** Influenza vaccine recommendations change from year to year. Please check www.michigan.gov/flu for the most current changes, or call your local health department.

Combination vaccines should always be documented under each antigen.
Please see note section on other side.

OFFICIAL IMMUNIZATION RECORD

For Children and Adults

Name: _____ Sex: F M

Birthdate: ____ / ____ / ____

Special Problems: _____

Physician/Clinic: _____
Name Telephone

Parent/Guardian: _____
Name Telephone

Getting immunized is a life-long job that prevents serious diseases.

- Your child needs vaccines at these ages: Birth, 2 months, 4 months, 6 months, 12-15 months, 4-6 years, and 11-12 years.
- All adults (not just the elderly) need vaccines to protect them from severe illnesses.
- All children from 6 months through 18 years should get the flu vaccine every year. Most adults need yearly influenza vaccine. Ask your healthcare provider if you or one of your family members should get the flu vaccine.

Keep track of the immunizations you and your child have received.

- Bring your immunization card to every medical visit. Check with your health care provider to make sure you or your child are not missing any doses of vaccines.
- Ask to have your card updated every time vaccines are given.
- The Michigan Care Improvement Registry (MCIR) keeps immunization records for Michigan residents. Ask if the vaccine you or your child received is entered in MCIR.*
- Children must meet Michigan’s immunization requirements to enroll in any nursery, day care, preschool or head start program, and public or non-public school.

***Under Public Act 540 of 1996 and the Administrative Rules [R325.163] which govern the immunizations given to children, a physician who administers immunizations to a child under the age of 20 years is required to report this information to the Michigan Care Improvement Registry (MCIR), formally the Michigan Childhood Immunization Registry.**
