Resume' Summary

School System/Federal Programs

My professional career as an educator for 33 years has been exhilarating and exciting. Throughout my career I have held several positions that attribute to my experience and expertise as a veteran educator in public education. I have succeeded as a Reading Specialist (Middle School, High School, and Adult Education), State and Federal Programs (Compensatory Education) Director, MEAP/Assessment Coordinator, Safe and Drug Free Coordinator, Career and Technical Education Supervisor, Professional Development Coordinator, Bilingual Director, Secondary Education Director, and a Staff Development Consultant. Currently I am a contracted Field Services Consultant with the Michigan Department of Education.

School Improvement Initiatives

I possess a thorough knowledge of the School Improvement Process. I facilitated the move of a middle school from Phase 5 status to meeting the target in all areas and subgroups to make Adequate Yearly Progress (AYP). I have been a presenter at the Office of Educational Assessment and Accountability Conferences held across the state where I have shared the middle school journey from restructuring phase to success. I have served on and chaired district and local School Improvement Teams, successfully leading several schools through the School Improvement and North Central Accreditation process. Analyzing data and developing strategies to direct instruction are just a few of my strengths.
