** Influenza vaccine recommendations change from year to year. Please check www.michigan.gov/flu for the most current changes, or call your local health department.

Combination vaccines should always be documented under each antigen.

Please see note section on other side.

OFFICIAL IMMUNIZATION RECORD

For Children and Adults

Name: _____ Sex: F M

Birthdate: ____ / ____ / ____

Special Problems: _____

Physician/Clinic: _____
Name Telephone

Parent/Guardian: _____
Name Telephone

Everyone needs vaccines throughout their life.

- Your child needs vaccines at these ages: Birth, 2 months, 4 months, 6 months, 12-15 months, 4-6 years, 11-12 years, and 11-16 years.
- All adults (not just the elderly) need vaccines throughout their lifetime to protect themselves from severe illness.
- All persons ages 6 months and older need a yearly seasonal flu vaccine.

Keep a record of your and your child’s immunizations.

- Bring your immunization record to every medical visit. Check with your health care provider to make sure you or your child are not missing any doses of vaccines.
- Ask to have your card updated every time vaccines are given.
- The Michigan Care Improvement Registry (MCIR) keeps immunization records for Michigan residents. Ask if the vaccine you or your child received is entered in MCIR.*
- Children must meet Michigan’s immunization requirements to enroll in any nursery, day care, preschool or head start program, and public or non-public school.

**Public Act 91 of 2006 expanded MCIR to extend immunization records into adulthood. Providers are highly encouraged to report adult immunizations to MCIR. Providers are still required to report childhood immunizations to MCIR within 72 hours of administration.
