

# Medical Control Seminar

2010

# Medical Control Seminar

- Objective:
  - Provide an awareness of the scope of issues (abbreviated) and implications that go into decision-making in Medical Oversight of an EMS System in Michigan.
  - Designed to provide a general knowledge base.
  - To serve as a tool to assist with assuming a leadership role in the EMS System.

# Medical Control Seminar

- A Michigan curriculum was developed based upon the “Guide for Preparing Medical Directors” developed by the National Highway Traffic Safety Administration.
- Presentations have been modified to meet Michigan’s EMS system.
- The Michigan curriculum is in the process of being updated and will be placed on the EMS website when completed.

# Medical Control Seminar

## AGENDA

- Module 1 – Provides an overview of the Medical Director's and other health care providers roles in the process of EMS systems.
- Module 2 – Describes the organizational structure and characteristics of EMS Systems.
- Module 3 – Describes the qualifications, roles, responsibilities and authority of EMS Medical Directors and the Medical Control Authority
- Module 4 – Describes the Medical Director's role in personnel education and training
