The CON Commission took final action on September 21, 2016, approving the revised CON Review Standards for Computed Tomography (CT) Scanner Services. These Standards became effective on December 9, 2016. The CON Commission approved to de-regulate dental CT scanner as CON covered clinical equipment. As of December 9, 2016, a dental CT scanner service no longer requires CON review/approval under the revised CON Review Standards for CT Scanner Services.

LOIs for dental CT scanner service

Applicants will receive email notification from the Department informing them their LOI's have been expired due to the de-regulation of dental CT scanner service.

CON Applications currently under review (Proposed Decision has not been issued)

Applicants will received formal correspondence from the Department indicating a Waiver will be issued for the CON due to the de-regulation of dental CT scanner service. The CON application review fee will be refunded to the applicant minus the \$500 Waiver processing fee.

Approved CONs not deemed 100% Complete

Applicants will receive formal correspondence from the Department indicating the CON has been withdrawn due to the de-regulation of dental CT scanner service.

CONs deemed 100% Complete

No further action is required.

Please note, although you will no longer need CON review/approval for dental CT scanner services, other regulatory state agencies such as Radiation Safety Section (RSS), are still regulating dental CT scanners. Facilities are required to contact RSS to determine if submission of radiation shielding plans and general information are needed to provide dental CT scanner service. Contact RSS at 517-284-7820 if you have further questions.

CON Annual Survey for Dental CT Facilities

Dental CT facilities will be exempt from completing the 2016 Annual Survey. An email will be sent to the dental facility informing them about the Commission's decision to deregulate dental CT scanners. The dental CT facilities will not receive notification to complete the 2016 Annual Survey.
