Seneca Nation Health System History

Mission

The mission of the Seneca Nation Health System is to enhance the overall health of the Native American communities we serve by providing a comprehensive range of health services that addresses the holistic well-being of each individual.

Vision

The vision of the Seneca Nation Health System is for a productive and satisfying life for the Seventh Generation of Native Americans; which incorporates the belief that physical, mental, social and spiritual functions are one.

Nyā:weh

The Seneca Nation Health System logo is an ancient Iroquois floral design adapted to depict the heart-shaped leaves of the ginger plant.

Ginger is indigenous to the Seneca territories, and is just one of the many plants and herbs long-utilized in homeopathic medicine.

Today, scientists are giving more support to using homeopathic treatments in the modern medicinal community.

The ginger plant is uniquely qualified to represent the Seneca Nation Health System's belief in the value of tradition in helping to shape today for tomorrow's generations.
