- **No registration fee**
- **Materials, continental breakfast served at 8:00 and lunch included**
- **0.5 SB-CEUs available**
- **Register as a team on-line at Ionia ISD website:
www.ioniaisd.org
Click
"Conference Registration"**

In a learning team, participants will gain knowledge of the purpose and process of two protocols to examine student work. One protocol will focus on studying the student work produced and the other protocol will focus on reviewing scores generated from assessments. These focused conversations offer departmental, grade-level, interdisciplinary, and vertical teams a way to collaboratively plan for instruction to address the learning needs of students, to deepen understanding of the intended learning and to make quality revisions to assessments. This interactive one-day session provides an example of how to embed professional development into our everyday practice in rich and meaningful ways.

Objectives:

- To understand the rationale and process for two different protocols
- To gain practice and insight into the knowledge, reasoning and skills necessary to effectively use these protocols in practice.
