Grade 8

Funded by the Michigan Department of Education and the U.S. Education Department (USED).
MICHIGAN STATE BOARD OF EDUCATION

STATEMENT OF ASSURANCE OF COMPLIANCE WITH FEDERAL LAW

The Michigan State Board of Education complies with all Federal laws and regulations prohibiting discrimination and with all requirements and regulations of the U.S. Department of Education. It is the policy of the Michigan State Board of Education that no person on the basis of race, color, religion, national origin or ancestry, age, sex, marital status, or handicap shall be discriminated against, excluded from participation in, denied the benefits of, or otherwise be subjected to discrimination in any program or activity for which it is responsible or for which it receives financial assistance from the U.S. Department of Education.
DIRECTIONS: Read each question. Choose the BEST answer for each question.
NOTE: For each item listed throughout this booklet, the first statement is a summary of the Michigan Extended Benchmark (EB) and the second statement or problem is the descriptor for the item’s stem or question.

1. **P.ME.FI.EB.IV.1.m.3a:** Recognize that all items are made of smaller particles

   Given three substances, recognize which substance is the example of the specified category of matter

   A selects a substance that is not an example of the specified category of matter

   B selects a substance that is not an example of the specified category of matter

   C selects the substance that is an example of the specified category of matter

2. **R.RO.FI.EB.II.1.e.3ADDm:** Identify and/or describe ways in which technology is used in everyday life

   Recognize which of 3 listed electronic devices enables a person to accomplish a specified task.

   A selects a device that could provide access to the necessary technology but does not enable task completion

   B selects the device which enables a person to complete the specified task

   C selects a device that does not enable a person to complete the specified task
3 C.CN.FI.EB.I.1.m.3a: Identify and/or use tools and equipment appropriate to scientific investigations

Recognize the appropriate tool to use to accomplish a specified task

A selects a tool which would not enable a person to complete the specified task

B selects a tool that is appropriate for use to complete the task

C selects a tool which would not enable a person to complete the specified task

4 L.CE.FI.EB.III.1.m.1a: Recognize that all living things are made of cells

Given 3 drawings of cell arrangements, recognize the drawing representing cells that have a specified cellular feature

A selects a cell arrangement drawing that does not illustrate cells that have the specified feature

B selects a cell arrangement drawing that does not illustrate cells that have the specified feature

C selects the cell arrangement drawing which displays the specified cellular feature

5 L.OR.FI.EB.III.2.m.1a: Compare and/or classify organisms in major groups based on their structure

Given 3 drawings of different organisms, recognize which organism is a specified type

A selects an organism that is not an example of the specified type

B selects the organism that is an example of the specified type of organism

C selects an organism that is not an example of the specified type

6 L.OR.FI.EB.III.2.m.1a: Compare and/or classify organisms in major groups based on their structure

Recognize the type of organism that reproduces via a specified birthing process

A selects the type of organism that reproduces via the specified birthing process

B selects an organism that does not reproduce using the specified birthing process

C selects an organism that does not reproduce using the specified birthing process
7 L.OR.FI.EB.III.2.m.2a:  
Identify stages of the life cycle of flowering plants

Recognize the plant part that produces a specified plant product

A selects the plant part that is the source of the plant product

B selects a plant part that does not directly produce the specified plant product

C selects a plant part that does not directly produce the specified plant product

8 L.OR.FI.EB.III.2.m.4a:  
Identify how selected systems and processes work together in animals

Recognize which 2 body systems work together to carry out a specified physiological function

A selects the 2 body systems that carry out the specified life-support function

B selects 2 body systems for which neither is involved in the specified function

C selects 2 body systems for which only 1 is involved in the specified function

9 L.OR.FI.EB.III.2.m.2a:  
Identify stages of the life cycle of flowering plants

Based on a procedure list, recognize the step in the procedure that follows the step illustrated by the drawing

A selects a step that precedes the step illustrated by the drawing

B selects a step that is beyond the step that follows the step illustrated by the drawing

C selects the step in the procedure that immediately follows the step illustrated by the drawing

10 L.OR.FI.EB.III.2.m.1a:  
Compare and/or classify organisms in major groups based on their structure

Given 3 drawings of different organisms, recognize which organism is a specified type

A selects the organism that is an example of the specified type of organism

B selects an organism that is not an example of the specified type

C selects an organism that is not an example of the specified type
11 L.OR.FI.EB.III.2.m.3a: Explain where the plants make and store food

Given a drawing of a specific plant, identify the part of the plant that stores food

A selects the part of the plant that primarily stores food

B selects a part of the plant that primarily transports food

C selects a part of the plant that primarily produces food

12 R.RO.FI.EB.II.1.m.5a: Develop an awareness of and sensitivity to the natural world

Given a situation of a specific large scale and immediate pollution event, recognize the next immediate action to be taken to mitigate the pollution

A selects an action that will not remove or clean up the pollution

B selects an action that is not immediate in response to the pollution

C selects the action that will initiate immediate action to clean up and best mitigate the pollution

13 L.EV.FI.EB.III.4.m.1a: Explain how fossils provide evidence about the nature of ancient life

Recognize scientific facts that are based on fossil evidence

A selects a past process for which fossils do not provide evidence

B selects a past process for which fossils do not provide evidence

C selects the scientific facts that can be derived from fossils

14 L.EV.FI.EB.III.4.m.2a: Identify how species may become extinct

Recognize the likely change in an animal population given a specific change in the environment

A selects a change that reflects misconceptions in an animal's ability to adapt to environmental changes

B selects the most likely change that would occur in the population

C selects a change that reflects misconceptions in an animal's ability to adapt to environmental changes
15 **L.EC.FI.EB.III.5.m.5a:** Identify how humans use and benefit from plant and animal materials

Given 3 drawings of different products, recognize the product that is made from two types of organisms

A selects the product that can be made from both types of organisms

B selects the product made from just 1 type of organism

C selects the product made from just 1 type of organism

---

16 **L.EC.FI.EB.III.5.m.5a:** Identify how humans use and benefit from plant and animal materials

Given 3 drawings of common household items, recognize the item made from animal resources

A selects an item not made from animal resources

B selects an item not made from animal resources

C selects the item made from animal resources

---

17 **L.EC.FI.EB.III.5.m.1a:** Describe common patterns of relationships among populations

Recognize the ecological relationship between 2 animals as specified in the drawing

A selects an incorrect statement of relationship

B selects an incorrect statement of relationship

C selects the correct relationship for the animal as depicted in the drawing

---

18 **L.EC.FI.EB.III.5.m.5a:** Identify how humans use and benefit from plant and animal materials

Given 3 drawings of common household items, recognize the item made from animal resources

A selects an item not made from animal resources

B selects an item not made from animal resources

C selects the item made from animal resources
19. **P.ME.FI.EB.IV.1.m.1a:** Describe and compare objects in terms of weight and width

   Based on the illustration, determine if 1 object weighs more than another object

   - **A** selects an incorrect conclusion about the weight of the 2 objects
   - **B** selects an incorrect conclusion about the weight of the 2 objects
   - **C** selects the correct conclusion about the weight of the 2 objects

20. **P.ME.FI.EB.IV.1.m.6a:** Investigate electrical devices, using instructions and appropriate safety precautions

   Recognize best safety precautions when working with electricity

   - **A** selects an action that is unrelated to electrical safety
   - **B** selects the best action to assure safety when working with electricity
   - **C** selects an action that does not provide the best safety when working with electricity

21. **P.ME.FI.EB.IV.1.m.2a:** Identify when length, weight, area, volume, or temperature is appropriate

   Recognize the correct measure required to carry out a specified task

   - **A** selects an incorrect measure for the specified task
   - **B** selects the correct measure which provides the necessary information for the specified task
   - **C** selects an incorrect measure for the specified task

22. **C.CN.FI.EB.I.1.m.1a:** Identify and/or generate questions about the world based on observation

   Recognize how a measure changes for a specified situation

   - **A** selects a measured change in the opposite direction of the specified change
   - **B** selects a measured change in the opposite direction of the specified change
   - **C** selects the measured change that meets the specified change conditions
23 P.ME.FI.EB.IV.1.m.2a: Identify when length, weight, area, volume, or temperature is appropriate

Given a drawing of a common household task, recognize the physical property of matter that is changing

A selects a property not changing

B selects a property not changing

C selects the property of matter that changes due to the action taken

24 P.ME.FI.EB.IV.1.m.5a: Construct simple circuits and/or identify how they work in terms of the flow of current

Given 3 similar yet different circuit drawings, identify the drawing that depicts a specific circuit condition

A selects a drawing that does not depict the specified circuit

B selects a drawing that does not depict the specified circuit

C selects a drawing that depicts the specified circuit condition

25 P.ME.FI.EB.IV.1.m.5a: Construct simple circuits and/or identify how they work in terms of the flow of current

Recognize the best source of information for work on an electric-powered machine

A selects the best source of electrical information for work on the machine

B selects a reference that does not apply to work on an electric-powered machine

C selects a reference that does not apply to work on an electric-powered machine

26 P.CM.FI.EB.IV.2.m.1a: Describe common physical changes in matter

Recognize the physical change that occurs in a specified substance as temperature changes

A selects the change that does occur in the substance as temperature changes

B selects a change that involves such a minute amount of matter as to not be perceptible

C selects a change that is the opposite of what will occur as temperature changes
27 P.CM.FI.EB.IV.2.m.2a: Describe common chemical changes in terms of properties of reactants and products

Recognize the type of change when 2 substances combine to form other substances

A selects the correct type of changes when 2 or more substances combine to form other substances

B selects a change in a substance where the chemistry is the same on both sides of the change

C selects a word that is meaningless in regard to types of substance change

28 P.CM.FI.EB.IV.2.m.1a: Describe common physical changes in matter

Recognize the process by which matter changes state in the specified situation

A selects a process that would not result in the matter disappearing

B selects the process by which the matter disappeared from the focus of the specified situation

C selects a process that would not result in the matter disappearing

29 P.MO.FI.EB.IV.3.m.2a: Identify forces (push/pull) that speed up, slow down, stop, or change the direction of moving objects

Recognize the relationship between an object's weight and the force of gravity

A selects an object representing a misconception regarding the relationship

B selects an object representing a misconception regarding the relationship

C selects the object representing a correct understanding of the relationship

30 P.MO.FI.EB.IV.3.m.3a: Identify and/or describe patterns of interaction of magnetic materials

Given magnets experiencing a specified type of force, choose the description of the expected result

A selects the correct description

B selects a description that has nothing to do with magnetic movement

C selects a description that is the opposite result of specified force
31  **P.MO.FI.EB.IV.3.m.5a:** Identify which simple machine is best used in a given situation

Recognize the type of simple machine used and described in the drawing provided

A selects a simple machine that is not described or used in the drawing

B selects the simple machine used as displayed and described in the drawing

C selects a simple machine that is not described or used in the drawing

32  **P.CM.FI.EB.IV.2.m.4a:** Identify common energy transformations in everyday situations

Recognize which 1 of 3 components is necessary for a physical change to occur

A selects a component that is not necessarily applicable for a physical change

B selects the component that is necessary in the situation for a physical change in matter to occur

C selects a component that is not necessarily applicable for a physical change

33  **E.GE.FI.EB.V.1.m.4a:** Identify fossils and/or explain that they are evidence of past life

Given 3 drawings of a once-animate object, identify the fossil example

A selects the drawing of a fossil

B selects a drawing of an animal that is alive or is merely a dead specimen

C selects a drawing of a plant part that appears fresh

34  **E.GE.FI.EB.V.1.m.2a:** Identify and/or describe major events in the rock cycle

Recognize the process that produces the specified Earth surface change

A selects the process that produces the specified Earth surface change

B selects a process that does not produce the specified Earth surface change

C selects a process that does not produce the specified Earth surface change
35 E.HY.FI.EB.V.2.m.2a: Explain the behavior of surface water
Identify the process by which liquid water changed its state of matter in the specified situation

A selects the process by which the water changed its state of matter

B selects a process by which water did not change its state of matter in the specified situation

C selects a process by which water did not change its state of matter in the specified situation

36 E.HY.FI.EB.V.2.m.4a: Identify sources of pollution in water
Recognize the pollution consequence of the specified action between 2 different bodies of water

A selects an unlikely but possible consequence that does not pollute

B selects a likely consequence of how material from 1 body of water could pollute another body of water

C selects an unlikely consequence which would be considered an accident and not pollution

37 E.SS.FI.EB.V.4.m.1a: Compare and contrast characteristics of the Earth and other planets
Recognize planetary conditions necessary for life as we know and understand it

A selects a condition on a planet not apparently necessary for life

B selects a condition on a planet not apparently necessary for life

C selects the condition on a planet that is necessary for life as we know it

38 E.SS.FI.EB.V.4.h.4ADDm: Demonstrate an awareness of tools used to learn about the universe
Recognize a benefit from space travel

A selects a problem that occurs from space travel

B selects a required investment for space travel

C selects the benefit derived from space travel
39 E.AW.FI.EB.V.3.m.1a:
Interpret temperature, precipitation, and cloud cover information

Identify the state of matter of a specified form of precipitation

A selects the incorrect state of matter

B selects the incorrect state of matter

C selects the correct state of matter for the type of specified precipitation

40 E.AW.FI.EB.V.3.m.1a:
Interpret temperature, precipitation, and cloud cover information

Using predicted weather information, select appropriate clothes for comfort in the weather conditions

A selects clothing that is not needed for the weather conditions

B selects clothing that is not needed for the weather conditions

C selects clothing that is most appropriate for comfort in the weather conditions
