

Pharmacy Learning Objectives

At the end of this activity, participants should be able to describe two of Michigan's top immunization priorities for 2019, list two recent vaccine recommendations made by the ACIP, and describe progress made in the U.S. and in Michigan to stop the spread of hepatitis A during the recent outbreak. Participants should also be able to discuss CDC storage and handling recommendations, proper handling procedures and measures to prevent vaccine errors, describe two motivation techniques that will influence your recommendation and promotion of vaccines, and describe two issues that can impact your immunization practice.

Pharmacy Continuing Education Requirements

This activity is structured to meet knowledge-based educational needs. A knowledge-based activity acquires factual knowledge. Information in knowledge-based activities is based on evidence as accepted in the literature by the health care professions. Pharmacy continuing education (PCE) credit will be earned based on participation in this activity. Any individual who is more than 10 minutes late to an activity or leaves an activity early will not be granted PCE credit. This procedure will be strictly enforced, so please plan accordingly.

Participants must fully participate in the activity and complete an online activity evaluation and posttest questions, if received by presenters, with a passing score of 70 percent or greater within two weeks of the program date. Online evaluations and posttests will not be available for completion and requests to process credit will not be accepted after **November 30th, 2018**. See the program instruction sheet distributed during the activity for the online activity link. Posttests will not be graded and credit will not be processed until the online evaluation and posttest has officially closed for response. Please allow MPA two weeks to grade posttests and process and upload credit to CPE Monitor after the evaluation and posttest has closed. NOTE: ACPE guidelines prohibit MPA from issuing credit more than 60 days after the activity for any reason; therefore, to avoid denial of credit, it is imperative that pharmacists and pharmacy technicians complete the online evaluation and posttest by the deadline indicated to allow sufficient time for processing. If all requirements are met, participants will receive pharmacy continuing education (PCE) credit through CPE Monitor, a national, collaborative effort by ACPE and the National Association of Boards of Pharmacy (NABP) to provide an electronic system for pharmacists and pharmacy technicians to track their completed PCE credits. MPA, as an ACPE-accredited provider, is required to report pharmacist and pharmacy technician PCE credit using this tracking system. Pharmacist and pharmacy technician participants must provide their NABP e-Profile identification number and date of birth (in MMDD format) when they complete activity evaluations. It will be the responsibility of the participant to provide the correct information. If this information is not correctly provided, NABP and ACPE prohibit MPA from issuing CPE credit. Partial credit will not be awarded. If you have yet to sign up for CPE Monitor, go to MyCPEMonitor.net.

ACPE Universal Activity Number 0112-9999-18-577-L01-P 5.5 contact hours; Knowledge-based Activity; Initial Release Date: 10/9/18; Expiration Date: 10/9/19

Michigan Pharmacists Association is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education.
