

Excellence Postsecondary

Ebony Moon

Electronics and Electrical Technology
Mott Community College

Nominator: Madonna Carpenter-Jackson,
Special Populations Coordinator

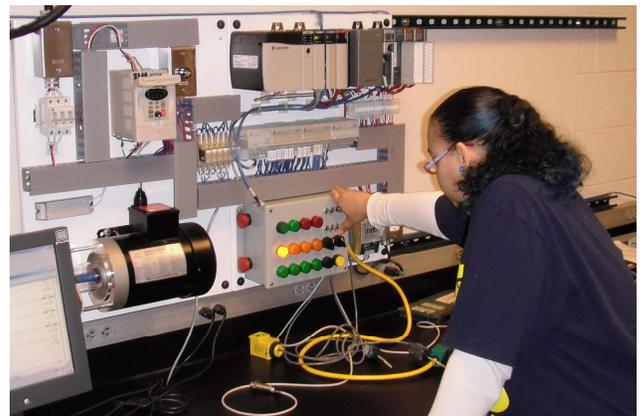

“I love Math” was the sentiment expressed by Ebony Moon. She took the Electronics and Electrical Technology Program at Mott Community College because she has always liked “taking things apart just to see the internal components and what exactly made them work.”

She had two years of robotic classes at the Genesee Area Skill Center, which she found very interesting. It was through that program, that she gained the experience necessary to enter the electronics and electrical technology program at Mott.

Ebony will be the first in her family to graduate college and that is very special to her. She will earn her degree in Electrical Engineering, all while being a mother of five children, working 25 hours per week in the Learning Center at Mott, working part-time as a cashier at Meijer, being a member of Phi Theta Kappa-Alpha Omicron Iota, and volunteering for Project Linus. She maintains a over 3.7 grade point average.

Her nominator, Madonna Carpenter-Jackson, says that Ebony pushes herself to go beyond the expected criteria. “Her goal is to be the best at everything she attempts. ‘If you believe, you can achieve’, is the attitude of Ebony. She definitely raises the bar for work ethic and high educational standards.”

Ebony’s long-term goal is to receive her Master’s Degree in Electrical Engineering from the University of Michigan. She wants to specialize in circuit design and analysis. She will then apply to Stanford University to pursue her doctorate degree.

Always follow your dreams
and do whatever it takes to
make them come true.

~ *Ebony Moon*
