

A real-world education ... providing a foundation for your future

Automotive Technology

Students learn how to troubleshoot and repair automobiles. Areas include front-end alignment, brake repair, automotive electrical, and engine tune-up.

Building Maintenance/Weatherization

New for 2010!

Cabinetmaking/Millwork

This program prepares cabinetmakers, millworkers, and wood product technicians. Students can train in the areas of cabinet and furniture assembly, machine and millwork operations, molding operations, and plastic laminate assembly.

Culinary Arts

Students are provided with the skills, attitudes, and knowledge needed for careers in the food service industry. Training levels include cook's helper, line cook, and cook.

Custodial

This program provides training in all aspects of cleaning and custodial duties necessary for employment in hospitals, schools, apartment buildings, hotels, and other public or private facilities.

Customer Service

Students work in a simulated customer service environment utilizing a telephone and a computer to learn all aspects of customer service including problem solving, telephone etiquette, computer concepts and business correspondence.

Electronics

Students train to become technicians in the areas of cable & wire assembler/installer, alarm systems, consumer products, industrial, telecommunication, broadcast electronics and installers in alternative energy.

Graphics Communication

Students learn screen printing, pre press, bindery, offset press and flexo press operation to produce brochures, business cards, forms and other printing projects.

Grounds Maintenance/Landscaping

Students learn how to operate various tools and machines related to landscaping; how to plant trees, shrubs, and bulbs; and how to perform other tasks related to grounds upkeep.

Health Careers

In the Certified Nurse Assistant program, students receive hands-on instruction in patient care, communication, medical terminology, documentation, and medical equipment.

Machine Technology

This program teaches students how to set up and operate various computer numerical control (CNC) and welding equipment to make or repair metal parts, tools, or machines.

Office Automation

Students are provided with the electro-mechanical skills necessary to maintain and repair today's office equipment, including computers and peripherals, copiers, and networking essentials.

Pharmacy Tech/Aide

New for 2010!

Retail Marketing

Students learn customer service/selling skills, cash handling, handling and controlling inventory, promotion/advertising, and loss prevention.

Thinking about a direction for your life ... or starting a new career?

The Michigan Career & Technical Institute (MCTI) offers adults with disabilities a unique blend of caring human support services and state-of-the-art training for jobs needed in business and industry today.

The campus – located on the shores of Pine Lake in southwestern Barry County – is fully accessible. For eligible adults who have a physical, mental, or emotional disability, tuition and room and board in the dormitory are free.

A career assessment service is available to help students explore their career options. Depending on aptitude and interest, students may be eligible to enroll in vocational programming.

Classroom preparation – principally hands on – is complemented by a supportive environment designed to meet the needs of students with physical, mental, or emotional disabilities. MCTI offers a number of health and social work services on campus.

In addition, all classrooms as well as the dormitory rooms, cafeteria, library, and indoor leisure services are located in one building for easy accessibility out of the weather.

Individuals must be at least 18 years of age to be accepted into an MCTI training program or Career Assessment Services. If a prospective student meets the entrance criteria of the training program he or she has selected, the Admissions staff will place his/her name on the waiting list for that program and send a projected enrollment letter.
