Local Health Department Responsibilities in Reporting Hepatitis B Surface Antigen-Positive (HBsAg-positive) Pregnant Women

**CONFIRM** HBsAg-positive reports on all women of childbearing years (10 – 60 years of age) from physicians, hospitals, laboratories, etc

**ENTER** complete HBsAg-positive case information into Michigan Disease Surveillance System (MDSS)

**CREATE** a NEW record in MDSS for every HBsAg-positive laboratory on women of childbearing years (10 – 60 years of age). *(Do NOT merge records.)* Include case investigation updates in notes section or by attaching electronic notes

If an HBsAg-positive lab result is reported as Perinatal and it is for a woman of childbearing age, follow the **LHD Procedure for Women of Childbearing Age Entered in MDSS as Perinatal**

**DETERMINE** pregnancy

**CONDUCT** investigation to identify any new or existing household or sexual contacts and determine their hepatitis B vaccination and testing status

**FORWARD** completed **Perinatal Hepatitis B Intake Form** and copy of pregnant woman’s HBsAg-positive test result to the Perinatal Hepatitis B Prevention Program (PHBPP) by fax to 517-335-9855 or in southeast (SE) Michigan to 313-456-0639
To contact the PHBPP call 517-284-4893 or 800-964-4487
In SE Michigan, call 313-456-4431 or 313-456-4432
