

About This Report

Individual Student Report (ISR):

The Early Literacy and Mathematics Benchmark Assessment Individual Student Report provides information about student performance by content area. Each student will have a separate ISR for each content assessed. The report is divided into three main sections:

1. Student demographic information
2. Content Summary - the Content Summary section displays Points Earned out of Points Possible for each domain in a content area
3. Content Details - the Content Details section displays Points Earned out of Points Possible for each assessment category within a content area

Student Demographic Information

This section provides identifying information about the student including name, grade, Unique Identification Code (UIC), and, if provided by the school, the district student ID, gender, date of birth, and race/ethnicity. The report will indicate if the student has been marked as a Student with Disability, English learner, and formerly limited English proficiency in the Michigan Student Data System (MSDS). Additionally, the report will indicate if the student has been assigned designated supports.

Note: The Early Literacy and Mathematics fall test occurs before the official collection of MSDS data. This means that demographic data such as Student Population, EL, and SWD will not display a student's current status if their status has changed since last year.

Content Summary — Fall

The summary displays Points Earned out of Points Possible for each domain in a content area for the Fall 2016 test. The summary area for Spring 2017 and the Fall to Spring Change will be blank.

Content Summary — Spring

In Spring 2017, the report will show Spring Points Earned out of Points Possible for all students taking the assessment in the spring. If the student also took the assessment in the fall of 2016, then the Fall Points Earned/Points Possible and the Fall to Spring Change will be populated. If the student did not take the assessment in the fall these columns will be blank. The Fall to Spring Change will display one of the following symbols:

△ a blue upward facing triangle indicating the student has an increase in points earned

- ▼ an orange downward facing triangle indicating the student has a decrease in points earned from fall to spring
- a yellow circle indicating no change in points earned from fall to spring
- a green circle indicating a student has earned all points possible in both fall and spring

Content Details — Fall

ELA and mathematics contents are organized by Domains. Each Domain shows assessment categories and provides a Brief Description of the Academic Standards. Raw scores—that is points earned out of total points possible—are reported for each category in the Fall 2016 assessment. Scores for Spring 2017 will be blank in the fall report.

Content Details — Spring

Raw scores—that is points earned out of total points possible—are reported for each category in the Spring 2017 assessment. In the Spring 2017 report, if a student has results from both fall and spring, results from both tests will be displayed.

Please note: Many of the categories have a small numbers of items.

About the Data:

- Raw scores (Points Earned/Points Possible) are reported for each domain and assessed content category in ELA and math.
- ISRs with tests marked as “Invalid” are provided with the invalid reason included, and will still display student scores.

Note: Because the fall reports are produced before the MSDS fall data collection, some students may be flagged as invalid due to missing MSDS Data.

Data Definitions

Domains: used to organize assessment categories

Assessment Categories: a grouping of related standards

Raw Score: Points Earned/total Points Possible

Brief Description of Academic Standards: provide an abbreviated description of the content standards
