

**ATTENTION: CURRENT RADAR INSTRUCTORS**

As of January 1, 2010 new standards for Speed Measurement operators and instructors will take effect. To become recertified as a Speed Measurement instructor, all current RADAR instructors must attend an update session. Attendance is mandatory in order to become recertified as a Speed Measurement instructor in Michigan. Any RADAR instructors not attending will be unable to teach RADAR after January 1. Current LIDAR instructors who are not also RADAR instructors will continue to be able to teach the supplementary LIDAR course to current RADAR operators.

The update training will be divided into two sessions. In the morning, a 4-hour LIDAR instructor supplementary training session will be conducted for current RADAR instructors who are not also current LIDAR instructors. The afternoon session is a mandatory update and recertification session for all instructors.

The session is free and lunch will be provided. Be sure to register so we can get an accurate count for lunch.
