

GeoPDF Instructions

Displaying Feature Attributes

To better serve our clients, the Rebuild MI program is providing an online mapping resource called the Regional Technical Assistants Map. This map is a GeoPDF which displays RTA locations and contact information. This will be an invaluable tool used to help our clients contact our RTAs and Rebuild MI services.

The following instructions explain how to read the attribute data associated with the Regional Technical Assistants (RTA) location map using your Adobe Reader.

- Open the map in Adobe Reader 9 or higher
- Click *Tools* on the menu bar
- Select *Analysis* → *Object Data Tool*

- Click on an RTA location ★ three times with your cursor. This should highlight the RTA location with a red box outline.
- Contact information for the RTA will be displayed in the lower left hand corner of the screen as shown below.
