Instructions

Based on the analysis and dialogue about district level student and system data and information, and the data and information drawn from a review of each individual school's comprehensive needs assessment reports, complete the chart on the following page. A separate chart for each academic content area goal identified should be completed.

Section I of the chart would have been filled out as the district completed the District Analysis Report on Student Achievement in the first section of the district CNA. Data from that section report can be pasted into the chart below. You will note that the chart allows a district the opportunity to mark a goal as ***O Active, O Maintenance, or O Revised.*** **Active** goals allow

for the development of a district improvement plan around current challenges that student and system data/information identify. **Maintenance** goals provide the ability to identify those goals that current data/information indicates are not presently a concern area, but maintaining the strategies and resources are needed to ensure that current levels of student achievement are maintained or increased, or **Revised** Goals allow for the revision of an established goal.

Section II of the following chart lists challenges the district identified from the Comprehensive Needs Assessment Strand reports that aligned district practices with content area goals.
