| HYDRAULICS | 18.5gpm @ 3335psi standard flow. Optional 30gpm @ 3335psi available. |
| LOADER | Rated Operating Capacity of 2150 lbs, Vertical Lift Loader Design provides vertical lift path and increased reach at full lift vs. Radial Lift Designs. Auxiliary circuit is standard for operation of hydraulic powered attachments. Choice of Standard Mechanical or Optional Powered Quick Hitch. Hydraulic Float standard on all models. Loader Options include: Parallel Lift in raise only and SRS (smooth ride system). |
| SERVICEABILITY | Cab tilts forward to provide further access to the hydraulic components. Rear door provides class leading access to engine bay and daily maintenance and check points. |

| STANDARD EQUIPMENT | INDEX |
|---------------------------|-----------------------|

| | |
|------------------------------|--|
| ENGINE | 4.4L (268CID) 74 SAE Gross hp, JCB Ecomax engine, centrifugal dry type dual stage air cleaner; Fuel filter with water separator; 1000 CCA battery; variable speed hydraulically driven fan. |
| TRANSMISSION | EH (Electo-Hydraulic) Controls with hydrostatic transmission. Standard Creep speed provides operation from 0 - 1/2 of full speed for special applications. An optional two speed transmission is available providing a low range of 0 - 6.8 mph and a high range of 0 - 12.4 mph |
| TIRES: FRONT AND REAR | 12 x 16.5 10 ply, Heavy Duty JCB Tires providing 67.9" width. |
| BRAKES | Machine braking provided through the hydrostatic transmission. Parking brake consists of multiple disc, oil immersed, spring applied hydraulic release that provides a fail safe with the engine off. Electrically activated through a switch on the instrument panel or by raising seat bar. |
| ELECTRICAL | Meets IP69 water ingress standard. Worklights, 2 Front and 1 Rear, Reverse Alarm, Horn, and 12V Accessory Socket. |
| INSTRUMENTS | Audible and visual warning systems, right and left side mounted instrument panels. Standard electronic throttle control with optional foot throttle. |
| CAB OR CANOPY | SAE certified ROPS/FOPS, left side entry. Vinyl seat with retractable seatbelt and operator restraint interlock for drive and loader functions. Cab units are pressurized and available with heat or heat and A/C, sliding left window and full side door. Right Hand glass standard on canopy and cab builds. |
| HYDRAULICS | 24gpm @ 3335psi standard flow. Optional 33gpm @ 3335psi available. |
| LOADER | Rated Operating Capacity of 2225 lbs, Radial Lift Loader Design provides for maximum loader lift breakout force for superior digging performance. Auxiliary circuit is standard for operation of hydraulic powered attachments. Choice of Standard Mechanical or Optional Electric Quick Hitch. Hydraulic Float standard on all models. Loader Options include: Parallel Lift in raise only, SRS (smooth ride system), left hand auxiliary pipework. |
| SERVICEABILITY | Cab tilts forward to provide further access to the hydraulic components. Rear door provides class leading access to engine bay and daily maintenance and check points. |

STANDARD EQUIPMENT

[INDEX](#)

| | |
|------------------------------|--|
| ENGINE | 4.4L (268CID) 74 SAE Gross hp, JCB Ecomax engine, centrifugal dry type dual stage air cleaner; Fuel filter with water separator; 1000 CCA battery; variable speed hydraulically driven fan. |
| TRANSMISSION | EH (Electo-Hydraulic) Controls with hydrostatic transmission. Travel Speeds of 0 to 13.5 mph in both forward and reverse are obtained with standard two (2) speed transmission with a low range of 0 - 7.3 mph and a high range of 0 - 13.5 mph. Standard Creep Speed provides operation from 0 - 1/2 of full speed for special applications. |
| TIRES: FRONT AND REAR | 14 x 17.5 12 ply, Heavy Duty WIDE TRACK JCB Tires providing 73" width. |
| BRAKES | Machine braking provided through the hydrostatic transmission. Parking brake consists of multiple disc, oil immersed, spring applied hydraulic release that provides a fail safe with the engine off. Electrically activated through a switch on the instrument panel or by raising seat bar. |
| ELECTRICAL | Meets IP69 (external) IP67 (internal) water ingress standard. Worklights, 2 Front and 1 Rear, Reverse Alarm, Horn, and 12V Accessory Socket. |
| INSTRUMENTS | Audible and visual warning systems, right and left side mounted instrument panels. Standard electronic throttle control with optional foot throttle. |
| CAB OR CANOPY | SAE certified ROPS/FOPS, left side entry. Vinyl mechanical suspension seat with seatbelt and operator restraint interlock for drive and loader functions. Cab units are pressurized and available with heat or heat and A/C, sliding left window and full side door. Right Hand glass standard on canopy and cab builds. |
| HYDRAULICS | 24gpm @ 3335psi standard flow. Optional 33gpm @ 3335psi available. |
| LOADER | Rated Operating Capacity of 3300 lbs, Vertical Lift Loader Design provides vertical lift path and increased reach at full lift vs. Radial Lift Designs. Auxiliary circuit is standard for operation of hydraulic powered attachments. Choice of Standard Mechanical or Optional Electric Quick Hitch. Hydraulic Float standard on all models. Loader Options include: Parallel Lift in raise only, SRS (smooth ride system), left hand auxiliary pipework. |
| SERVICEABILITY | Cab tilts forward to provide further access to the hydraulic components. Rear door provides class leading access to engine bay and daily maintenance and check points. |

STANDARD EQUIPMENT

[INDEX](#)

| | |
|-----------------------|--|
| Engine | 1.9L (113.5CID) 56 SAE Gross hp, Kohler KDI 1903 TCR engine, centrifugal dry type dual stage air cleaner. Fuel filter with water separator; 1000 CCA battery; variable speed hydraulically driven fan. |
| Transmission | EH (Electo-Hydraulic) Controls with hydrostatic transmission. Travel Speeds of 0 to 5.6 mph in both forward and reverse. Standard Creep Speed provides operation from 0 to 50% of full speed for special applications. An optional two (2) speed transmission is available providing a low range of 0 - 5.6 mph and a high |
| Rubber Tracks: | Fitted with 12.6" (320mm) wide tracks provide a machine with of 66" and a ground bearing pressure of 6.75 psi. |
| Brakes | Machine braking provided through the hydrostatic transmission. Parking brake consists of multiple disc, oil immersed, spring applied hydraulic release that provides a fail safe with engine off. Electrically activated through a switch on the instrument panel or by raising seat bar. |
| Electrical | Meets IP69 water ingress standard. Worklights, 2 Front and 1 Rear, Reverse Alarm, Horn, and 12V Accessory Socket. |
| Instruments | Audible and visual warning systems, right and left side mounted instrument panels. Standard electronic throttle control with optional foot throttle. |
| Cab or Canopy | SAE certified ROPS/FOPS, left side entry. Mechanical vinyl suspension seat with retractable seatbelt and operator restraint interlock for drive and loader functions. Cab units are pressurized and available with heat or heat and A/C, sliding left window, and full side door. Right Hand glass as standard on canopy and cab builds. |
| Hydraulics | 18.5gpm @ 3335psi standard flow. Optional 26.4gpm @ 3335psi available. |
| Loader | Rated Operating Capacity of 1500 lbs, Radial Lift Loader Design provides for maximum loader lift breakout force for superior digging performance. Auxiliary circuit is standard for operation of hydraulic powered attachments. Choice of Standard Mechanical or Optional Powered Quick Hitch. Hydraulic float standard on all models. Loader options include: Parallel Lift in raise only and SRS (smooth ride system). |
| Serviceability | Cab tilts forward to provide further access to the hydraulic components. Rear door provides class leading access to engine bay and daily maintenacne and check points. |

STANDARD EQUIPMENT

[INDEX](#)

| | |
|-----------------------|---|
| ENGINE | 2.5L (151.4CID) 74 SAE Gross hp, Kohler KDI 2504 TCR engine, centrifugal dry type dual stage air cleaner. Fuel filter with water separator; 1000 CCA battery; variable speed hydraulically driven fan. |
| TRANSMISSION | EH (Electo-Hydraulic) Controls with hydrostatic transmission. Travel Speeds of 0 to 5.6 mph in both forward and reverse. Standard Creep speed provides operation from 0 to 1/2 of full speed for special applications. An optional two (2) speed transmission is available providing a low range of 0 - 5.6 mph and a high range of 0 - 7.8 mph |
| RUBBER TRACKS | Fitted with 12.6" (320mm) wide tracks provide a machine with of 66" and a ground bearing pressure of 6.2 psi. |
| BRAKES | Machine braking provided through the hydrostatic transmission. Parking brake consists of multiple disc, oil immersed, spring applied hydraulic release that provides a fail safe with the engine off. Electrically activated through a switch on the instrument panel or by raising seat bar. |
| ELECTRICAL | Meets IP69 (external) IP67 (internal) water ingress standard. Worklights, 2 Front and 1 Rear, Reverse Alarm, Horn, and 12V Accessory Socket. |
| INSTRUMENTS | Audible and visual warning systems, right and left side mounted instrument panels. Standard electronic throttle control with optional foot throttle. |
| CAB OR CANOPY | SAE certified ROPS/FOPS, left side entry. Mechanical vinyl suspension seat with seatbelt and operator restraint interlock for drive and loader functions. Cab units are pressurized and available with heat or heat and A/C, sliding left window and full side door. Right Hand glass as standard on canopy and cab builds. |
| HYDRAULICS | 18.5gpm @ 3335psi standard flow. Optional 30 gpm @ 3335psi available. |
| LOADER | Rated Operating Capacity of 1900 lbs, Radial Lift Loader Design provides radial lift path and increased reach mid range lift path. Auxiliary circuit is standard for operation of hydraulic powered attachments. Choice of Standard Mechanical or Optional Powered Quick Hitch. Hydraulic Float standard on all models. Loader Options include: Parallel Lift in raise only and SRS (smooth ride system). |
| SERVICEABILITY | Cab tilts forward to provide further access to the hydraulic components. Rear door provides access to engine bay and daily maintenance and check points. |

STANDARD EQUIPMENT

[INDEX](#)

| | |
|-----------------------|--|
| ENGINE | 2.5L (151.4CID) 74 SAE Gross hp, Kohler KDI 3504 TCR engine, centrifugal dry type dual stage air cleaner. Fuel filter with water separator; 1000 CCA battery; variable speed hydraulically driven fan. |
| TRANSMISSION | EH (Electo-Hydraulic) Controls with hydrostatic transmission. Travel Speeds of 0 to 5.6 mph in both forward and reverse. Standard Creep speed provides operation from 0 to 1/2 of full speed for special applications. An optional two (2) speed transmission is available providing a low range of 0 - 5.6 mph and a high range of 0 - 7.8 mph |
| RUBBER TRACKS | Fitted with 12.6" (320mm) wide tracks provide a machine with of 66" and a ground bearing pressure of 6.5 psi. |
| BRAKES | Machine braking provided through the hydrostatic transmission. Parking brake consists of multiple disc, oil immersed, spring applied hydraulic release that provides a fail safe with the engine off. Electrically activated through a switch on the instrument panel or by raising seat bar. |
| ELECTRICAL | Meets IP69 (external) IP67 (internal) water ingress standard. Worklights, 2 Front and 1 Rear, Reverse Alarm, Horn, and 12V Accessory Socket. |
| INSTRUMENTS | Audible and visual warning systems, right and left side mounted instrument panels. Standard electronic throttle control with optional foot throttle. |
| CAB OR CANOPY | SAE certified ROPS/FOPS, left side entry. Mechanical vinyl suspension seat with seatbelt and operator restraint interlock for drive and loader functions. Cab units are pressurized and available with heat or heat and A/C, sliding left window and full side door. Right Hand glass as standard on canopy and cab builds. |
| HYDRAULICS | 18.5gpm @ 3335psi standard flow. Optional 30 gpm @ 3335psi available. |
| LOADER | Rated Operating Capacity of 2050 lbs, Vertical Lift Loader Design provides vertical lift path and increased reach at full lift vs. Radial Lift Designs. Auxiliary circuit is standard for operation of hydraulic powered attachments. Choice of Standard Mechanical or Optional Powered Quick Hitch. Hydraulic Float standard on all models. Loader Options include: Parallel Lift in raise only and SRS (smooth ride system). |
| SERVICEABILITY | Cab tilts forward to provide further access to the hydraulic components. Rear door provides access to engine bay and daily maintenance and check points. |

Standard Creep Speed provides operation from 0 to 50% of full speed for special applications. An optional two (2) speed transmission is available providing a low range of 0 - 6.8 mph and a high range of 0 - 12.4 mph. |
| Rubber Tracks: | Fitted with 15" (400mm) wide tracks provide a machine with of 73" and a ground bearing pressure of 4.8 psi. Optional 17.7" (450mm) wide tracks reduce ground bearing pressure to 4.36 psi. |
| Brakes | Machine braking provided through the hydrostatic transmission. Parking brake consists of multiple disc, oil immersed, spring applied hydraulic release that provides a fail safe with engine off. Electrically activated through a switch on the instrument panel or by raising seat bar. |
| Electrical | Meets IP69 water ingress standard. Worklights, 2 Front and 1 Rear, Reverse Alarm, Horn, and 12V Accessory Socket. |
| Instruments | Audible and visual warning systems, right and left side mounted instrument panels. Standard electronic throttle control with optional foot throttle. |
| Cab or Canopy | SAE certified ROPS/FOPS, left side entry. Mechanical vinyl suspension seat with retractable seatbelt and operator restraint interlock for drive and loader functions. Cab units are pressurized and available with heat or heat and A/C, sliding left window, and full side door. Right Hand glass standard on canopy and cab builds. |
| Hydraulics | 24gpm @ 3335psi standard flow. Optional 33gpm @ 3335psi available. |
| Loader | Rated Operating Capacity of 2550 lbs, Radial Lift Loader Design provides for maximum loader lift breakout force for superior digging performance. Auxiliary circuit is standard for operation of hydraulic powered attachments. Choice of Standard Mechanical or Optional Electric Quick Hitch. Hydraulic float standard on all models. Loader options include: Parallel Lift in raise only, SRS (smooth ride system) left hand auxiliary pipework. |
| Serviceability | Cab tilts forward to provide further access to the hydraulic components. Rear door provides class leading access to engine bay and daily maintenance and check points. |

STANDARD EQUIPMENT

[INDEX](#)

| | |
|-----------------------|--|
| ENGINE | 4.4L (268CID) 74 SAE Gross hp, JCB Ecomax engine, centrifugal dry type dual stage air cleaner. Fuel filter with water separator, 1000 CCA battery; variable speed hydraulically driven fan. |
| TRANSMISSION | EH (Electo-Hydraulic) Controls with hydrostatic transmission. Travel Speeds of 0 to 5.7 mph in both forward and reverse. Standard Creep speed provides operation from 0 to 1/2 of full speed for special applications. An optional two (2) speed transmission is available providing a low range of 0 - 4.8 mph and a high range of 0 - 7.8 mph |
| RUBBER TRACKS | Fitted with 17.7" wide tracks provide a machine width of 78" and a ground bearing pressure of 4.6 psi. |
| BRAKES | Machine braking provided through the hydrostatic transmission. Parking brake consists of multiple disc, oil immersed, spring applied hydraulic release that provides a fail safe with the engine off. Electrically activated through a switch on the instrument panel or by raising seat bar |
| ELECTRICAL | Meets IP69 (external) IP67 (internal) water ingress standard. Worklights, 2 Front and 1 Rear, Reverse Alarm, Horn, and 12V Accessory Socket. |
| INSTRUMENTS | Audible and visual warning systems, right and left side mounted instrument panels. Standard electronic throttle control with optional foot throttle. |
| CAB OR CANOPY | SAE certified ROPS/FOPS, left side entry. Mechanical vinyl suspension seat with seatbelt and operator restraint interlock for drive and loader functions. Cab units are pressurized and available with heat or heat and A/C, sliding left window and full side door. Right Hand glass standard on canopy and cab builds. |
| HYDRAULICS | 24gpm @ 3335psi standard flow. Optional 33gpm @ 3335psi available. |
| LOADER | Rated Operating Capacity of 2750 lbs, Vertical Lift Loader Design provides vertical lift path and increased reach at full lift vs. Radial Lift Designs. Auxiliary circuit is standard for operation of hydraulic powered attachments. Choice of Standard Mechanical or Optional Electric Quick Hitch. Hydraulic Float standard on all models. Loader Options include: Parallel Lift in raise only, SRS (smooth ride system), left hand auxiliary pipework. |
| SERVICEABILITY | Cab tilts forward to provide further access to the hydraulic components. Rear door provides access to engine bay and daily maintenance and check points. |

STANDARD EQUIPMENT

[INDEX](#)

| | |
|-----------------------|--|
| ENGINE | 4.4L (268CID) 74 SAE Gross hp, JCB Ecomax engine, centrifugal dry type dual stage air cleaner. Fuel filter with water separator, 1000 CCA battery; variable speed hydraulically driven fan. |
| TRANSMISSION | EH (Electo-Hydraulic) Controls with hydrostatic transmission. Travel Speeds of 0 to 5.7 mph in both forward and reverse. Standard Creep speed provides operation from 0 to 1/2 of full speed for special applications. An optional two (2) speed transmission is available providing a low range of 0 - 4.8 mph and a high range of 0 - 7.8 mph |
| RUBBER TRACKS | Fitted with 17.7" wide tracks provide a machine width of 78" and a ground bearing pressure of 4.8 psi. |
| BRAKES | Machine braking provided through the hydrostatic transmission. Parking brake consists of multiple disc, oil immersed, spring applied hydraulic release that provides a fail safe with the engine off. Electrically activated through a switch on the instrument panel or by raising seat bar. |
| ELECTRICAL | Meets IP69 (external) IP67 (internal) water ingress standard. Worklights, 2 Front and 1 Rear, Reverse Alarm, Horn, and 12V Accessory Socket. |
| INSTRUMENTS | Audible and visual warning systems, right and left side mounted instrument panels. Standard electronic throttle control with optional foot throttle. |
| CAB OR CANOPY | SAE certified ROPS/FOPS, left side entry. Mechanical vinyl suspension seat with seatbelt and operator restraint interlock for drive and loader functions. Cab units are pressurized and available with heat or heat and A/C, sliding left window and full side door. Right Hand glass standard on canopy and cab builds. |
| HYDRAULICS | 24gpm @ 3335psi standard flow. Optional 33gpm @ 3335psi available. |
| LOADER | Rated Operating Capacity of 3000 lbs, Vertical Lift Loader Design provides vertical lift path and increased reach at full lift vs. Radial Lift Designs. Auxiliary circuit is standard for operation of hydraulic powered attachments. Choice of Standard Mechanical or Optional Electric Quick Hitch. Hydraulic Float standard on all models. Loader Options include: Parallel Lift in raise only, SRS (smooth ride system), left hand auxiliary pipework. |
| SERVICEABILITY | Cab tilts forward to provide further access to the hydraulic components. Rear door provides access to engine bay and daily maintenance and check points. |

| STANDARD EQUIPMENT | INDEX |
|---------------------------|-----------------------|

| | |
|------------------------------|---|
| ENGINE | 1.9L (113.5CID) 56 SAE Gross hp, Kohler KDI 1903 TCR engine, centrifugal dry type dual stage air cleaner. Fuel filter with water separator; 1000 CCA battery; variable speed hydraulically driven fan. 110V Block Heater comes as standard to aid engine starting in cold weather environment. |
| TRANSMISSION | EH (Electro-Hydraulic) Controls with hydrostatic transmission. Selectable control pattern allows operator to choose either ISO or Dual Hand Pattern controls. Travel Speeds of 0 to 7.5 mph in both forward and reverse. Fitted as standard two (2) speed transmission delivering a high range of travel from 0 - 11.5 mph as well as creep speed providing tuning of transmission speed from 1-99% of full speed for special applications. |
| TIRES: FRONT AND REAR | 10 x 16.5 8 ply, Heavy Duty WIDE TRACK JCB Tires with twine cutter providing 63" width. |
| BRAKES | Machine braking provided through the hydrostatic transmission. Parking brake consists of multiple disc, oil immersed, spring applied hydraulic release that provides a fail safe with the engine off. Electrically activated through a switch on the instrument panel or by raising seat bar. |
| ELECTRICAL | Meets IP69 (external) IP67 (internal) water ingress standard. Worklights, 2 Front and 1 Rear, Reverse Alarm, Horn, Radio and 12V Accessory Socket. |

STANDARD EQUIPMENT

[INDEX](#)

| | |
|-----------------------|--|
| ENGINE | 4.4L (268CID) 74 SAE Gross hp, JCB Ecomax engine, centrifugal dry type dual stage air cleaner. Fuel filter with water separator, 1000 CCA battery; variable speed hydraulically driven fan. |
| TRANSMISSION | EH (Electo-Hydraulic) Controls with hydrostatic transmission. Travel Speeds of 0 to 5.7 mph in both forward and reverse. Standard Creep speed provides operation from 0 to 1/2 of full speed for special applications. Two (2) speed transmission is available providing a low range of 0 - 4.8 mph and a high range of 0 - 7.8 mph |
| RUBBER TRACKS | Fitted with 17.7" wide tracks provide a machine width of 78" and a ground bearing pressure of 4.6 psi. |
| BRAKES | Machine braking provided through the hydrostatic transmission. Parking brake consists of multiple disc, oil immersed, spring applied hydraulic release that provides a fail safe with the engine off. Electrically activated through a switch on the instrument panel or by raising seat bar |
| ELECTRICAL | Meets IP69 (external) IP67 (internal) water ingress standard. Worklights, 2 Front and 1 Rear, Reverse Alarm, Horn, and 12V Accessory Socket. |
| INSTRUMENTS | Audible and visual warning systems, right and left side mounted instrument panels. Standard electronic throttle control with optional foot throttle. |
| CAB | SAE certified ROPS/FOPS, left side entry. Mechanical vinyl suspension seat with seatbelt and operator restraint interlock for drive and loader functions. Cab units are pressurized and available with heat or heat and A/C, sliding left window and full side door. Right Hand glass standard on canopy and cab builds. |
| HYDRAULICS | 24gpm @ 3335psi standard flow. Optional 33gpm @ 3335psi available. |
| LOADER | Rated Operating Capacity of 2600 lbs, Vertical Lift Loader Design provides vertical lift path and increased reach at full lift vs. Radial Lift Designs. Auxiliary circuit is standard for operation of hydraulic powered attachments. Choice of Standard Mechanical or Optional Electric Quick Hitch. Hydraulic Float standard on all models. Loader Options include: Parallel Lift in raise only, SRS (smooth ride system), left hand auxiliary pipework. |
| SERVICEABILITY | Cab tilts forward to provide further access to the hydraulic components. Rear door provides access to engine bay and daily maintenance and check points. |

STANDARD EQUIPMENT

[INDEX](#)

| | |
|-----------------------|--|
| ENGINE | 4.4L (268CID) 74 SAE Gross hp, JCB Ecomax engine, centrifugal dry type dual stage air cleaner. Fuel filter with water separator, 1000 CCA battery; variable speed hydraulically driven fan. |
| TRANSMISSION | EH (Electo-Hydraulic) Controls with hydrostatic transmission. Travel Speeds of 0 to 5.7 mph in both forward and reverse. Standard Creep speed provides operation from 0 to 1/2 of full speed for special applications. An optional two (2) speed transmission is available providing a low range of 0 - 4.8 mph and a high range of 0 - 7.8 mph |
| RUBBER TRACKS | Fitted with 17.7" wide tracks provide a machine width of 78" and a ground bearing pressure of 4.8 psi. |
| BRAKES | Machine braking provided through the hydrostatic transmission. Parking brake consists of multiple disc, oil immersed, spring applied hydraulic release that provides a fail safe with the engine off. Electrically activated through a switch on the instrument panel or by raising seat bar. |
| ELECTRICAL | Meets IP69 (external) IP67 (internal) water ingress standard. Worklights, 2 Front and 1 Rear, Reverse Alarm, Horn, and 12V Accessory Socket. |
| INSTRUMENTS | Audible and visual warning systems, right and left side mounted instrument panels. Standard electronic throttle control with optional foot throttle. |
| CAB OR CANOPY | SAE certified ROPS/FOPS, left side entry. Mechanical vinyl suspension seat with seatbelt and operator restraint interlock for drive and loader functions. Cab units are pressurized and available with heat or heat and A/C, sliding left window and full side door. Right Hand glass standard on canopy and cab builds. |
| HYDRAULICS | 33gpm @ 3335psi. |
| LOADER | Rated Operating Capacity of 3250 lbs, Vertical Lift Loader design provides vertical lift path and increased reach at full lift vs. Radial Lift Designs. Auxiliary circuit is standard for operation of hydraulic powered attachments. Standard Mechanical Quick Hitch. Hydraulic Float standard on all models. |
| RECOVERY WINCH | 6.0 cubic - inch motor with a pulling capacity up to 15,000 lbf. Hardened steel two-stage planetary geardrive with 36:1 reduction providing a top line speed of 27.3 feet per minute. 75 feet of 1/2" diameter wire cable. Unit swings out for access to daily service checks. (NOTE - Recovery winch 881G111 must be included when 325T Forestmaster 8668 is ordered) |
| SERVICEABILITY | Cab tilts forward to provide further access to the hydraulic components. Rear door provides access to engine bay and daily maintenance and check points. |

STANDARD CONTRACT TERMS

This STANDARD CONTRACT (“**Contract**”) is agreed to between the State of Michigan (the “**State**”) and AIS Construction Equipment (“**Contractor**”), a Michigan Corporation. This Contract is effective on January 13, 2017 (“**Effective Date**”), and unless terminated, expires on January 12, 2021.

This Contract may be renewed for up to two (2) additional one (1) year period(s). Renewal is at the sole discretion of the State and will automatically extend the Term of this Contract. The State will document its exercise of renewal options via Contract Change Notice.

The parties agree as follows:

- 1. Duties of Contractor.** Contractor must perform the services and provide the deliverables described in **Schedule A – Statement of Work** (the “**Contract Activities**”). An obligation to provide delivery of any commodity is considered a service and is a Contract Activity.

Contractor must furnish all labor, equipment, materials, and supplies necessary for the performance of the Contract Activities, and meet operational standards, unless otherwise specified in Schedule A.

Contractor must: (a) perform the Contract Activities in a timely, professional, safe, and workmanlike manner consistent with standards in the trade, profession, or industry; (b) meet or exceed the performance and operational standards, and specifications of the Contract; (c) provide all Contract Activities in good quality, with no material defects; (d) not interfere with the State’s operations; (e) obtain and maintain all necessary licenses, permits or other authorizations necessary for the performance of the Contract; (f) cooperate with the State, including the State’s quality assurance personnel, and any third party to achieve the objectives of the Contract; (g) return to the State any State-furnished equipment or other resources in the same condition as when provided when no longer required for the Contract; (h) not make any media releases without prior written authorization from the State; (i) assign to the State any claims resulting from state or federal antitrust violations to the extent that those violations concern materials or services supplied by third parties toward fulfillment of the Contract; (j) comply with all State physical and IT security policies and standards which will be made available upon request; and (k) provide the State priority in performance of the Contract except as mandated by federal disaster response requirements. Any breach under this paragraph is considered a material breach.

Contractor must also be clearly identifiable while on State property by wearing identification issued by the State, and clearly identify themselves whenever making contact with the State.

- 2. Notices.** All notices and other communications required or permitted under this Contract must be in writing and will be considered given and received: (a) when verified by written receipt if sent by courier; (b) when actually received if sent by mail without verification of receipt; or (c) when verified by automated receipt or electronic logs if sent by facsimile or email.

| State: Scott Poyer poyers@michigan.gov (517) 284-6448 | Contractor: Jeff Ely 3600 N. Grand River Lansing, MI 48906 jely@aisequip.com (517) 204-2127 |
|--|---|

5. **Performance Guarantee.** Contractor must at all times have financial resources sufficient, in the opinion of the State, to ensure performance of the Contract and must provide proof upon request. The State may require a performance bond (as specified in Schedule A) if, in the opinion of the State, it will ensure performance of the Contract.
6. **Insurance Requirements.** Contractor must maintain the insurances identified below and is responsible for all deductibles. All required insurance must: (a) protect the State from claims that may arise out of, are alleged to arise out of, or result from Contractor's or a subcontractor's performance; (b) be primary and non-contributing to any comparable liability insurance (including self-insurance) carried by the State; and (c) be provided by a company with an A.M. Best rating of "A" or better, and a financial size of VII or better.

If any of the required policies provide **claims-made** coverage, the Contractor must: (a) provide coverage with a retroactive date before the effective date of the contract or the beginning of Contract Activities; (b) maintain coverage and provide evidence of coverage for at least three (3) years after completion of the Contract Activities; and (c) if coverage is canceled or not renewed, and not replaced with another claims-made policy form with a retroactive date prior to the contract effective date, Contractor must purchase extended reporting coverage for a minimum of three (3) years after completion of work.

Contractor must: (a) provide insurance certificates to the Contract Administrator, containing the agreement or purchase order number, at Contract formation and within 20 calendar days of the expiration date of the applicable policies; (b) require that subcontractors maintain the required insurances contained in this Section; (c) notify the Contract Administrator within 5 business days if any insurance is cancelled; and (d) waive all rights against the State for damages covered by insurance. Failure to maintain the required insurance does not limit this waiver.

This Section is not intended to and is not be construed in any manner as waiving, restricting or limiting the liability of either party for any obligations under this Contract (including any provisions hereof requiring Contractor to indemnify, defend and hold harmless the State).

7. **Administrative Fee and Reporting.** Contractor must pay an administrative fee of 2% on all payments made to Contractor under the Contract including transactions with the State (including its departments, divisions, agencies, offices, and commissions), MiDEAL members, and other states (including governmental subdivisions and authorized entities). Administrative fee payments must be made by check payable to the State of Michigan and mailed to:

Department of Technology, Management and Budget
Cashiering
P.O. Box 30681
Lansing, MI 48909

Contractor must submit an itemized purchasing activity report, which includes at a minimum, the name of the purchasing entity and the total dollar volume in sales. Reports should be mailed to DTMB-Procurement.

The administrative fee and purchasing activity report are due within 30 calendar days from the last day of each calendar quarter.

8. **Extended Purchasing Program.** This contract is extended to MiDEAL members. MiDEAL members include local units of government, school districts, universities, community colleges, and nonprofit hospitals. A current list of MiDEAL members is available at www.michigan.gov/mideal. Upon written agreement between the State and Contractor, this contract may also be extended to: (a) State of Michigan employees and (b) other states (including governmental subdivisions and authorized entities).

If extended, Contractor must supply all Contract Activities at the established Contract prices and terms. The State reserves the right to impose an administrative fee and negotiate additional discounts based on any increased volume generated by such extensions.

Contractor must submit invoices to, and receive payment from, extended purchasing program members on a direct and individual basis.

9. **Independent Contractor.** Contractor is an independent contractor and assumes all rights, obligations and liabilities set forth in this Contract. Contractor, its employees, and agents will not be considered employees of the State. No partnership or joint venture relationship is created by virtue of this Contract. Contractor, and not the State, is responsible for the payment of wages, benefits and taxes of Contractor's employees and any subcontractors. Prior performance does not modify Contractor's status as an independent contractor.
10. **Subcontracting.** Contractor may not delegate any of its obligations under the Contract without the prior written approval of the State. Contractor must notify the State at least 90 calendar days before the proposed delegation, and provide the State any information it requests to determine whether the delegation is in its best interest. If approved, Contractor must: (a) be the sole point of contact regarding all contractual matters, including payment and charges for all Contract Activities; (b) make all payments to the subcontractor; and (c) incorporate the terms and conditions contained in this Contract in any subcontract with a subcontractor. Contractor remains responsible for the completion of the Contract Activities, compliance with the terms of this Contract, and the acts and omissions of the subcontractor. The State, in its sole discretion, may require the replacement of any subcontractor.
11. **Staffing.** The State's Contract Administrator may require Contractor to remove or reassign personnel by providing a notice to Contractor.
12. **Background Checks.** Upon request, Contractor must perform background checks on all employees and subcontractors and its employees prior to their assignment. The scope is at the discretion of the State and documentation must be provided as requested. Contractor is responsible for all costs associated with the requested background checks. The State, in its sole discretion, may also perform background checks.
13. **Assignment.** Contractor may not assign this Contract to any other party without the prior approval of the State. Upon notice to Contractor, the State, in its sole discretion, may assign in whole or in part, its rights or responsibilities under this Contract to any other party. If the State determines that a novation of the Contract to a third party is necessary, Contractor will agree to the novation and provide all necessary documentation and signatures.
14. **Change of Control.** Contractor will notify, at least 90 calendar days before the effective date, the State of a change in Contractor's organizational structure or ownership. For purposes of this Contract, a change in control means any of the following: (a) a sale of more than 50% of Contractor's stock; (b) a sale of substantially all of Contractor's assets; (c) a change in a majority of Contractor's board members; (d) consummation of a merger or consolidation of Contractor with any other entity; (e) a change in ownership through a transaction or series of transactions; (f) or the board (or the stockholders) approves a plan of complete liquidation. A change of control does not include any consolidation or merger effected exclusively to change the domicile of Contractor, or any transaction or series of transactions principally for bona fide equity financing purposes.

In the event of a change of control, Contractor must require the successor to assume this Contract and all of its obligations under this Contract.
15. **Ordering.** Contractor is not authorized to begin performance until receipt of authorization as identified in Schedule A.
16. **Acceptance.** Contract Activities are subject to inspection and testing by the State within 30 calendar days of the State's receipt of them ("**State Review Period**"), unless otherwise provided in Schedule A. If the Contract Activities are not fully accepted by the State, the State will notify Contractor by the end of the State Review Period that either: (a) the Contract Activities are accepted, but noted deficiencies must be corrected; or (b) the Contract Activities are rejected. If the State finds material deficiencies, it may: (i)

reject the Contract Activities without performing any further inspections; (ii) demand performance at no additional cost; or (iii) terminate this Contract in accordance with Section 23, Termination for Cause.

Within 10 business days from the date of Contractor's receipt of notification of acceptance with deficiencies or rejection of any Contract Activities, Contractor must cure, at no additional cost, the deficiency and deliver unequivocally acceptable Contract Activities to the State. If acceptance with deficiencies or rejection of the Contract Activities impacts the content or delivery of other non-completed Contract Activities, the parties' respective Program Managers must determine an agreed to number of days for re-submission that minimizes the overall impact to the Contract. However, nothing herein affects, alters, or relieves Contractor of its obligations to correct deficiencies in accordance with the time response standards set forth in this Contract.

If Contractor is unable or refuses to correct the deficiency within the time response standards set forth in this Contract, the State may cancel the order in whole or in part. The State, or a third party identified by the State, may perform the Contract Activities and recover the difference between the cost to cure and the Contract price plus an additional 10% administrative fee.

17. **Delivery.** Contractor must deliver all Contract Activities F.O.B. destination, within the State premises with transportation and handling charges paid by Contractor, unless otherwise specified in Schedule A. All containers and packaging becomes the State's exclusive property upon acceptance.
18. **Risk of Loss and Title.** Until final acceptance, title and risk of loss or damage to Contract Activities remains with Contractor. Contractor is responsible for filing, processing, and collecting all damage claims. The State will record and report to Contractor any evidence of visible damage. If the State rejects the Contract Activities, Contractor must remove them from the premises within 10 calendar days after notification of rejection. The risk of loss of rejected or non-conforming Contract Activities remains with Contractor. Rejected Contract Activities not removed by Contractor within 10 calendar days will be deemed abandoned by Contractor, and the State will have the right to dispose of it as its own property. Contractor must reimburse the State for costs and expenses incurred in storing or effecting removal or disposition of rejected Contract Activities.
19. **Warranty Period.** The warranty period, if applicable, for Contract Activities is a fixed period commencing on the date specified in Schedule A. If the Contract Activities do not function as warranted during the warranty period the State may return such non-conforming Contract Activities to the Contractor for a full refund.
20. **Terms of Payment.** Invoices must conform to the requirements communicated from time-to-time by the State. All undisputed amounts are payable within 45 days of the State's receipt. Contractor may only charge for Contract Activities performed as specified in Schedule A. Invoices must include an itemized statement of all charges. The State is exempt from State sales tax for direct purchases and may be exempt from federal excise tax, if Services purchased under this Agreement are for the State's exclusive use. Notwithstanding the foregoing, all prices are inclusive of taxes, and Contractor is responsible for all sales, use and excise taxes, and any other similar taxes, duties and charges of any kind imposed by any federal, state, or local governmental entity on any amounts payable by the State under this Contract.

The State has the right to withhold payment of any disputed amounts until the parties agree as to the validity of the disputed amount. The State will notify Contractor of any dispute within a reasonable time. Payment by the State will not constitute a waiver of any rights as to Contractor's continuing obligations, including claims for deficiencies or substandard Contract Activities. Contractor's acceptance of final payment by the State constitutes a waiver of all claims by Contractor against the State for payment under this Contract, other than those claims previously filed in writing on a timely basis and still disputed.

The State will only disburse payments under this Contract through Electronic Funds Transfer (EFT). Contractor must register with the State at <http://www.michigan.gov/cpexpress> to receive electronic fund transfer payments. If Contractor does not register, the State is not liable for failure to provide payment. Without prejudice to any other right or remedy it may have, the State reserves the right to set off at any time any amount then due and owing to it by Contractor against any amount payable by the State to Contractor under this Contract.

21. **Liquidated Damages.** Liquidated damages, if applicable, will be assessed as described in Schedule A.

22. **Stop Work Order.** The State may suspend any or all activities under the Contract at any time. The State will provide Contractor a written stop work order detailing the suspension. Contractor must comply with the stop work order upon receipt. Within 90 calendar days, or any longer period agreed to by Contractor, the State will either: (a) issue a notice authorizing Contractor to resume work, or (b) terminate the Contract or purchase order. The State will not pay for Contract Activities, Contractor's lost profits, or any additional compensation during a stop work period.

23. **Termination for Cause.** The State may terminate this Contract for cause, in whole or in part, if Contractor, as determined by the State: (a) endangers the value, integrity, or security of any location, data, or personnel; (b) becomes insolvent, petitions for bankruptcy court proceedings, or has an involuntary bankruptcy proceeding filed against it by any creditor; (c) engages in any conduct that may expose the State to liability; (d) breaches any of its material duties or obligations; or (e) fails to cure a breach within the time stated in a notice of breach. Any reference to specific breaches being material breaches within this Contract will not be construed to mean that other breaches are not material.

If the State terminates this Contract under this Section, the State will issue a termination notice specifying whether Contractor must: (a) cease performance immediately, or (b) continue to perform for a specified period. If it is later determined that Contractor was not in breach of the Contract, the termination will be deemed to have been a Termination for Convenience, effective as of the same date, and the rights and obligations of the parties will be limited to those provided in Section 24, Termination for Convenience.

The State will only pay for amounts due to Contractor for Contract Activities accepted by the State on or before the date of termination, subject to the State's right to set off any amounts owed by the Contractor for the State's reasonable costs in terminating this Contract. The Contractor must pay all reasonable costs incurred by the State in terminating this Contract for cause, including administrative costs, attorneys' fees, court costs, transition costs, and any costs the State incurs to procure the Contract Activities from other sources.

24. **Termination for Convenience.** The State may immediately terminate this Contract in whole or in part without penalty and for any reason, including but not limited to, appropriation or budget shortfalls. The termination notice will specify whether Contractor must: (a) cease performance of the Contract Activities immediately, or (b) continue to perform the Contract Activities in accordance with Section 25, Transition Responsibilities. If the State terminates this Contract for convenience, the State will pay all reasonable costs, as determined by the State, for State approved Transition Responsibilities.

25. **Transition Responsibilities.** Upon termination or expiration of this Contract for any reason, Contractor must, for a period of time specified by the State (not to exceed 120 calendar days), provide all reasonable transition assistance requested by the State, to allow for the expired or terminated portion of the Contract Activities to continue without interruption or adverse effect, and to facilitate the orderly transfer of such Contract Activities to the State or its designees. Such transition assistance may include, but is not limited to: (a) continuing to perform the Contract Activities at the established Contract rates; (b) taking all reasonable and necessary measures to transition performance of the work, including all applicable Contract Activities, training, equipment, software, leases, reports and other documentation, to the State or the State's designee; (c) taking all necessary and appropriate steps, or such other action as the State may direct, to preserve, maintain, protect, or return to the State all materials, data, property, and confidential information provided directly or indirectly to Contractor by any entity, agent, vendor, or employee of the State; (d) transferring title in and delivering to the State, at the State's discretion, all completed or partially completed deliverables prepared under this Contract as of the Contract termination date; and (e) preparing an accurate accounting from which the State and Contractor may reconcile all outstanding accounts (collectively, "**Transition Responsibilities**"). This Contract will automatically be extended through the end of the transition period.

26. **General Indemnification.** Contractor must defend, indemnify and hold the State, its departments, divisions, agencies, offices, commissions, officers, and employees harmless, without limitation, from and against any and all actions, claims, losses, liabilities, damages, costs, attorney fees, and expenses (including those required to establish the right to indemnification), arising out of or relating to: (a) any breach by Contractor (or any of Contractor's employees, agents, subcontractors, or by anyone else for whose acts any of them may be liable) of any of the promises, agreements, representations, warranties, or insurance requirements contained in this Contract; (b) any infringement, misappropriation, or other violation of any intellectual property right or other right of any third party; (c) any bodily injury, death, or damage to real or tangible personal property occurring wholly or in part due to action or inaction by

Contractor (or any of Contractor's employees, agents, subcontractors, or by anyone else for whose acts any of them may be liable); and (d) any acts or omissions of Contractor (or any of Contractor's employees, agents, subcontractors, or by anyone else for whose acts any of them may be liable).

The State will notify Contractor in writing if indemnification is sought; however, failure to do so will not relieve Contractor, except to the extent that Contractor is materially prejudiced. Contractor must, to the satisfaction of the State, demonstrate its financial ability to carry out these obligations.

The State is entitled to: (i) regular updates on proceeding status; (ii) participate in the defense of the proceeding; (iii) employ its own counsel; and to (iv) retain control of the defense if the State deems necessary. Contractor will not, without the State's written consent (not to be unreasonably withheld), settle, compromise, or consent to the entry of any judgment in or otherwise seek to terminate any claim, action, or proceeding. To the extent that any State employee, official, or law may be involved or challenged, the State may, at its own expense, control the defense of that portion of the claim.

Any litigation activity on behalf of the State, or any of its subdivisions under this Section, must be coordinated with the Department of Attorney General. An attorney designated to represent the State may not do so until approved by the Michigan Attorney General and appointed as a Special Assistant Attorney General.

27. **Infringement Remedies.** If, in either party's opinion, any piece of equipment, software, commodity, or service supplied by Contractor or its subcontractors, or its operation, use or reproduction, is likely to become the subject of a copyright, patent, trademark, or trade secret infringement claim, Contractor must, at its expense: (a) procure for the State the right to continue using the equipment, software, commodity, or service, or if this option is not reasonably available to Contractor, (b) replace or modify the same so that it becomes non-infringing; or (c) accept its return by the State with appropriate credits to the State against Contractor's charges and reimburse the State for any losses or costs incurred as a consequence of the State ceasing its use and returning it.
28. **Limitation of Liability.** The State is not liable for consequential, incidental, indirect, or special damages, regardless of the nature of the action.
29. **Disclosure of Litigation, or Other Proceeding.** Contractor must notify the State within 14 calendar days of receiving notice of any litigation, investigation, arbitration, or other proceeding (collectively, "**Proceeding**") involving Contractor, a subcontractor, or an officer or director of Contractor or subcontractor, that arises during the term of the Contract, including: (a) a criminal Proceeding; (b) a parole or probation Proceeding; (c) a Proceeding under the Sarbanes-Oxley Act; (d) a civil Proceeding involving: (1) a claim that might reasonably be expected to adversely affect Contractor's viability or financial stability; or (2) a governmental or public entity's claim or written allegation of fraud; or (e) a Proceeding involving any license that Contractor is required to possess in order to perform under this Contract.
30. **Reserved.**
31. **Reserved.**
32. **Non-Disclosure of Confidential Information.** The parties acknowledge that each party may be exposed to or acquire communication or data of the other party that is confidential, privileged communication not intended to be disclosed to third parties. The provisions of this Section survive the termination of this Contract.
 - a. **Meaning of Confidential Information.** For the purposes of this Contract, the term "**Confidential Information**" means all information and documentation of a party that: (a) has been marked "confidential" or with words of similar meaning, at the time of disclosure by such party; (b) if disclosed orally or not marked "confidential" or with words of similar meaning, was subsequently summarized in writing by the disclosing party and marked "confidential" or with words of similar meaning; and, (c) should reasonably be recognized as confidential information of the disclosing party. The term "Confidential Information" does not include any information or documentation that was: (a) subject to disclosure under the Michigan Freedom of Information Act (FOIA); (b) already in the possession of the receiving party without an obligation of confidentiality; (c) developed independently by the receiving party, as demonstrated by the receiving party, without violating the disclosing party's proprietary rights; (d) obtained from a source other than the

disclosing party without an obligation of confidentiality; or, (e) publicly available when received, or thereafter became publicly available (other than through any unauthorized disclosure by, through, or on behalf of, the receiving party). For purposes of this Contract, in all cases and for all matters, State Data is deemed to be Confidential Information.

- b. Obligation of Confidentiality. The parties agree to hold all Confidential Information in strict confidence and not to copy, reproduce, sell, transfer, or otherwise dispose of, give or disclose such Confidential Information to third parties other than employees, agents, or subcontractors of a party who have a need to know in connection with this Contract or to use such Confidential Information for any purposes whatsoever other than the performance of this Contract. The parties agree to advise and require their respective employees, agents, and subcontractors of their obligations to keep all Confidential Information confidential. Disclosure to a subcontractor is permissible where: (a) use of a subcontractor is authorized under this Contract; (b) the disclosure is necessary or otherwise naturally occurs in connection with work that is within the subcontractor's responsibilities; and (c) Contractor obligates the subcontractor in a written contract to maintain the State's Confidential Information in confidence. At the State's request, any employee of Contractor or any subcontractor may be required to execute a separate agreement to be bound by the provisions of this Section.
- c. Cooperation to Prevent Disclosure of Confidential Information. Each party must use its best efforts to assist the other party in identifying and preventing any unauthorized use or disclosure of any Confidential Information. Without limiting the foregoing, each party must advise the other party immediately in the event either party learns or has reason to believe that any person who has had access to Confidential Information has violated or intends to violate the terms of this Contract and each party will cooperate with the other party in seeking injunctive or other equitable relief against any such person.
- d. Remedies for Breach of Obligation of Confidentiality. Each party acknowledges that breach of its obligation of confidentiality may give rise to irreparable injury to the other party, which damage may be inadequately compensable in the form of monetary damages. Accordingly, a party may seek and obtain injunctive relief against the breach or threatened breach of the foregoing undertakings, in addition to any other legal remedies which may be available, to include, in the case of the State, at the sole election of the State, the immediate termination, without liability to the State, of this Contract or any Statement of Work corresponding to the breach or threatened breach.
- e. Surrender of Confidential Information upon Termination. Upon termination of this Contract or a Statement of Work, in whole or in part, each party must, within 5 calendar days from the date of termination, return to the other party any and all Confidential Information received from the other party, or created or received by a party on behalf of the other party, which are in such party's possession, custody, or control; provided, however, that Contractor must return State Data to the State following the timeframe and procedure described further in this Contract. Should Contractor or the State determine that the return of any Confidential Information is not feasible, such party must destroy the Confidential Information and must certify the same in writing within 5 calendar days from the date of termination to the other party. However, the State's legal ability to destroy Contractor data may be restricted by its retention and disposal schedule, in which case Contractor's Confidential Information will be destroyed after the retention period expires.

33. Reserved.

34. Reserved.

35. Reserved.

36. Records Maintenance, Inspection, Examination, and Audit. The State or its designee may audit Contractor to verify compliance with this Contract. Contractor must retain, and provide to the State or its designee and the auditor general upon request, all financial and accounting records related to the Contract through the term of the Contract and for 4 years after the latter of termination, expiration, or final payment under this Contract or any extension ("**Audit Period**"). If an audit, litigation, or other action involving the records is initiated before the end of the Audit Period, Contractor must retain the records until all issues are resolved.

Within 10 calendar days of providing notice, the State and its authorized representatives or designees have the right to enter and inspect Contractor's premises or any other places where Contract Activities are being performed, and examine, copy, and audit all records related to this Contract. Contractor must cooperate and provide reasonable assistance. If any financial errors are revealed, the amount in error must be reflected as a credit or debit on subsequent invoices until the amount is paid or refunded. Any remaining balance at the end of the Contract must be paid or refunded within 45 calendar days.

This Section applies to Contractor, any parent, affiliate, or subsidiary organization of Contractor, and any subcontractor that performs Contract Activities in connection with this Contract.

37. **Warranties and Representations.** Contractor represents and warrants: (a) Contractor is the owner or licensee of any Contract Activities that it licenses, sells, or develops and Contractor has the rights necessary to convey title, ownership rights, or licensed use; (b) all Contract Activities are delivered free from any security interest, lien, or encumbrance and will continue in that respect; (c) the Contract Activities will not infringe the patent, trademark, copyright, trade secret, or other proprietary rights of any third party; (d) Contractor must assign or otherwise transfer to the State or its designee any manufacturer's warranty for the Contract Activities; (e) the Contract Activities are merchantable and fit for the specific purposes identified in the Contract; (f) the Contract signatory has the authority to enter into this Contract; (g) all information furnished by Contractor in connection with the Contract fairly and accurately represents Contractor's business, properties, finances, and operations as of the dates covered by the information, and Contractor will inform the State of any material adverse changes; and (h) all information furnished and representations made in connection with the award of this Contract is true, accurate, and complete, and contains no false statements or omits any fact that would make the information misleading. A breach of this Section is considered a material breach of this Contract, which entitles the State to terminate this Contract under Section 23, Termination for Cause.
38. **Conflicts and Ethics.** Contractor will uphold high ethical standards and is prohibited from: (a) holding or acquiring an interest that would conflict with this Contract; (b) doing anything that creates an appearance of impropriety with respect to the award or performance of the Contract; (c) attempting to influence or appearing to influence any State employee by the direct or indirect offer of anything of value; or (d) paying or agreeing to pay any person, other than employees and consultants working for Contractor, any consideration contingent upon the award of the Contract. Contractor must immediately notify the State of any violation or potential violation of these standards. This Section applies to Contractor, any parent, affiliate, or subsidiary organization of Contractor, and any subcontractor that performs Contract Activities in connection with this Contract.
39. **Compliance with Laws.** Contractor must comply with all federal, state and local laws, rules and regulations.
40. **Reserved.**
41. **Reserved.**
42. **Nondiscrimination.** Under the Elliott-Larsen Civil Rights Act, 1976 PA 453, MCL 37.2101, *et seq.*, and the Persons with Disabilities Civil Rights Act, 1976 PA 220, MCL 37.1101, *et seq.*, Contractor and its subcontractors agree not to discriminate against an employee or applicant for employment with respect to hire, tenure, terms, conditions, or privileges of employment, or a matter directly or indirectly related to employment, because of race, color, religion, national origin, age, sex, height, weight, marital status, or mental or physical disability. Breach of this covenant is a material breach of this Contract.
43. **Unfair Labor Practice.** Under MCL 423.324, the State may void any Contract with a Contractor or subcontractor who appears on the Unfair Labor Practice register compiled under MCL 423.322.
44. **Governing Law.** This Contract is governed, construed, and enforced in accordance with Michigan law, excluding choice-of-law principles, and all claims relating to or arising out of this Contract are governed by Michigan law, excluding choice-of-law principles. Any dispute arising from this Contract must be resolved in Michigan Court of Claims. Contractor consents to venue in Ingham County, and waives any objections, such as lack of personal jurisdiction or *forum non conveniens*. Contractor must appoint agents in Michigan to receive service of process.

45. **Non-Exclusivity.** Nothing contained in this Contract is intended nor will be construed as creating any requirements contract with Contractor. This Contract does not restrict the State or its agencies from acquiring similar, equal, or like Contract Activities from other sources.
46. **Force Majeure.** Neither party will be in breach of this Contract because of any failure arising from any disaster or acts of god that are beyond their control and without their fault or negligence. Each party will use commercially reasonable efforts to resume performance. Contractor will not be relieved of a breach or delay caused by its subcontractors. If immediate performance is necessary to ensure public health and safety, the State may immediately contract with a third party.
47. **Dispute Resolution.** The parties will endeavor to resolve any Contract dispute in accordance with this provision. The dispute will be referred to the parties' respective Contract Administrators or Program Managers. Such referral must include a description of the issues and all supporting documentation. The parties must submit the dispute to a senior executive if unable to resolve the dispute within 15 business days. The parties will continue performing while a dispute is being resolved, unless the dispute precludes performance. A dispute involving payment does not preclude performance.
- Litigation to resolve the dispute will not be instituted until after the dispute has been elevated to the parties' senior executive and either concludes that resolution is unlikely, or fails to respond within 15 business days. The parties are not prohibited from instituting formal proceedings: (a) to avoid the expiration of statute of limitations period; (b) to preserve a superior position with respect to creditors; or (c) where a party makes a determination that a temporary restraining order or other injunctive relief is the only adequate remedy. This Section does not limit the State's right to terminate the Contract.
48. **Media Releases.** News releases (including promotional literature and commercial advertisements) pertaining to the Contract or project to which it relates must not be made without prior written State approval, and then only in accordance with the explicit written instructions of the State.
49. **Website Incorporation.** The State is not bound by any content on Contractor's website unless expressly incorporated directly into this Contract.
50. **Entire Agreement and Order of Precedence.** This Contract, which includes Schedule A – Statement of Work, and expressly incorporated schedules and exhibits, is the entire agreement of the parties related to the Contract Activities. This Contract supersedes and replaces all previous understandings and agreements between the parties for the Contract Activities. If there is a conflict between documents, the order of precedence is: (a) first, this Contract, excluding its schedules, exhibits, and Schedule A – Statement of Work; (b) second, Schedule A – Statement of Work as of the Effective Date; and (c) third, schedules expressly incorporated into this Contract as of the Effective Date. NO TERMS ON CONTRACTOR'S INVOICES, ORDERING DOCUMENTS, WEBSITE, BROWSE-WRAP, SHRINK-WRAP, CLICK-WRAP, CLICK-THROUGH OR OTHER NON-NEGOTIATED TERMS AND CONDITIONS PROVIDED WITH ANY OF THE CONTRACT ACTIVITIES WILL CONSTITUTE A PART OR AMENDMENT OF THIS CONTRACT OR IS BINDING ON THE STATE FOR ANY PURPOSE. ALL SUCH OTHER TERMS AND CONDITIONS HAVE NO FORCE AND EFFECT AND ARE DEEMED REJECTED BY THE STATE, EVEN IF ACCESS TO OR USE OF THE CONTRACT ACTIVITIES REQUIRES AFFIRMATIVE ACCEPTANCE OF SUCH TERMS AND CONDITIONS.
51. **Severability.** If any part of this Contract is held invalid or unenforceable, by any court of competent jurisdiction, that part will be deemed deleted from this Contract and the severed part will be replaced by agreed upon language that achieves the same or similar objectives. The remaining Contract will continue in full force and effect.
52. **Waiver.** Failure to enforce any provision of this Contract will not constitute a waiver.
53. **Survival.** The provisions of this Contract that impose continuing obligations, including warranties and representations, termination, transition, insurance coverage, indemnification, and confidentiality, will survive the expiration or termination of this Contract.
54. **Contract Modification.** This Contract may not be amended except by signed agreement between the parties (a "**Contract Change Notice**"). Notwithstanding the foregoing, no subsequent Statement of Work or Contract Change Notice executed after the Effective Date will be construed to amend this Contract unless it specifically states its intent to do so and cites the section or sections amended.

A. EQUIPMENT FOR PURCHASE

1. Warranties

- a) Contractor shall provide a one (1) year warranty on parts and labor or the manufacturer's warranty, whichever is greater. Please see **Schedule C – Warranties**.
- b) The State shall report a warranty claim with the local dealer. Arrangements shall be made for warranty service. Warranty service shall be provided by factory-trained technicians by a Michigan dealership upon notification.

The State reserves the right to require additional warranties.

2. Recall Requirements and Procedures

The Contractor shall notify the State and/or the ordering entity within 48 hours of a recall notice.

3. Service Levels

3.1 Time Frames

- a) Current inventory can be shipped immediately. Special orders are available between 30 to 60 days.
- b) All Contract Activities must be delivered within **120** calendar days from receipt of order. The receipt of order date is pursuant to Section 2, Notice provisions of the Standard Contract Terms.

3.2 Delivery

Delivery will be expected within **120** calendar days for special orders and out of stock items, and **30** calendar days for in-stock items, upon date of order. Delivery will be made to the requested location and shall be F.O.B. Delivered or charged on a mileage rate or a one-time charge by Region (see **Schedule D – Prosperity Regions**) per **Schedule H1 - Pricing**.

F.O.B. dealership Items

Prices shall be quoted "F.O.B. Dealership" with transportation charges prepaid to the primary Contractor location on all orders for State of Michigan and Extended Purchasing Participants. Contractors must also quote a delivery cost per **Schedule H1 – Pricing**, to facilitate calculation of delivery cost to various locations within Michigan. The delivery cost per **Schedule H1 – Pricing**, will be added to the equipment price quoted to determine the "Total Price" for "F.O.B. Dealership" items. Mileage will be calculated based upon the "Official Michigan Department of Transportation Highway Map". The State reserves the right to make their own shipping arrangements.

Freight Charges - Should an Agency order items that are below the minimum order requirement of the Contract, or should a Contractor quote F.O.B. Shipping Point on one-time purchases, the Contractor should choose the most economically advantageous carrier and must be approved by the using agency.

United Parcel Service (UPS) must be used in instances where the weight of the shipment is less than 150 lbs., or where shipments could be separated into smaller parcels such as three (3) 50 lb. packages.

If the Contractor fails to follow these shipping instructions, the State shall pay the shipping costs on the Contractor's invoice, minus the difference for the amount that was charged and the amount that would have been charged if the requested carrier had been used. The State reserves the right to arrange their own freight.

3.3 Training

The Contractor must provide the following training:

- a) A comprehensive orientation training shall be provided at delivery or at an alternate time requested by the State. The training shall include equipment operation, maintenance, and inspection practices.
- b) Upon request, the Contractor shall provide 8 hours of mechanics and operators training for up to eight (8) employees. The training is to be held at each ship to address. The Contractor shall provide unit pricing for training in **Schedule E1, Pricing**.

B. RENTAL/LEASE EQUIPMENT

1. Specifications

- a) The Contractor shall provide equipment for rental and/or lease that is similar in scope to equipment included in **Schedule B, Specifications**.

Brand or trade names referred to herein are for identification purposes only, and do not limit the Contractor to such brands, provided alternates offered are equal in quality and function to those specified.

- b) In addition, the Contractor shall provide a complete list of equipment available for rental and/or lease by category (e.g. loaders, dozers, sweepers, etc.) in **Schedule E – Pricing**.

The list shall include:

- i.* Daily, weekly, and monthly rental/lease rates.
- ii.* Percentage discount offered by category for such rates.
- iii.* Only listed items that meet these requirements shall be included under this contract.

- c) All rental/leased equipment is to meet or exceed applicable federal and state safety standards as mandated by OSHA, and MIOSHA Motor Carrier Division. This equipment is to meet or exceed applicable American National Standards Institute (ANSI) specifications. The Contractor will provide written documentation guaranteeing compliance with all safety standards.

- d) The Contractor shall provide written documentation confirming satisfactory testing on equipment where mandated by law (to include but not limited to: stress testing, dielectric testing, visual inspections) completed by a licensed and reputable testing firm.

Rental equipment shall be no more than four (4) years old. Equipment leased shall be the newest model year.

2. Availability and Delivery of Equipment

- a) Rental and Lease Equipment shall be available statewide. Statewide availability includes **ALL** locations of the Upper and Lower Peninsula.
- b) All requested orders must be delivered within two (2) calendar days/48 hours after receipt of order.
- c) Emergencies will be responded to within one (1) to six (6) hours. Equipment shall be available as both F.O.B. delivered and F.O.B. pick-up.
- d) No premium rates will be charged for delivery after normal business hours.
- e) Rental or leased equipment items shall be fully fueled and operational at the time of pick-up or delivery.
- f) The Contractor will be required to perform a walk-around equipment inspection at the time of delivery and pickup.
- g) The Contractor, or their Designee and the Program Manager or their Designee, shall document the inspection by mutual execution of an inspection document provided by the Contractor.

The State is responsible for refueling all rented equipment upon its return.

3. Maintenance/Service

- a) The Contractor will be responsible for all maintenance/service necessary to maintain satisfactory operation of rental equipment at no cost to the State.
- b) Equipment shall be serviced according to manufacturer specifications. The Contractor shall maintain an equipment schedule for service and retain complete lifetime service records for all equipment.
- c) If a repair is needed, and requires the piece of equipment to be out of service, the Contractor shall provide a replacement acceptable to the State.
- d) Contractor will maintain a Dedicated Product Support Department to ensure proper function of rented or leased equipment.

On-site maintenance must be performed according the recommended manufacturer maintenance schedule.

4. Training

The Contractor must provide the following training:

An orientation training shall be provided upon request at the time of delivery. The training shall be deemed sufficient by the State, to include detailed equipment operation and minor maintenance and inspection practices.

C. GENERAL REQUIREMENTS

1.1 Incentives

The Contractor provides the following special incentives or services:

- a) **Trade-In Policy** – Contractor will evaluate and inspect equipment for trade-in.

2.1 Technical Support and Repairs

When providing technical support, the Call Center must resolve the caller's issue within **30** minutes. If the caller's issue cannot be resolved within **2** hours, on-site service must be scheduled. The on-site service must be performed within **36** hours of the time the issue was scheduled for service.

2.2 Reporting

If applicable, the Contractor must submit, to the Contract Administrator or their designee, the following written reports:

- a) *Maintenance/service report*
- b) *Regional rental report*
- c) *Regional purchase report*

By the second Friday of every December, the Contractor must submit a report of recycled content in commodities sold in that calendar year to **the Contract Administrator or Designee**.

2.3 Meetings

The Contractor must attend the following meetings:

Kick-off meeting within 30 calendar days of the Effective Date.

The State may request other meetings, as it deems appropriate.

3. Staffing

3.1 Contractor Representative

The Contractor must appoint a Product Representative, specifically assigned to State of Michigan accounts, that will respond to State inquiries regarding the Contract Activities, answering questions related to ordering and delivery, etc. (the "Contractor Representative").

Lori Meyers

3.2 Customer Service Toll-Free Number

The Contractor must specify its toll-free number for the State to make contact with the Contractor Representative. The Contractor Representative must be available for calls during the hours of 8 am to 5 pm EST.

1-800-247-6483

3.3 Technical Support, Repairs and Maintenance

The Contractor must specify its toll-free number for the State to make contact with the Contractor for technical support, repairs, and maintenance. The Contractor must be available for calls and service during the hours of 8 am to 5 pm EST.

1-800-247-6483

3.4 Disclosure of Subcontractors

If the Contractor intends to utilize subcontractors, the Contractor must disclose the following:

- a) The legal business name; address; telephone number; a description of subcontractor's organization and the services it will provide; and information concerning subcontractor's ability to provide the Contract Activities.
- b) The relationship of the subcontractor to the Contractor.
- c) Whether the Contractor has a previous working experience with the subcontractor. If yes, provide the details of that previous relationship.
- d) A complete description of the Contract Activities that will be performed or provided by the subcontractor.
- e) The price of the subcontractor's work.

3.5 Security

The Contractor's staff may be required to make deliveries to or enter State facilities. The Contractor must:

- a) Require employee criminal background checks.
- b) Drivers must wear company uniforms with company logo.

4. Pricing

4.1 Price Term

- a) Pricing is firm for a 365 day period ("Pricing Period"). The first pricing period begins on the Effective Date. Adjustments may be requested, in writing, by either party and will take effect no earlier than the next Pricing Period. The State reserves the right to adjust the pricing period and allow automatic updates with limitations.
- b) Pricing on all items listed in **Schedule B, Specifications** (or approved alternates) shall be firm-fixed. All remaining items within Contractor's "**catalog**" shall be available at a firm-fixed discount. All "**catalog**" pricing must be published and available at all times via website access, and/or electronic/printed price pages. Price quotes issued from the Contractor to the State must be verifiable via published pricing. The State reserves the right to limit "catalog" items at any time for any reason. It is expected the Contractor's Catalog items shall provide the best prices available to the State at all times and be firm-fixed. The State may remove items from the "Catalog" at any time without cause.

4.2 Price Changes

- a) Adjustments will be based on changes in actual Contractor costs. Any request must be supported by written evidence documenting the change in costs. The State may consider sources, such as the Consumer Price Index; Producer Price Index; other pricing indices as needed; economic and industry data; manufacturer or supplier letters noting the increase in pricing; and any other data the State deems relevant.
- b) Following the presentation of supporting documentation, both parties will have 30 days to review the information and prepare a written response. If the review reveals no need for modifications, pricing will remain unchanged unless mutually agreed to by the parties. If the review reveals that changes are needed, both parties will negotiate such changes, for no longer than 30 days, unless extended by mutual agreement.
- c) The Contractor remains responsible for Contract Activities at the current price for all orders received before the mutual execution of a Change Notice indicating the start date of the new Pricing Period.

5. Ordering

5.1 Authorizing Document

The appropriate authorizing document for the Contract will be a purchase order.

5.2 Order Verification

The Contractor must have internal controls, to verify abnormal orders and to ensure that only authorized individuals place orders.

6. Acceptance

6.1 Acceptance, Inspection and Testing

The State will use the following criteria to determine acceptance of the Contract Activities:

- a) Purchased equipment shall be delivered in new condition. Damaged equipment will not be accepted. The Contractor will repair or replace the damaged equipment at the Contractor's expense.
- b) The Contractor shall provide documentation upon delivery that provides itemized deliverables.
- c) Acceptance is not complete for partial deliveries until final deliverables are received.

6.2 Final Acceptance

- a) The Contractor shall deliver the equipment. The State, or their designee, shall inspect the equipment and approve acceptance of goods upon delivery.
- b) All set-up and/or training and orientation shall be completed.

7. Invoice and Payment

7.1 Invoice Requirements

All invoices submitted to the State must include: (a) date; (b) purchase order; (c) quantity; (d) itemized description of the Contract Activities; (e) unit price; (f) shipping cost (if any); (g) total price; and (h) contract number.

8. Payment Methods

The State will make payment for Contract Activities by EFT as outlined in section 20 of Standard Contract Terms.

9. Additional Requirements

9.1 Environmental and Energy Efficient Products

The Contractor must include any relevant third-party certification, including the verification of a United States department of agriculture certified bio based product label.

The Contractor shall identify any energy efficient, bio-based, or otherwise environmental friendly products used in their products to the Program Manager (PM) 2 weeks prior to delivery.

9.2 Recycled Content and Recyclability Deliverable(s).

Without compromising performance or quality, the State prefers Deliverable(s) containing higher percentages of recycled materials. The Contractor must indicate an estimate of the percentage of recycled materials, if any, contained in each Deliverable:

- (total estimated percentage of recovered material)
- (estimated percentage of post-consumer material)
- (estimated percentage of post-industrial waste)

9.3 Hazardous Chemical Identification

In accordance with the federal Emergency Planning and Community Right-to-Know Act, 42 USC 11001, *et seq.*, as amended, the Contractor must provide a Safety Data Sheet (SDS) listing any hazardous chemicals, as defined in 40 CFR §370.2, to be delivered. Each hazardous chemical must be properly identified, including any applicable identification number, such as a National Stock Number or Special Item Number.

The Contractor must identify any hazardous chemicals that will be provided under any resulting contract.

The Contractor shall provide all current SDS to the Program Manager (PM) 2 weeks prior to delivery.

9.4 Mercury Content

Pursuant to MCL 18.1261d, mercury-free products must be procured when possible. The Contractor must explain if it intends to provide products containing mercury, the amount or concentration of mercury, and whether cost competitive alternatives exist. If a cost competitive alternative does exist, the Contractor must provide justification as to why the particular product is essential. All products containing mercury must be labeled as containing mercury.

The Contractor shall report if it intends to provide products containing mercury to the Program Manager (PM) no later than 48 hours after a purchase order is issued.

9.5 Brominated Flame Retardants

The State prefers to purchase products that do not contain brominated flame retardants (BFRs) whenever possible. The Contractor must disclose whether the products contain BFRs.

The Contractor must disclose to the Program Manager (PM) whether their products contain BFRs no later than 48 hours after a purchase order is issued.

9.6 Key Personnel

The Contractor must appoint one individual(s) who will be directly responsible for the day to day operations of the Contract (“Key Personnel”). Key Personnel must be specifically assigned to the State account, be knowledgeable on the contractual requirements, and respond to State inquires within 8 hours.

Lori Meyers – Admin/Finance Manager
56555 Pontiac Trail
New Hudson, MI 48165
LMeyers@aisequip.com
(810) 597-7895

The Contractor may not remove or assign Key Personnel without the prior consent of the State. Prior consent is not required for reassignment for reasons beyond the Contractor’s control, including illness, disability, death, leave of absence, personal emergency circumstances, resignation, or termination for cause. The State may request a résumé and conduct an interview before approving a change. The State may require a 30 calendar day training period for replacement personnel.

9.8 Organizational Chart

10. Invoice Credits

Late or improper completion of the Contract Activities will cause loss and damage to the State and Extending Purchasing Participants and it would be impracticable and extremely difficult to fix the actual damage sustained by the State and/or Extending Purchasing Participants. Therefore, if there is late or improper completion of the Contract Activities, the State, and the Ordering Entity are entitled to collect invoice credits in the amount of 2/10th of 1% of the Purchase Order for each day the Contractor fails to remedy the late or improper completion of the Work.

11. Liquidated Damages

Unauthorized Removal of Key Personnel will interfere with the timely and proper completion of the Contract, to the loss and damage of the State, and it would be impracticable and extremely difficult to fix the actual damage sustained by the State. Therefore, the State may assess liquidated damages against Contractor as specified below.

The State is entitled to collect \$500 per individual per day for the removal of any Key Personnel without prior approval of the State.

The State is entitled to collect \$500 per individual per day for an unapproved or untrained key personnel replacement.

▼ MACHINE CONNECTIVITY

Machine connectivity functions require cellular coverage. Usage of JDLINK System requires customer's acceptance of the terms of the John Deere Telematics System Contract. Option availability limited by specific geographical regions. Please refer to region specific price pages for appropriate ordering codes.

| Description | Code | Price |
|------------------------------------|------|---------------|
| JDLINK Ultimate Cellular - 5 Years | 170C | In Base Price |

Includes JDLINK hardware: integrated cab wiring harness, antenna, 4G LTE modular telematics gateway (MTG), Wi-Fi data transfer, Blue Tooth capability and JDLINK Ultimate activation.

JDLINK utilizes cellular and satellite technology infrastructure that is outside the control of John Deere. Changes to that infrastructure may require customers to

purchase compatible JDLink hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLink customer account must be created to access JDLink Ultimate data. Go to www.StellarSupport.com to renew or update JDLink subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.

JDLINK Ultimate Cellular - 5 Years

Includes JDLINK hardware: integrated cab wiring harness, antenna, 4G LTE modular telematics gateway (MTG), Wi-Fi data transfer, Blue Tooth capability and JDLINK Ultimate activation.

JDLINK utilizes cellular and satellite technology infrastructure that is outside the control of John Deere. Changes to that infrastructure may require customers to purchase compatible JDLINK hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLINK customer account must be created to access JDLINK Ultimate data. Go to www.StellarSupport.com to renew or update JDLINK subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.

| JDLink Ultimate Cellular - 5 Years | 170C | In Base Price |

Includes JDLink hardware: integrated cab wiring harness, antenna, 4G LTE modular telematics gateway (MTG), Wi-Fi data transfer, Blue Tooth capability and JDLink Ultimate activation.

JDLink utilizes cellular and satellite technology infrastructure that is outside the control of John Deere. Changes to that infrastructure may require customers to purchase compatible JDLink hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLink customer account must be created to access JDLink Ultimate data. Go to www.StellarSupport.com to renew or update JDLink subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.

PAYLOAD SCALE

| Description | Code | Price |
|------------------------------|------|-------------------|
| Loadrite L2180 Payload Scale | 2810 | In Referral Price |

Option includes the Deere branded L2180 that will integrate with JDLink for remotely monitoring payload weighing data. Electronic components will be field installed and calibrated by the corresponding Loadrite Dealer. Price includes set up, activation and calibration.

Only for use on order codes 2010 (Z-Bar Linkage) or 2020 (High Lift Z-Bar Linkage).

| | | |
|------------------------------|------|------------|
| Embedded Payload Scale (EPS) | 2850 | \$7,135.00 |
|------------------------------|------|------------|

EPS is an integrated weighing system visible in the base monitor. It provides bucket and material payload weighing at the pile and daily payload totals. EPS does not have the capability of connecting any external hardware, so printers, data modules, or modems cannot be used.

EPS components are factory installed but require calibration by the corresponding Loadrite Dealer. Loadrite must be contacted to activate and calibrate this scale.

The cost to set up, activate and calibrate this scale is already included in the price.

|------------------------------|------|-------------------|
| Loadrite L2180 Payload Scale | 2810 | In Referral Price |

Option includes the Deere branded L2180 that will integrate with JDLink for remotely monitoring payload weighing data. Electronic components will be field installed and calibrated by the corresponding Loadrite Dealer. Price includes set up, activation and calibration.

Only for use on order codes 2010 (Z-Bar Linkage) or 2020 (High Lift Z-Bar Linkage).

| | | |
|------------------------------|------|------------|
| Embedded Payload Scale (EPS) | 2850 | \$7,135.00 |
|------------------------------|------|------------|

EPS is an integrated weighing system visible in the base monitor. It provides bucket and material payload weighing at the pile and daily payload totals. EPS does not have the capability of connecting any external hardware, so printers, data modules, or modems cannot be used.

EPS components are factory installed but require calibration by the corresponding Loadrite Dealer. Loadrite must be contacted to activate and calibrate this scale.

The cost to set up, activate and calibrate this scale is already included in the price.

▼ PAYLOAD SCALE

| Description | Code | Price |
|------------------------------|------|-------------------|
| Loadrite L2180 Payload Scale | 2810 | In Referral Price |

Option includes the Deere branded L2180 that will integrate with JDLink for remotely monitoring payload weighing data. Electronic components will be field installed and calibrated by the corresponding Loadrite Dealer. Price includes set up, activation and calibration.

Only for use on order codes 2010 (Z-Bar Linkage) or 2020 (High Lift Z-Bar Linkage).

| | | |
|------------------------------|------|------------|
| Embedded Payload Scale (EPS) | 2850 | \$7,135.00 |
|------------------------------|------|------------|

EPS is an integrated weighing system visible in the base monitor. It provides bucket and material payload weighing at the pile and daily payload totals. EPS does not have the capability of connecting any external hardware, so printers, data modules, or modems cannot be used.

EPS components are factory installed but require calibration by the corresponding Loadrite Dealer. Loadrite must be contacted to activate and

calibrate this scale.

The cost to set up, activate and calibrate this scale is already included in the price.

▼ MACHINE CONNECTIVITY

Machine connectivity functions require cellular coverage. Usage of JDLINK System requires customer's acceptance of the terms of the John Deere Telematics System Contract. Option availability limited by specific geographical regions. Please refer to region specific price pages for appropriate ordering codes.

| Description | Code | Price |
|------------------------------------|------|---------------|
| JDLINK Ultimate Cellular - 5 Years | 170C | In Base Price |

Includes JDLINK hardware: integrated cab wiring harness, antenna, 4G LTE modular telematics gateway (MTG), Wi-Fi data transfer, Blue Tooth capability and JDLINK Ultimate activation.

JDLINK utilizes cellular and satellite technology infrastructure that is outside the control of John Deere. Changes to that infrastructure may require customers to purchase compatible JDLINK hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLINK customer account must be created to access JDLINK Ultimate data. Go to www.StellarSupport.com to renew or update JDLINK subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.

EPS is an integrated weighing system visible in the base monitor. It provides bucket and material payload weighing at the pile and daily payload totals. EPS does not have the capability of connecting any external hardware, so printers, data modules, or modems cannot be used.

Loadrite must be contacted to activate and calibrate this scale.
The cost to calibrate this scale is already included in the price.

▼ PAYLOAD SCALE

| Description | Code | Price |
|------------------------------|------|-------------------|
| Loadrite L2180 Payload Scale | 2810 | In Referral Price |

Option includes the Deere branded L2180 that will integrate with JDLink for remotely monitoring payload weighing data. Electronic components will be field installed and calibrated by the corresponding Loadrite Dealer. Price includes set up, activation and calibration.

Only for use on order codes 2010 (Z-Bar Linkage) or 2020 (High Lift Z-Bar Linkage).

| | | |
|------------------------------|------|------------|
| Embedded Payload Scale (EPS) | 2850 | \$7,135.00 |
|------------------------------|------|------------|

EPS is an integrated weighing system visible in the base monitor. It provides bucket and material payload weighing at the pile and daily payload totals. EPS does not have the capability of connecting any external hardware, so printers, data modules, or modems cannot be used.

EPS components are factory installed but require calibration by the corresponding Loadrite Dealer. Loadrite must be contacted to activate and calibrate this scale.
 The cost to set up, activate and calibrate this scale is already included in the price.

▼ MACHINE CONNECTIVITY

Machine connectivity functions require cellular coverage. Usage of JDLink System requires customer's acceptance of the terms of the John Deere Telematics System Contract. Option availability limited by specific geographical regions. Please refer to region specific price pages for appropriate ordering codes.

| Description | Code | Price |
|------------------------------------|------|---------------|
| JDLink Ultimate Cellular - 5 Years | 170C | In Base Price |

Includes JDLink hardware: integrated cab wiring harness, antenna, 4G LTE modular telematics gateway (MTG), Wi-Fi data transfer, Blue Tooth capability and JDLink Ultimate activation.

JDLink utilizes cellular and satellite technology infrastructure that is outside the control of John Deere. Changes to that infrastructure may require customers to purchase compatible JDLink hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLink customer account must be created to access JDLink Ultimate data. Go to www.StellarSupport.com to renew or update JDLink subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.

|---|------|-------------------|
| Loadrite L2180 Payload Scale with Printer | 2815 | In Referral Price |
|---|------|-------------------|

Option includes the Deere branded L2180 that will integrate with JDLink for remotely monitoring payload weighing data. Electronic components will be field installed and calibrated by the corresponding Loadrite Dealer. Price includes set up, activation and calibration.

Provides onboard ticket printing capability for Loadrite 2180 Payload Scale.

| | | |
|------------------------------|------|------------|
| Embedded Payload Scale (EPS) | 2850 | \$7,135.00 |
|------------------------------|------|------------|

EPS is an integrated weighing system visible in the base monitor. It provides bucket and material payload weighing at the pile and daily payload totals. EPS does not have the capability of connecting any external hardware, so printers, data modules, or modems cannot be used.

EPS components are factory installed but require calibration by the corresponding Loadrite Dealer. Loadrite must be contacted to activate and calibrate this scale.
The cost to set up, activate and calibrate this scale is already included in the price.

JDLINK utilizes cellular and satellite technology infrastructure that is outside the control of John Deere. Changes to that infrastructure may require customers to purchase compatible JDLINK hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLINK customer account must be created to access JDLINK Ultimate data. Go to www.StellarSupport.com to renew or update JDLINK subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.

| JDLink Ultimate Cellular - 5 Years | 170C | No Charge |

Includes JDLink hardware: integrated cab wiring harness, antenna, 4G LTE modular telematics gateway (MTG), Wi-Fi data transfer, Blue Tooth capability and JDLink Ultimate activation.

JDLink utilizes cellular and satellite technology infrastructure that is outside the control of John Deere. Changes to that infrastructure may require customers to purchase compatible JDLink hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLink customer account must be created to access JDLink Ultimate data. Go to www.StellarSupport.com to renew or update JDLink subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.

| | | |
|---------------------------------------|------|------------|
| Single Input Gearbox with Slip Clutch | 2820 | \$2,704.00 |
|---------------------------------------|------|------------|

Slip clutch protects circle, circle drive gearbox and draft frame from damage when end of moldboard comes in contact with stationary objects. Slip clutch is integral to the circle drive gearbox assembly and allows the circle frame to rotate, avoiding damage to the machine, when the end of the moldboard comes in contact with an immovable object.

| | | |
|---|------|------------|
| Heavy Duty Dual Input Gearbox without Slip Clutch | 2830 | \$1,546.00 |
|---|------|------------|

Heavy duty dual input gearbox is an industry exclusive and provides significant improvements in circle drive component durability. The heavy duty dual input circle drive gearbox provides comparable circle torque and circle rotate speed as the single input circle drive gearbox. The heavy duty dual input circle drive gearbox will significantly enhance uptime for the customer and is recommended for applications that frequently use the circle rotate function while under heavy load.

| Heavy Duty Dual Input Gearbox without Slip Clutch | 2830 | \$1,546.00 |
|---|------|------------|

Heavy duty dual input gearbox is an industry exclusive and provides significant improvements in circle drive component durability. The heavy duty dual input circle drive gearbox provides comparable circle torque and circle rotate speed as the single input circle drive gearbox. The heavy duty dual input circle drive gearbox will significantly enhance uptime for the customer and is recommended for applications that frequently use the circle rotate function while under heavy load.

| Heavy Duty Dual Input Gearbox with Slip Clutch | 2840 | \$4,250.00 |
|--|------|------------|

Heavy duty dual input gearbox is an industry exclusive and provides significant improvements in circle drive component durability. The heavy duty dual input circle drive gearbox provides comparable circle torque and circle rotate speed as the single input circle drive gearbox. The heavy duty dual input circle drive gearbox will significantly enhance uptime for the customer and is recommended for applications that frequently use the circle rotate function while under heavy load.

Slip clutch protects circle, circle drive gearbox and draft frame from damage when end of moldboard comes in contact with stationary objects. Slip clutch is integral to the circle drive gearbox assembly and allows the circle frame to rotate, avoiding damage to the machine, when the end of the moldboard comes in contact with an immovable object.

MACHINE CONNECTIVITY

Machine connectivity functions require cellular coverage. Usage of JDLink System requires customer's acceptance of the terms of the John Deere Telematics System Contract. Option availability limited by specific geographical regions. Please refer to region specific price pages for appropriate ordering codes.

| Description | Code | Price |
|------------------------------------|------|-----------|
| JDLink Ultimate Cellular - 5 Years | 170C | No Charge |

Includes JDLink hardware: integrated cab wiring harness, antenna, 4G LTE modular telematics gateway (MTG), Wi-Fi data transfer, Blue Tooth capability and JDLink Ultimate activation.

JDLink utilizes cellular and satellite technology infrastructure that is outside the control of John Deere. Changes to that infrastructure may require customers to purchase compatible JDLink hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLink customer account must be created to access JDLink Ultimate data. Go to www.StellarSupport.com to renew or update JDLink subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.

MACHINE CONNECTIVITY

Machine connectivity functions require cellular coverage. Usage of JDLink System requires customer's acceptance of the terms of the John Deere Telematics System Contract. Option availability limited by specific geographical regions. Please refer to region specific price pages for appropriate ordering codes.

| Description | Code | Price |
|------------------------------------|------|-----------|
| JDLink Ultimate Cellular - 5 Years | 170C | No Charge |

Includes JDLink hardware: integrated cab wiring harness, antenna, 4G LTE modular telematics gateway (MTG), Wi-Fi data transfer, Blue Tooth capability and JDLink Ultimate activation.

JDLink utilizes cellular and satellite technology infrastructure that is outside the control of John Deere. Changes to that infrastructure may require customers to purchase compatible JDLink hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLink customer account must be created to access JDLink Ultimate data. Go to www.StellarSupport.com to renew or update JDLink subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.

|--|------|---------------|
| Single Input Gearbox without Slip Clutch | 2810 | In Base Price |
| Single Input Gearbox with Slip Clutch | 2820 | \$2,704.00 |
| Slip clutch protects circle, circle drive gearbox and draft frame from damage when end of moldboard comes in contact with stationary objects. Slip clutch is integral to the circle drive gearbox assembly and allows the circle frame to rotate, avoiding damage to the machine, when the end of the moldboard comes in contact with an immovable object. | | |
| Heavy Duty Dual Input Gearbox without Slip Clutch | 2830 | \$1,546.00 |
| Heavy duty dual input gearbox is an industry exclusive and provides significant improvements in circle drive component durability. The heavy duty dual input circle drive gearbox provides comparable circle torque and circle rotate speed as the single input circle drive gearbox. The heavy duty dual input circle drive gearbox will significantly enhance uptime for the customer and is recommended for applications that frequently use the circle rotate function while under heavy load. | | |

The heavy duty dual input circle drive gearbox provides comparable circle torque and circle rotate speed as the single input circle drive gearbox. The heavy duty dual input circle drive gearbox will significantly enhance uptime for the customer and is recommended for applications that frequently use the circle rotate function while under heavy load.

Slip clutch protects circle, circle drive gearbox and draft frame from damage when end of moldboard comes in contact with stationary objects. Slip clutch is integral to the circle drive gearbox assembly and allows the circle frame to rotate, avoiding damage to the machine, when the end of the moldboard comes in contact with an immovable object.

▼ CIRCLE DRIVE GEARBOX

| Description | Code | Price |
|---|------|---------------|
| Heavy Duty Dual Input Gearbox without Slip Clutch | 2830 | In Base Price |

Heavy duty dual input gearbox is an industry exclusive and provides significant improvements in circle drive component durability. The heavy duty dual input circle drive gearbox provides comparable circle torque and circle rotate speed as the single input circle drive gearbox. The heavy duty dual input circle drive gearbox will significantly enhance uptime for the customer and is recommended for applications that frequently use the circle rotate function while under heavy load.

|--|------|------------|

Heavy duty dual input gearbox is an industry exclusive and provides significant improvements in circle drive component durability. The heavy duty dual input circle drive gearbox provides comparable circle torque and circle rotate speed as the single input circle drive gearbox. The heavy duty dual input circle drive gearbox will significantly enhance uptime for the customer and is recommended for applications that frequently use the circle rotate function while under heavy load.

Slip clutch protects circle, circle drive gearbox and draft frame from damage when end of moldboard comes in contact with stationary objects. Slip clutch is integral to the circle drive gearbox assembly and allows the circle frame to rotate, avoiding damage to the machine, when the end of the moldboard comes in contact with an immovable object.

▼ MACHINE CONNECTIVITY

Machine connectivity functions require cellular coverage. Usage of JDLink System requires customer's acceptance of the terms of the John Deere Telematics System Contract. Option availability limited by specific geographical regions. Please refer to region specific price pages for appropriate ordering codes.

| Description | Code | Price |
|--|------|---------------|
| JDLink/ZXLink Ultimate Cellular for the Americas - 5 Years | 1710 | In Base Price |

Includes JDLink/ZXLink hardware: integrated cab wiring harness, antenna, modular telematics gateway (MTG), and JDLink/ZXLink Ultimate activation.

JDLink/ZXLink utilizes cellular and satellite technology infrastructure that is outside

the control of John Deere. Changes to that infrastructure may require customers to purchase compatible JDLink/ZXLink hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLink/ZXLink customer account must be created to access JDLink/ZXLink Ultimate data. Go to www.StellarSupport.com to renew or update JDLink/ZXLink subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.

MACHINE CONNECTIVITY

Machine connectivity functions require cellular coverage. Usage of JDLink System requires customer's acceptance of the terms of the John Deere Telematics System Contract. Option availability limited by specific geographical regions. Please refer to region specific price pages for appropriate ordering codes.

| Description | Code | Price |
|--|------|---------------|
| JDLink/ZXLink Ultimate Cellular for the Americas - 5 Years | 1710 | In Base Price |

Includes JDLink/ZXLink hardware: integrated cab wiring harness, antenna, modular telematics gateway (MTG), and JDLink/ZXLink Ultimate activation.

JDLink/ZXLink utilizes cellular and satellite technology infrastructure that is outside the control of John Deere. Changes to that infrastructure may require customers to

purchase compatible JDLink/ZXLink hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLink/ZXLink customer account must be created to access JDLink/ZXLink Ultimate data. Go to www.StellarSupport.com to renew or update JDLink/ZXLink subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.

JDLINK/ZXLINK Ultimate Cellular for the Americas - 5 Years

Includes JDLINK/ZXLINK hardware: integrated cab wiring harness, antenna, modular telematics gateway (MTG), and JDLINK/ZXLINK Ultimate activation.

JDLINK/ZXLINK utilizes cellular and satellite technology infrastructure that is outside the control of John Deere. Changes to that infrastructure may require customers to purchase compatible JDLINK/ZXLINK hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLINK/ZXLINK customer account must be created to access JDLINK/ZXLINK Ultimate data. Go to www.StellarSupport.com to renew or update JDLINK/ZXLINK subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.

▼ MACHINE CONNECTIVITY

Machine connectivity functions require cellular coverage. Usage of JDLINK System requires customer's acceptance of the terms of the John Deere Telematics System Contract. Option availability limited by specific geographical regions. Please refer to region specific price pages for appropriate ordering codes.

| Description | Code | Price |
|--|------|---------------|
| JDLINK/ZXLINK Ultimate Cellular for the Americas - 5 Years | 1710 | In Base Price |

Includes JDLink/ZXLink hardware: integrated cab wiring harness, antenna, modular telematics gateway (MTG), and JDLink/ZXLink Ultimate activation.

JDLink/ZXLink utilizes cellular and satellite technology infrastructure that is outside the control of John Deere. Changes to that infrastructure may require customers to purchase compatible JDLink/ZXLink hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLink/ZXLink customer account must be created to access JDLink/ZXLink Ultimate data. Go to www.StellarSupport.com to renew or update JDLink/ZXLink subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.

| JDLink/ZXLink Ultimate Cellular for the Americas - 5 Years | 1710 | In Base Price |

Includes JDLink/ZXLink hardware: integrated cab wiring harness, antenna, modular telematics gateway (MTG), and JDLink/ZXLink Ultimate activation.

JDLink/ZXLink utilizes cellular and satellite technology infrastructure that is outside the control of John Deere. Changes to that infrastructure may require customers to purchase compatible JDLink/ZXLink hardware to restore functionality.

Includes 5 year subscription. Annual subscription renewal required after 5 years for continued functionality. JDLink/ZXLink customer account must be created to access JDLink/ZXLink Ultimate data. Go to www.StellarSupport.com to renew or update JDLink/ZXLink subscriptions.

Use of this service, and all rights and obligations of John Deere and the Customer (as identified in the applicable agreement), are governed by the terms and conditions outlined in the applicable Services and Software agreements available at www.JohnDeere.com/Agreements. If these terms and conditions are not agreeable do not proceed and do not use the service.
