

**Bulletin Number:** MSA 07-52

**Distribution:** Prepaid Inpatient Health Plans

**Issued:** September 1, 2007

**Subject:** Revisions to Mental Health and Substance Abuse Chapter

**Effective:** October 1, 2007

**Programs Affected:** Medicaid

This bulletin describes changes to the Mental Health and Substance Abuse Medicaid service array that were proposed to the Centers for Medicare and Medicaid Services (CMS). Throughout the document, references to the portion of the Mental Health/Substance Abuse Chapter of the Medicaid Provider Manual affected by the change are noted.

#### THE FOLLOWING CHANGES AFFECT POLICY CURRENTLY CONTAINED IN SECTION 1 GENERAL INFORMATION

##### **Administrative Organization**

Information was added to encourage the use of natural supports to meet beneficiaries' needs where family or friends are willing and able to provide this assistance. It also clarified that provision of natural supports should not be held as a condition for receiving specialty mental health supports and services.

##### **Programs Requiring Special Approval**

"Wraparound" was added to the list of programs that require special approval from MDCH.

##### **Definition of Terms**

Changes were made in the definitions of terms to make them consistent with current law, or to reflect changed Michigan Department of Community Health (MDCH) policy.

The definition of Certificate of Medical Necessity and all other references to it within the chapter were removed because Medicare no longer requires the CMN.

Under definitions of Individual Plan of Services and Medical Necessity, language was added to require that documentation of the medical necessity of each service be included in the individual plan of services.

The definition of Mental Health Professional was revised to be consistent with the 2005 revision of the Michigan Mental Health Code that included licensed professional counselor, added licensed marriage and family therapist, and deleted psychiatric nurse.

The definition of prescription was revised to allow for instances of verbal orders from a physician or other licensed practitioner of the healing arts within their scope of practice, and to set a standard of the written prescription to be obtained within 14 days of the verbal order. The verbal order may be used to initiate Occupational Therapy (OT), Physical Therapy (PT), or Speech, Hearing and Language services or to dispense medically necessary equipment or supplies when a delay would be medically contraindicated.

The definition of Substance Abuse Treatment Specialist was modified to reflect recent changes in licensure of clinicians, and to include all acceptable credential levels within each profession: physician, physician assistant, nurse practitioner, registered nurse, licensed practical nurse, licensed psychologist (including limited, and temporary limited), licensed professional counselor, temporary limited licensed professional counselor, licensed masters social worker (and limited licensed), licensed bachelor's social worker (and limited licensed). Requirements were also added for certification through the Michigan Certification Board of Addiction Professionals including certified addictions counselor - Level I, Michigan, Level II, and IC & RC; certified advanced addictions counselor; certified clinical supervisor, IC & RC and Michigan; and certified criminal justice professional.

A new allowable Substance Abuse Treatment professional was added to the list of terms called substance abuse treatment practitioner. This is an individual who has completed and passed the Fundamentals of Alcohol and Other Drug Problems (FAODP) exam or the Fundamentals of Substance Abuse Counseling (FASC) exam and has three years of relevant experience in the provision of substance abuse treatment services.

#### THE FOLLOWING CHANGES AFFECT POLICY CURRENTLY CONTAINED IN SECTION 2 PROGRAM REQUIREMENTS

##### **Mental Health and Developmental Disabilities Services**

Requirements were added that prohibit the use of aversive, intrusive, or restrictive techniques in the provision of these services, unless the techniques are identified in the beneficiary's individual plan of service and individually approved and monitored by a behavior management committee.

##### **Location of Services**

The location of services was modified to encourage PIHPs to provide mental health and developmental disabilities services in integrated locations in the community other than the providers' sites, such as library, community center, or the beneficiary's own home.

##### **Provider Qualifications**

Modifications were made to Licensed Practical Nurse, Physical Therapy Assistant, Registered Nurse and Social Worker to bring the required qualifications into compliance with Michigan law. A chart of provider qualifications by covered service and procedure was added as an attachment to the chapter.

##### **Covered Services**

The beginning paragraph in the section was modified to clarify the expectation that PIHPs will offer evidence-based and promising practices as part of the Medicaid covered specialty services where applicable. PIHPs shall assure that these practices are provided by staff that have been appropriately trained in the model(s) and are provided to the population for which the model was intended.

#### THE FOLLOWING CHANGES AFFECT POLICY CURRENTLY CONTAINED IN SECTION 3 COVERED SERVICES

##### **Assessments**

The requirement to use the Child and Adolescent Functional Assessment Scale (CAFAS) for the assessment of children with suspected serious emotional disturbance was added. In addition, the staff who perform the CAFAS must have been trained and certified in the CAFAS and are re-certified every two years.

##### **Behavior Management Review**

A number of changes were made to this coverage to reflect assurances per 42 CFR 438.100 (b)(2)(v) the State of Michigan made that to assure that consumers in the PIHPs will "be free from any form of restraint or seclusion used as a means of coercion, discipline, convenience or retaliation, as specified in other Federal regulations on the use of restraints or seclusion." The changes include the determination of whether a comprehensive assessment should be done in order to rule out any physical or environmental cause for the behavior. In addition, there is a new requirement that any proposed aversive, intrusive or restrictive technique not supported by current evidence-based practice must be reviewed and approved by MDCH prior to implementing. There is also a requirement that staff implementing the individual's behavior management plan must be trained in how to implement the plan. Finally, there is clarification that this coverage includes the monitoring of the behavior management plan at a minimum of quarterly, or more frequently as indicated in the individual plan of services.

### **Individual/group Therapy**

Language was added to clarify that evidence-based practices such as Integrated Dual Disorder Treatment for Co-Occurring Disorders (IDDT/COD), Dialectical Behavior Therapy (DBT), and Multi-Systemic Therapy (MST) are included in this coverage.

### **Intermediate Care Facility for Individuals with Mental Retardation (ICF/MR)**

The coverage description was enhanced to clarify the health and rehabilitative services coverage for which PIHPs are responsible, and that they must be provided in a state-licensed facility of 16 beds or less that is certified to meet ICF/MR standards that are specified in 42CFR 483.400 and 42CFR442 Subpart C. The description indicates that beneficiaries must meet ICF/MR level of care criteria and require a continuous active treatment program that is defined in their individual plan of services and coordinated and monitored by a Qualified Mental Retardation Professional (QMRP). It also provides the definition of active treatment from 42CFR483.440 (a)(1)(i & ii) that must include specialized and generic training, treatment, health and related services that are directed toward acquisition of behaviors necessary for the beneficiary to function with as much self determination and independence as possible, and the prevention or deceleration of regression or loss of current optimal functional status. Finally, a requirement was added that treatment services must be provided by qualified professionals within their scope of practice, and that direct care staff must meet aide level qualifications.

### **Medication Administration, Medication Review, and Nursing Facility Mental Health Monitoring**

Qualifications of providers of these services were modified to reflect changes in the Public Health Code and Mental Health Code on licensure of social workers and their scope of practice.

### **Treatment Planning**

The coverage was modified to include clinician monitoring of specific services in the individual plan of service, when not performed by the case manager or supports coordinator.

## **THE FOLLOWING CHANGES AFFECT POLICY CURRENTLY CONTAINED IN SECTION 5 CLUBHOUSE PSYCHOSOCIAL REHABILITATION PROGRAMS**

Changes were made to the staff capacity section to require that there be one full-time on-site clubhouse manager who has a minimum of a bachelor's degree in a health or human services field and two years experience with the target population, or who is a licensed masters social worker with one year experience with the target population; and is licensed, certified or registered by the State of Michigan or a national organization to provide health care services.

## **THE FOLLOWING CHANGES AFFECT POLICY CURRENTLY CONTAINED IN SECTION 6 CRISIS RESIDENTIAL SERVICES**

### **Child Crisis Residential Services**

The requirement that nursing services be available through regular consultation and provided on an individual basis was deleted.

### **Crisis Residential Services**

Changes were made to the qualifications of staff providing crisis residential services. First, treatment services must be clinically supervised by a psychiatrist. A psychiatrist need not be present when services are delivered, but must be available by telephone at all times. In addition, the covered crisis residential services listed in Section 6.2 must be under the immediate direction (i.e., on-site eight hours a day, on-call at all other times) of a mental health professional possessing at least a master's degree in human services with one year experience providing services to beneficiaries with serious mental illness, or a bachelor's degree in human services with at least two years experience providing services to beneficiaries with serious mental illness.

**MICHIGAN DEPARTMENT OF COMMUNITY HEALTH**  
**MICHIGAN PIHP/CMHSP PROVIDER QUALIFICATIONS PER MEDICAID SERVICE & HCPCS/CPT CODES**

Service Description (Medicaid Provider Manual, Mental Health & Substance Abuse Chapter)	HCPCS Codes	Reporting Code Description from HCPCS and CPT Manuals	Coverage	Provider/Staff Qualifications & Minimum Training Requirements (Refer to Medicaid Provider Manual for Definitions)
<b>Assertive Community Treatment (ACT)</b>	H0039	ACT	State Plan	Minimum staffing: Physician (MD or DO) to provide psychiatric coverage, registered nurse who provides direct services within scope of practice, and team coordinator who is clinician with master's degree and appropriate licensure or certification and two years clinical experience with adults with serious mental illness All team staff have a basic knowledge of ACT programs and principles acquired through ACT specific training
