

Instructions On How To Record IPV Lot Number In MCIR VIM

- Polio vaccine has a lot number, a hyphen and the run number of the lot on outer box. The number will look like: **A1299-2**.
- The IPV vial or syringe doesn't include the hyphen or the run numbers. It will look like: **A1299**.
- MCIR drops the hyphen when added to the VFC inventory, it will look like: **A12992**.
- Choose the correct matching lot # in MCIR VIM that matches the lot #, minus the hyphen that includes the run numbers: **A12992**.
