

MICHIGAN ENERGY OFFICE

The Michigan Energy Office

(MEO), promotes energy efficiency and renewable energy resource development to Michigan residents, businesses and public institutions.

A U.S. Department of Energy designated state energy office, the MEO operates as a division of the Michigan Economic Development Corporation.

Program objectives include:

- Support of policy and program development
- Developing beneficial public-private partnerships at the local level
- Increasing energy efficiency in the public and private sectors
- Reducing Michigan's dependence on imported energy
- Encouraging the adoption and growth of new technologies and alternative fuels in buildings, industrial processes, vehicles and power generation

Program objectives are advanced through a variety of services, including informational resources, technical assistance, financial assistance and demonstration projects.

Core areas of strategic support:

- Building sciences
- Residential programs
- Transportation
- Sustainable communities
- Commercial/industrial programs that support business growth

The MEO also provides learning opportunities for Michigan's residents, businesses and institutions that:

- Teach the importance of energy efficiency and renewable energy resources to our economy; and
- Increase the adoption of energy efficiency and renewable energy technologies and practices within the state resulting in sustainable energy production, conservation and job creation.

Michigan
Energy Office
core programs include:

- Energy Efficiency & Conservation Block Grant (ARRA)
- Green Communities Challenge Program
- Performance Contracting Program—Energy Services Coalition—MI Chapter
- Rebuild MI Program
- Green Lodging & Green Venues
- Participation in Collaborative and Interagency Teams Energy Assurance Program
- Building Operators' Certification (BOC) Training Program
- State of Michigan Energy Use Reduction Efforts
- Commercial/Industrial Program
- Save Energy Now Program
- E3 Student Internship Program
- Energy Efficiency and Renewable Energy Technology Demonstration Program
- Energy Efficiency and Renewable Energy Revolving Loan (RFL) Program
- Growing your Community Passive Solar System Programs
- Encouraging Green Buildings and Home Weatherization
- AgriEnergy Program
- Biomass Energy Program
- Clean Cities Program
- Transportation Efficiency/Alternative Fuels
- Regional Energy Demonstration Centers
- Regional Collaboration for Great Lakes Offshore Wind
