**Michigan Cancer Surveillance Program**

**Site Specific Factor (SSF) fields for Collaborative Staging (CS) Version 02.03**

This table shows which SSF's are defined by CSv02.03 (with an X) and which of those are required to be abstracted by the Michigan Cancer Surveillance Program (highlighted in green) for cases diagnosed in 2011. Prostate SSF 4 (highlighted in dark purple) is required for cases diagnosed 2004 through 2009 only. The highlighted SSF fields are REQUIRED for hospitals with a registry. If the SSF field is NOT highlighted, then the item is REPORTABLE for a hospital with a registry. ALL of the SSF fields are REPORTABLE for a hospital without a registry, regardless of whether or not they are highlighted. For laboratories, the SSF fields are NOT required/reportable, however you may not leave the SSF field blank. You must record the correct unknown or default code. (For further clarification, refer to the Michigan Cancer Program Manual.)
