Program Information:

Program Description as Provided by Mathnasium of Plymouth-Canton: MATHNASIUM is a highly specialized math learning program for students in Grades 1-12 designed to significantly increase math skills while building confidence and a positive attitude. The curriculum is research based and has a one to one correlation with Michigan's Grade Level Content Expectations. Each student is given a diagnostic assessment to determine strengths, weaknesses and depth of understanding with respect to grade level material and key math concepts. The results of the assessment are used to develop a learning plan and provide curriculum materials which cater to the unique needs of the student. The Mathnasium method of teaching is delivered by highly qualified instructors (5:1 student-teacher ratio) and uses a unique combination of mental, verbal, visual, tactile, and written techniques to help children learn math in a way that makes sense to them. Students participate in 1 hour sessions, twice per week.

The program description was created by the provider and has not been edited by the Michigan Department of Education.
