GOVERNOR

JANET OLSZEWSKI
DIRECTOR

Childhood Lead Poisoning Prevention Program

Portable Blood Lead Specimen Analyzer Users (e.g., LeadCare II)

Laboratories and provider's offices using a portable blood lead specimen analyzer for Michigan residents must:

- Be registered with the Michigan Department of Community Health, Childhood Lead Poisoning Prevention Program (CLPPP). For information on registering with CLPPP, please contact Courtney Pendleton at 517/335-8912 or PendletonC@michigan.gov.
- Report all blood lead levels, for both adults and children living in Michigan, to MDCH CLPPP. Blood lead results must be reported within **five** business days per Michigan law, Administrative Rules R325.9082 and R325.9083. A document with all of the required information will be provided upon registration.

Once the laboratory or provider's office is registered and reporting with CLPPP, the results received will be linked with Medicaid and MCIR databases. Manually entering results into MCIR is *not* an option. The blood lead results must be reported to CLPPP.

If you have reported a blood lead result to CLPPP, and it is not showing in the child's MCIR record, please contact Courtney Pendleton at 517/335-8912 for information.

Please do not email confidential and/or protected health information.
