

Statewide Guidelines & More

Don't see a certain Menominee County lake or river listed in this brochure?
Then the Statewide Safe Fish Guidelines can help you find safer fish to eat.

Only use the Statewide Guidelines if...

- the Menominee County lake or river you are fishing in is not listed in this brochure, OR
- your lake or river is listed in this brochure, but the fish species is not listed.

Statewide Safe Fish Guidelines

Type of Fish	Chemical of Concern	Size of Fish (length in inches)	MI Servings per Month*	Type of Fish	Chemical of Concern	Size of Fish (length in inches)	MI Servings per Month*
Black Crappie	Mercury	Any Size	4	Rock Bass	Mercury	Any Size	4
Bluegill	Mercury	Any Size	8	Smallmouth Bass	Mercury	Under 18"	2
Carp	PCBs	Any Size	2			Over 18"	1
Catfish	PCBs & Mercury	Any Size	4	Suckers	Mercury	Any Size	8
Largemouth Bass	Mercury	Under 18"	2	Sunfish	Mercury	Any Size	8
		Over 18"	1	Walleye	Mercury	Under 20"	2
Muskellunge	Mercury	Any Size	1			Over 20"	1
Northern Pike	Mercury	Under 30"	2	White Crappie	Mercury	Any Size	4
		Over 30"	1	Yellow Perch	Mercury	Any Size	4

These guidelines are based on the typical amount of chemicals found in fish filets tested from around the state. Some fish may be higher or lower. If any of these fish are listed in the guidelines for the lake or river you are fishing in, use **those** guidelines instead of the statewide guidelines. The *MI Servings* recommendation will be more exact for that lake or river because those filets have been tested. For other counties in Michigan, please visit www.michigan.gov/eatsafefish to get the *Eat Safe Fish Guide* for that region.

*See the back of this brochure to learn about MI Servings.

2x, Best Choice, Limited, and Do Not Eat

2x

Remove the fat; double the MI Servings!

PCBs and dioxins are in the fat of the fish. You can double the number of *MI Servings* if you:

- trim away the fat that you can see from the filet,
- cook the fish on a grill or broiling pan so more fat can drip away
- **Note, you can't remove mercury, selenium, or PFOS from the fish.** Do not double the *MI Servings* for fish with those chemicals listed as a Chemical of Concern.

Best Choice

Do you eat fish at least twice a week?

When using the MDHHS *Eat Safe Fish Guide*, watch for this MDHHS "Best Choice" symbol. The hook and fish mark species that you and your family can safely eat 8 *MI Servings* or more each month!

Limited

If you:

- are under the age of 15,
- have health problems, like cancer or diabetes,
- are planning on having children in the next several years, currently pregnant, or breastfeeding,

MDHHS suggests you **avoid eating all fish listed as "Limited"** because of higher levels of chemicals.

If **NONE** of the above apply to you, it is usually OK to eat fish listed as "**Limited**" **1 or 2 times each year.**

Do Not Eat

No one should eat fish listed as Do Not Eat, regardless of age or health.

When these fish were tested, MDHHS found **very high** levels of chemicals. Eating even one meal of these fish could possibly lead to health problems in the future, regardless of age or health.

eat safe fish in Menominee County

www.michigan.gov/eatsafefish

What are 'safe' fish?

Safe fish are fish that are low in chemicals. If you use the **Eat Safe Fish Guide** when you choose fish to catch and eat, you will protect yourself and your family from chemicals that could someday make you sick.

If there are chemicals in the fish, why should I still eat it?

Fish have a lot of great health benefits.

- Fish can be a great low-fat source of protein.
- Fish are brain food.
- Some fish have heart-healthy omega-3s.

Plus, fishing is a fun way to get outside and enjoy Michigan's 11,000 lakes, rivers, and streams!

If you follow the 3Cs and go after fish that have fewer chemicals in them, you can get a lot of health benefits and have **very little risk.**

Catching fish • Buying fish • Eating fish

For more information on safe fish, call MDHHS at 1-800-648-6942 or visit us online at www.michigan.gov/eatsafefish.

Using the Eat Safe Fish Guidelines

MDHHS tests only the filets of the fish for chemicals to set these guidelines. *MI Servings* are set to be safe for everyone. This includes **children, pregnant or breastfeeding women, and people who have health problems like cancer or diabetes.**

How much is MI Serving?

Weight of Person	MI Serving Size
45 pounds	2 ounces
90 pounds	4 ounces
180 pounds	8 ounces

For every 20 pounds less than the weight listed in the table, subtract 1 ounce of fish.

For example, a 70-pound child's *MI Serving* size is 3 ounces of fish. 90 pounds - 20 pounds = 70 pounds & 4 ounces - 1 ounce = a *MI Serving* size of 3 ounces

For every 20 pounds more than the weight listed in the table, add 1 ounce of fish.

For example, a 110-pound person's *MI Serving* size is 5 ounces of fish. 90 pounds + 20 pounds = 110 pounds / 4 ounces plus 1 ounce = a *MI Serving* size of 5 ounces

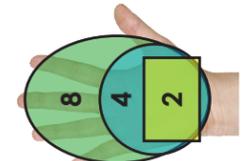

You might eat more than one *MI Serving* in a meal. That's OK, just keep track so you don't have too much.

Are you pregnant?

Fish is good for you and your baby! Use your pre-pregnancy weight to find your *MI Serving* size. It's also best to avoid eating fish labeled as "limited" when you're pregnant or breastfeeding.

My Michigan, MI Serving Size

- 8 ounces of fish = size of an adult's hand (large oval)
- 4 ounces of fish = size of the palm of an adult's hand (small circle)
- 2 ounces of fish = size of half a palm of an adult's hand (rectangle)
