Information on the MDSS release version 1.6

August 23rd, 2006

- The information entered under the laboratory section of the 'User Profile' page will now be populating the correct fields in the laboratory screen.

- Changed the value populating 'County' in the Ordering Provider section on the 2nd lab page to the text of the county, not the code of the county.

- On the Varicella (chickenpox) case detail form the "Epi-linked" question can now be answered at times other than during the initial case entry.
